# BOOKS FOR FARMERS AND OTHERS.

FERTILIZERS: Where the Materials come from, where to get them in the Cheapest Form, how to Compound Formulas, Etc., By James J. H. Gregory, Marblehead, Mass.

For more than twenty-five years we have made use of what are known among farmers as "fertilizers," as distinguished from the manure of the barnyard, using in recent years, mostly in the drill, from thirty to eighty tons annually. Of late we have compounded these ourselves, purchasing the materials and various chemicals where we could find the best articles cheapest. We have repeatedly been urged by the agricultural societies, before whom we have lectured on the subject of Fertilizers, to publish our lectures. To oblige our many friends who have made this request, and as a help to many of our customers who are seeking help along this dark and difficult road, we have done so. In our little work there will be found many valuable tables, with many suggestions, and much information on the purchase of materials, the combining of them, and the use of the fertilizers made from them. We believe it will give a good return to any of our customers for their outlay. The treatise makes a book of 116 pages; price, per mail, 40 cents.

Single copies of either of the four following treatises sent by mail for 30 cents, or the five for \$1.35. Seed dealers and booksellers supplied at the usual discount.

# ONION RAISING. What kinds to Raise, and the Way to Raise Them. By J. J. H. Gregory, Marblehead, Mass.

This work, which we issued in 1865, has been warmly recommended by some of the best authorities in the country, and has gone through fifteen editions. It treats on Onions raised from seed, Potato Onions, Onion Sets, Top Onions, Shallots, and Rareripes, the Onion Maggot, Rust, the merits of the different varieties of Onions, instructions in seed raising, and how to tell good seeds,—beginning with the selecting of the ground, and carrying the reader along, step by step, through the preparing of the soil, manuring, ploughing, planting, hoeing, weeding, gathering the crop, storing and marketing it, with a hundred minute details embracing every department of the subject. Illustrated with thirteen engravings of Onions, Sowing Machines and Weeding Machines.

## SQUASHES, AND HOW TO GROW THEM. By J. J. H. Gregory, Marblehead, Mass.

This treatise is of about the same size and style as our treatise on "Onion Raising," and contains several illustrations, including a section of our squash house, with full directions for erecting one. In plan and thoroughness it is similar to our Onion treatise; very minute and thorough. Beginning with the selection of soil, it treats of the best way of preparing it; the best manures and the way to apply them; planting the seed, protecting the vines from bugs and maggots, the cultivation, gathering, storing, and marketing of the crops; giving hundreds of minute details so valuable to inexperienced cultivators. We have written this and our other treatise on the theory that what the public want is minuteness and thoroughness of detail. The present edition is up to date.

## CABBAGES, AND CAULIFLOWERS-HOW TO RAISE THEM. By J. J. H. GREGORY, Marblehead, Mass.

This treatise gives all the minute instructions so valuable to the beginner. It begins with the selecting the ground, and carries the reader along step by step, through the preparing of the soil, manuring, ploughing, planting, hoeing, weeding, gathering the crop, storing and marketing it, with a hundred

minute details embracing every department of the subject.

To prepare ourselves the more thoroughly to write on this work, we experimented on foreign and native varieties of cabbage for four years, raising not far from seventy kinds. The gist of our experience will be found in this treatise. It is illustrated by several fine engravings. We have added a paragraph on the green worm that is causing so much trouble in some localities. The present edition has additions and improvements.

# CARROTS, MANGOLD-WURTZELS, AND SUGAR BEETS: What kinds to Raise, How to Grow Them, and How to Feed Them. By J. J. H. GREGORY, Marblehead, Mass.

The increased attention given to the raising of roots for feeding to stock, particularly the Carrot and Mangold-wurtzel, has led us to write this treatise. We have endeavored to follow the manner presented in our other works, and give that minuteness of detail in every step of progress, from the seed to the matured crop, that is generally desired by the public. While this work is more particularly intended for persons of limited experience, yet it gathers up so much of experience and observation, covering so much ground in the growing and handling of these two standard crops, that we should be disappointed if about every grower did not find within its covers some facts of more value to him than the cost of the

We offer the following list of works, all by authors of high repute, any of which will be sent postpaid to any address in the United States, Canada, or British Provinces, on receipt of price.

United States, Canada, or British Provinces, on receipt of price.

Alfalfa; by F. D. Coburn. Its growth, uses and feeding value. \$0.50

Webb's Cape Cod Cranberries. By a Cape Cod Man	.25

# JAMES J. H. GREGORY & SON, MARBLEHEAD, MASS.

TO OUR PATRONS. Our customers will please notice that our prices are by mail postpaid by us, or by express (or freight) at purchaser's expense for charges, the seed sent by express or freight being 8 cents less per pound than when sent by mail. Some may not be aware of the fact (this does not apply to goods sent by express) that the freight on one hundred pounds of merchandise does not, as a rule, cost more than ten pounds or less. When not ordered by mail, it is desirable that customers should indicate whether they wish their seed sent by express or freight; when no preference is given we will use our best judgment

in their behalf. We make no charge for boxes or packing. SPECIAL NOTICE. We have thought that the season of 1902 could not be equalled, but we regret to have to make record, that owing to the remarkably low temperature of the past season, to the remarkable drought of last spring (in some sections over fifty days without rain) and the equally remarkable wet, cold spell which followed, the corn crop, the bean crop and all vine crops, which include those of the cucumber, squash, and melon families, were so poor that they averaged even worse than that of the previous season, which had been about the worst in our experience during a period of over forty years. As a consequence these varieties of seed are consequently exceptionally scarce and high priced, some of them being such an utter failure that we have been obliged to drop them from our catalogue. We must draw what comfort we can, brother farmers, from the fact that while two excessively cold seasons following each other is exceedingly rare, three consecutive ones were never known in recorded history. We can reasonably therefore anticipate a great change for the better with the coming season.

## THE SENIOR PARTNER HAS A WORD TO SAY.

BROTHER FARMERS:—Over 60 years ago, when quite a youngster, marketing with hand carriage from house to house in my native town the first tomatoes ever seen there; as far back as I can remember, having always (with the exception of my college days and four years spent in teaching) a garden in which was raised market garden crops, and in later years working side by side with a father who was one of the best informed horticulturists of his day, and learning from him all that was to be learned in the nursery business; 56 years ago having a nursery of my own, in which I, personally, did all the buying and selling; 48 years ago in the poultry business, so far that I imported two breeds from England; and now for nearly 50 years in the seed business, in the early days of which, with the exception of ploughing the land, I, personally, worked in every department, from raising the seed stock and seed to the threshing, cleaning and marketing it, with such antecedents, I hold that I have earned the right to address my fellow farmers as "brothers!"

Free Seeds.-With average orders for years we have practised dropping in an extra package of some nice variety, very likely a novelty, which we would be pleased to have our customers test and report on.

Testing Seed.—Before sending out, nearly two thousand tests of the vitality of both vegetable and flower seeds are made every season, and thousands of dollars' worth thrown away, all of which is more or less good, but not up to the standard for honest seed.

Orders promptly filled as soon as received, or will be promptly acknowledged by postal card, should there, for any reason, be a delay of a day or so in their filling.

All roots, bulbs, etc., intended for seed purposes, are selected with the utmost care.

The Three Warrants,—All seeds sent out from our establishment are always sold under our three warrants: viz., 1st. That our seed shall be what it purports to be: so far as that we hold ourselves ready to refill the order anew, or to send other seed to the same amount, gratis, should it prove defective in any respect. What is there to gain by selling poor seed after having made this warrant? 22d. That all money sent for seeds over one dollar shall reach us if sent by Post-Office Order on Marblehead, Express Money Order, Registered Letter, Draft, or Cashier's Check. Sums of one dollar and under may be sent at our risk. 3d. That the seed ordered shall reach every one of our customers. Thus we warrant everything but the crop.

purchased at our expense, the cost being deducted from the amount remitted. Occasionally a customer remits more or less than sufficient to pay for the seed ordered. In the former case the balance will be returned to his address; in the latter, the order will be filled out as far as the money goes. Always send stamps instead of specie. Let us advise our friends, before ordering their seed sent by express, to figure carefully and see if it would not be much cheaper for them (as is almost invariably the case with small parcels) to have them sent by mail. We would advise our customers not to order their seed C. O. D., particularly when the orders are small, as we have to add the cost of collection and return charges to the cost of the seed to make ourselves whole.

All Packages, Ounces, Quarter Pounds, Pints, and Quarts ordered at mail prices named will be mailed by us postpaid. Where quarts or pounds are ordered to be sent either by freight or express, as our tables show, we make a deduction. Pecks, bushels, and larger lots we deliver to express or railroad offices free of charge, leaving the charges per express or railroad to be paid by the purchaser.

We have arranged with the American Express Company to receive orders for anything in our catalogue at any place where that company has an agency. They will advance us the cost of all goods up to \$5, and collect it of you. For bills over \$5 an Express Money Order can be sent with order for

Reduced Express Rates. By special arrangement with all the express lines in the United States and Canada, in the traffic agreement, seeds and plants are now carried at the reduced rate of 20 per cent, less than merchandise rates, when payment is guaranteed by us. Our customers will find these reduced express rates almost as cheap as freight on small quantities.

We can now bill goods per B. & M. R. R. at one rate from Marble-head to about all points in New England.

PBE CAREFUL TO WRITE YOUR ADDRESS IN FULL, GIVING YOUR NAME, POST-OFFICE, COUNTY AND STATE. Who belongs to the no name series? For two months of our last year's seed season we averaged three letters daily without signatures. A word to the wise is sufficient.\_#

Now and then, though rarely, there happens an instance of a mail package being lost in transit. When writing of any delay in time of package reaching you, always repeat your first order.

Payment for Seed.—Cash (as above) to accompany all orders. When it is necessary to enclose postage stamps be sure not to moisten them in the least: the higher denominations, but not above fifteen cents in value, preferred. Money orders, when of the value of one dollar and upwards, may be

# AS TO DISCOUNTS.

Some of our customers may be surprised to find the cash discounts on large purchases omitted in the present catalogue. After thinking the matter over a long while, it has appeared to be wise to follow the course now generally pursued by nearly all the leading seedsmen of the United States, and drop these special discounts. Among other reasons, from the fact that they are confusing to more or less of our customers, while they add extra work to our over-burdened clerks amid the hurry and drive that always accompany the seed season. As a substitute, we have dropped, more or less, the prices of many of the varieties catalogued (corn, beans, cucumbers and melons, this season, excepted,) for the general benefit of all; and our prices can now be more fairly compared with those of the reliable class of our fellow seedsmen. We are still ready to sell to large market gardeners at market gardeners rates. We invite comparison between our prices and those of any first-class seedman, with the exception of some varieties of onion seed which are New England grown, of which for years we have made a specialty.

On	package	s and	ounces	of	vegetable	seeds,	customers	sendin	g \$1.00	may	Belect	seed	s to	the	valu	e of	\$1.25

Terms to dealers, clubs, grangers and large market gardeners given on application.

# JAMES J. H. GREGORY & SON'S NOVELTIES IN VEGETABLE SEEDS FOR 1904.

For nearly forty years our experimental grounds have been one of the most interesting portions of our farm. Here everything obtained in this country or imported by us as new is tested to determine whether it be desirable as well as new; we follow their development, note book in hand, several times during the growing season. If the variety tested is better in any respect to that which we already have, or is a decided and interesting novelty, it is in due time catalogued. We find but a fraction of what is grown in our experimental grounds worthy of cataloguing, and what we do present to our customers can be relied on to be worthy of cultivation as far as personal experience under the conditions we can control can determine.

# GOLDEN CARMINE PODDED HORTICULTURAL POLE BEAN.

This new bean will win ket gardeners from its sinconsider, the brightest crimlow ground: Then consider and very productive, and extra large, and in what pole sirable combination for mar-

great popularity among margular attractiveness. Just son stripes on a golden yelalso that it is a robust grower once more that the pods are bean can we find such a deket purposes? Those who

have tried it are exceedingly pleased with both its quality and brilliant appearance. Per quart, postpaid, 90 cents; per package, 15 cents.

# WATERMELON. FERRY'S ICEBERG.

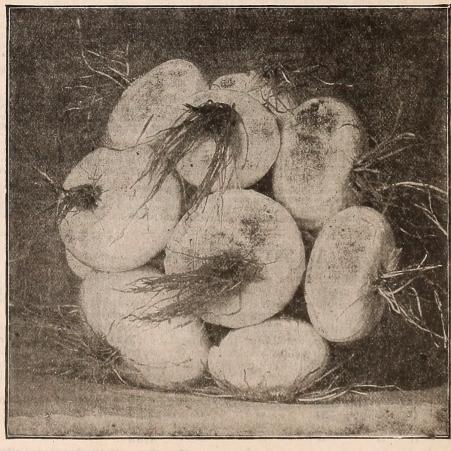

"In general shape, size and appearance, this is similar to the well-known Kolb's Gem, but is distinctly darker, and the skin where the melon rests on the ground is rich yellow instead of white as in that variety. It has a very firm, hard rind and is quite as good a shipper as the Kolb's Gem, but the flesh is much deeper colored, extends nearer to the rind, is much more tender and sweet. We think this variety is much the best dark colored shipping melon yet produced, and that as soon as known it will take the place of those now used for this purpose." We quote Mr. Ferry's description of his new melon, which appears to be a decided improvement over some of our present standard sorts. Per pound, postpaid, \$1.00; per 1-4 pound, 30 cents; per ounce, 15 cents; per package, 10 cents.

# CARTER'S EARLY MORN PEA.

An English firm introduces the new pea as "the very best first early wrinkled pea in cultivation." They say, "customers who grew it were often so pleased with the product that instead of waiting to tell us so they called at our establishment with specimen pods." Tested in our experimental ground the past season it proved to be a very early dwarf sort, bearing lots of dark green pods as large as those of Gradus. It gave satisfaction for three reasons: 1st, the size of the pods; 2nd, its splendid cropping quality, and 3rd, its earliness. We would advise our customers to give this new pea a trial, on a small scale it may be at first, for it will be very likely to replace the Advancer. Per quart, postpaid, 75 cents; per package, 15 cents.

# New Hardy Winter Onion. -- The Vangirard.

If this new white onion does as well generally as it has done on our own ground, as far north as central Massachusetts, it will sound the death knell of onion setts, for who will be likely to be at the great expense of buying and the costly labor of planting out onion setts when they can obtain better results by planting the seed of a variety in midsummer or early fall which is so hardy that it will live over winter in the open ground without any protection, and will start as early as frost leaves and produce early bunch onions a fortnight earlier than they can be raised from setts? Think of the great difference in cost between buying 10 bushels of setts at the cost of 50 dollars and the expense of handling one by one and setting out, which involves several

days of quick, back-breaking work, while on the other hand there is only the cost of four pounds of onion seed!!! The expense for manure and the preparing of the ground the same in either case. The Vangirard makes very few seed shoots. Price, per pound, postpaid, \$2.58; per 1-4 pound, 75 cents; per ounce, 25 cents; per package, 10 cents.

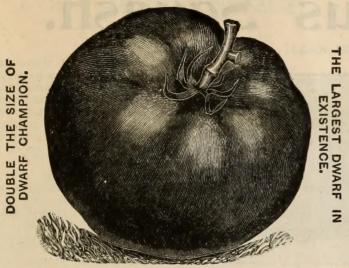

# DIRECTIONS FOR CUL-TIVATION.

If to remain as sowed plant as early as September 7; if it is intended to transplant then as early as July 7, and transplant about six weeks later. If to remain as planted then thin to two inches apart. Be sure in either case to manure as liberally as for transplanted sets. Price, per pound, post-paid, \$2.58; per 1-4 pound, 75 cents; per ounce, 25 cents; per packet, 10 cents.

# THE BEST OF ALL HEDGE PLANTS.

The Arbor Vitae is the hardiest and best of all shrubs for hedges. We have made arrangements with a nurseryman who makes a specialty of these to supply our customers with plants sent directly from the nursery, express or mail, prepaid, at the following exceedingly low figures:

# LIVINGSTON'S DWARF STONE TOMATO.

Another splendid new variety from Livingston. This is what he says of it: "The same sort of tomato as Dwarf Champion, but the vine is of stronger growth, and the fruit is double the size. It is equally early, is equally prolific, and averaging double the size will bear double the crop. The shape of the fruit is perfect. It is very solid, ripens very evenly and is of excellent quality. The vines admit of planting half as near again as the common sorts." Price, per 1-4 pound, \$2.00; per ounce, 60 cents; per package, 15 cents.

# EARLY GIANT ARGENTEUIL ASPARAGUS.

This very handsome variety, obtained by selection from seedlings of the Giant Dutch Purple Asparagus, forms the greater part of those fine bundles which are so much admired in the Paris markets in the spring. The shoots are notably thicker than those of the parent plant, the head is slightly pointed, and the scales with which it is covered are very closely set, overlapping each other. It has become very popular among market gardeners who have made trial of it on a large scale. Price, per pound, postpaid, \$1.00; per 1-4 pound, 30 cents; per ounce, 15 cents; per package, 5 cents.

# BRONZE POP CORN.

Those who make a business of raising pop corn by the acre in New England, have uniformly, as far as our observations have extended and inquiries reached, settled on the bronze variety as by all odds the best for popping purposes and the most profitable to raise, it being a fine cropper and reliable for ripening. We offer pure seed, selected by a reliable grower. Price per quart, postpaid, 55 cents; per package, 10 cents.

# The Fordhook Famous Cucumber.

Though we have not as vet had a test of this new applicant for public favor on our experimental grounds, the recommendations of those who have made trial of it are so emphatic we must make a place for it among our worthy specialties. The introducer speaks of it in this wise: "Vines produce an enormous crop, being of unusually vigorous growth. Perfectly smooth and very dark green, the handsome fruits measure twelve to eighteen inches long; they are always straight—never turn yellow, and are extra solid. The beautiful white flesh is firm, crisp and of most delicious flavor. The flesh seems to be all there is of the cucumber, as the seed space is extremely small. Is sure to supersede soon all other types of the popular small. Is sure to supersede soon all other types of the popular Long Green Cucumber. Try it! Gardeners everywhere will want this most handsome of all table cucumbers, both because they will bring an extra price on market, and are of the white spine type (long remaining deep green), and because the vigorous vines are so very productive.

Mr. T. H. Smallwood, of Emden, Ill., raised 1261 from seven Miss Lizzie C. Packer, of Brooklyn, Pa., raised sixtyseven bushels from ten hills, ranging from nine to twenty-one inches in length. M. S. Marsden states: "In the thirty years I have been in the business this is by far the most productive and finest cucumber I have ever grown. I easily got double the usual price for them." Mr. Ritter, of Medina, Ohio, states: "The vines are unusually vigorous, and produce a remarkable crop of most beautiful and best long cucumbers." Joshua F. Crowell, of West Yarmouth, Mass., states: "The fruits are more uniform, smoother, larger, firmer and crisper and command a better price than any other variety." Price, per 1-4 pound, postpaid, \$1.50; per ounce, 50 cents; per package, 15

# Watermelon, Monte Cristo or Kleckley's Sweets

We introduce the new melon as a splendid sort for home use or near markets, as the flesh is so tender it won't bear even a light jar without bursting open. Vine vigorous and productive; fruit of medium size, oval; color, dark mottled green in two shades, forming indistinct stripes; flesh very bright, rich red and exceedingly sweet. Per pound, postpaid, \$1.00; per 1-4 pound, 30 cents; per ounce, 15 cents; per package, 10 cents.

# JAPANESE FERN BALL. (New.)

For the Window, Drawing Room, or suspended from Chandelier, over Dining Table, or for Fern Dishes. The Finest Decorative Plant yet Introduced.

This little beauty is an importation from Japan, and is certainly the finest addition to the Fernery yet introduced. The Ball is composed of the Japanese Inland Fern Roots, known as Davallia Bullata, var. Nagaha, and Spahngum Moss, and so constructed as to send out leaves of beautiful emerald green from every point. All who see it are delighted, and want it, and up to the present time the supply has not been equal to the demand. While we hope to be able to fill all orders for the coming season, we advise getting in orders as early as possible, as they will be filled in the same order as received. This little beauty is an importation from

These Fern Balls are more handsome than palms for decorative plants, and are much easier grown.

Fern dishes are generally an expensive luxury. The Japanese Fern Ball will make two fern dishes of the finest kind. Cut the ball in

two, and place the top and bottom in dishes, flat side down, and keep dampened. They will grow rapidly and will be an ornament to any room.

Directions. — Place ball in water for several hours and then suspend in any desired position; repeat every two days until growth has started, after which water occasionally as required, being careful that it does not become dry. The greater the growth the more water will be required to keep the ferns in a flourishing condition. To use in fern dish cut ball in halves, placing flat side down, thus getting two dishes of beautiful ferns. The Fern Ball may be allowed to dry up at any time and be set away and started again by watering as before.

The Fern Ball will be from 1 to 4 weeks in starting, according to degree of heat and mois-

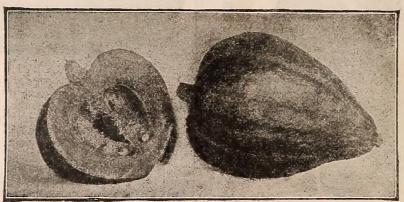

starting, according to degree of heat and mois-nure. Do not expose to direct rays of sun. Ready in December. Price, postpaid, 72 cents;

per express, 60 cents.

# The Delicious Squash.

(NOVELTY OF 1903.)

If any one asks why we to our new squash (it is the duced) our answer would be tive most frequently used by press opinions of its quality. of the work of years in careful ing. The Faxon was our startety we ever knew enters into least desirable of which were the large Brazilian blue variyears engaged in weeding selecting by the test of cookclass bearing a green color, Hubbard. From the resultselecting each season for our ed specimens and the very result is a squash that by the who have tested it, in quality

ing cross we have been seed stock the thickest meatbest for quality. The final universal agreement of those surpasses every one of the fine varieties we have from time to time introduced (these include the Hubbard, Marblehead, Butman, Chestnut, Warren, Victor and Golden Bronze) not even excepting the Hubbard itself as it was a quarter of a century ago when at its best. In form the Delicious ranges between the two examples given above. Its color is almost uniformly of a green shade, with occasionally a blue specimen, it being just about as pure in this respect as was the original Hubbard. If any yellow squash appears it will almost always be found to have come from seed in the manure. In our own crop of the present season of between three and four thousand squashes there were but a dozen yellow ones, and most of them could be traced directly to seed in the manure. In size it also closely follows the original Hubbard, which weighed between five and ten pounds. In thickness of flesh it surpasses every other variety; the color is a dark orange. For table use no squash compactness of grain, dryness, sweetness and compactness of flavor. It is a fall and winter squash, being excellent at all seasons though at any time excellent does not except the late in fall and cords winter. When hat half all seasons, though at any time excellent, does not acquire its best quality until late in fall and early winter. When but half grown it will be found to surpass in quality most varieties when fully ripe. The best specimens will be found equal to other squashes that have had the addition of sugar, eggs and milk and been made up into a squash pie! Note the testimonials given

relative to this.

"I ate of the Hubbard away back when it was first introduced, but the Delicious is finer grained and more delicious than the Hubbard ever was."—MRS. E. B. K. GRIFFITH, Malden.

"I never before ate so fine a squash."—PROF. S. T. MAYNARD, Agricultural College, Amherst, Mass.

"It is remarkably dry, sweet and delicious."—PROF. JOSEPH B. LIND-SEY, Agricultural College, Amherst.

"I never tasted anything like this in the squash line, and I have eaten some good squashes."—L. B. FARWELL, Clinton, Mass.

"The best squash by all odds that I have eaten for many a day."—MR. ROBERT MANNING, Secretary Massachusetts Horticultural Society.

"It proved to be the sweetest and dryest squash we had ever tasted."—MRS. A. E. WHITAKER, one of the editors of the New England Farmer.

"Your new winter squash makes the best table dish of any variety of this vegetable that I ever tasted."—HERBERT MYRICK, editor of American Agriculturist. Agriculturist.
"Certainly the best squash I ever tasted."—MISS HARRIET G. COUR-

TIS, Salem.

We consider the people of Marblehead the best judges of quality of squash of any community in the United States for the reason that they are the first to test all the varieties that we have introduced, and that for years before they were sent

out. For these reasons we give their judgment on the Delicious inextenso.

"It is delicious; finer grained and richer flavored than the old Hubbard was at its best."—MR. JOHN CHAPMAN.

"It is what I call delicious."—MR. SAMUEL K. PROCTOR.

"If I had not known to the contrary, should think it had been sweetened, and it is as dry as a baked chestnut."—Mr. REUBEN NICHOLS.

"Finer grained than the old Hubbard, and remarkably sweet."—MR. WM and it is as dry as a baked chestnut."—Mr. REUBEN NICHOLS.

"Finer grained than the old Hubbard, and remarkably sweet."—MR. WM.
H. CASWELL.

"Decidedly the best squash I have eaten this season; the grain so fine and the quality so rich."—MR. FRANK E. CONLEY.

"Finer flavored and every way better than the old Hubbard ever was."—MR. B. FRANK MARTIN, Postmaster.

"Richer than the Hubbard was when it was in its prime."—MR. STEPHEN C. P. TREFRY.

"The best squash I ever ate; one to be helped twice to."—MISS H. P. PRITCHARD.

"This squash is better than the Hubbard over was."

"This squash is better than the Hubbard ever was."—MISS ELIZA H. RAMSDELL.
"Delicious! I never tasted so nice a squash."—MISS L. COFFIN.
"Better than the Hubbard."—MR. FRANK BROUGHTON, Sec. Y. M. C. A.
"The old Hubbard was a most excellent squash, but this surpasses it."—

"I have tasted your new squash and must say that it is superior to the Hubbard in every respect, finer meated, finer flavored, and in my judgm nt the best squash I have ever had the pleasure of tasting."—MR. LINUS DAR-LING, editor Massachusetts Ploughman.

"We think in some respects it surpasses the Hubbard when in its best estate, especially in fineness of grain and delicacy of flavor."—LUTHER TUCKER & SON, editor of Country Gentleman.

Says MRS. BUSHAW, of Middleton.—"It tastes just like a nice squash pie."

"Never put my tooth into such a squash before."—MR. NAT. SNOW.

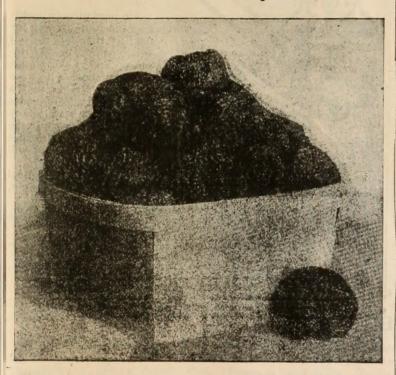

"I had come to the conclusion that I should never again eat a squash equal to the old Hubbard, but must acknowledge that your new squash to my taste is not only equal to but is superior to it."—MR. THOMAS SWASEY.

Price per pound, postpaid, \$3.08; per 1-4 pound, \$1.00; per ounce, 40 cents; per package, 10 cents.

# SNOW=FLAKE BEAN.

We are happy to be able to inform the many customers, whose remittances we were obliged to return last season because of the exhaustion of our supply, that we have an extra large stock to offer this season, and trust to be able to fill all orders for this extra early and remarkably prolific white field bean. Please see page 32 for cut and description and page 38 for full prices.

# The Commonwealth Strawberry.

Last July, when the strawberry season was about over, Mr. William H. Munroe, of Beverly, Mass., invited us to call and see a new strawberry that he had originated, which he had called the "Commonwealth." Though so late, we found the crop was just in its prime. We found a sight worth going many miles to see. The berries were enormous in size (14 of them filled a quart box) while the crop was a sight to behold. The berries were generally symmetrical in form, of a rich, dark color, and solid to their centre, and their quality was good. The plant, though not so rank as the Marshall, is a strong grower, hardy, showing no sign of ruct, while the new plants set at just about the showing no sign of rust, while the new plants set at just about the right distance to crop well. It is a strong, staminate variety. Mr. Munroe has been originating new seedlings for many years, but this is the only one he has been fully satisfied with. In competition with the Marshall and other standard kinds it has twice taken the first prize at the exhibitions of the Massachusetts Horticultural Society. If there are any two men in the United States who ought to know a good strawberry when they see it, they are Mr. Benj. Smith, who originated the well-known Beverly, and Mr. George Pratt, original introducer of the famous

Mr. Smith writes of the Commonwealth: "For the past two years I have watched Mr. Munroe's new seedling, and for size, productiveness, quality and lateness, I consider it a wonder."

Mr. Pritt writes: "The Commonwealth, in my opinion, is the best thing in the strawberry line ever put upon the market. It is as productive and large as the Sample, and certainly a week later in ripening. Flesh very firm."

We might add to these recommendations, but we think these two, from men of such experience and calibre, are enough to satisfy any old strawberry grower of the great merits of the Commonwealth. Price, per dozen, \$1.00; per 100, postpaid, \$6.00; 100, per express, \$5.70.

# LESTER LOVETT STRAWBERRY.

Here we appear to have a first-class late berry. Its introducer, Mr. Lovett, states that it is ten days later than Sandy or any other variety in cultivation. The plant is simply mammoth, with stem over a foot long, the leaves measuring nine to twelve inches across. Entirely free from rust, with perfect blossoms. An enormous cropper, the fruit exceedingly firm, rich. sweet, with a delightful aroma." Price, per dozen, postpaid, 40 cents; per 100, postpaid. Price, per dozen, postpaid, 40 cents; per 100, postpaid, \$1.25; 100, per express, \$1.00.

# EXCELSIOR STRAWBERRY.

One of the most extensive dealers in the United States says of the new strawberry: "I paid the first year in the neighborhood of \$100 per thousand for my plants, and had I known half as much of it as I do now I would have bought all the plants there were even at a higher price. It is the earliest berry I have ever grown, three or four days earlier than Miichel's Early. From a field of eleven acres, that had no special care or manuring beyond 1000 pounds Mape vine fertilizer, I picked last season 55,902 quarts. For next season I shall plant eighty acres of this variety alone." I think we must all agree that this strawberry man must really mean what he says when he praises the Excelsior. It has Wilson Albany in its blood but "is twice as vigorous and healthy, twice as productive and equally as firm," which means it will stand transportation to a distant market. As it makes many vines the plants should be set about half as far again as usual apart. Price, per dozen, postpaid, 40 cents; per 100, \$1.25; 100 per express, \$1.00.

# 20th CENTURY DAHLIA.

This is very generally acknowledged to be the greatest advance made of late years in the single Dahlia class. Wherever exhibited, it mattered not how many other choice varieties were on the exhibition tables, the 20th Century always had a crowd about it, and became the centre of all eyes. Of the thousands of varieties growing on the extensive Dahlia plantation of Mr. Peacock, the great Dahlia specialist, he states that the 20th Century was selected by every visitor as the most beautiful and striking variety. It has won the silver medal of the Pennsylvania Horticultural Society and first awards everywhere. At the great annual flower show of the Massachusetts Horticultural Society the past season, its rich beauty made it the centre of attraction. The plant is a strong, vigorous, sturdy grower, of branching habit, growing about 5 feet high. It is a very early bloomer, and continues a mass of bloom until killed down by frost. The flowers are very large, 4 1-2 to 6 inches in diameter, sometimes reaching 7 inches; of perfect form and exquisite finish. The color is intense rosy crimson, with white tips and white disc around the yellow centre. A superbly beautiful and striking flower. As the season advances, the dark-colored zone becomes lighter and the color contrast exquisitely lovely, and can be compared with no other flower than the beautiful orchid. The color of 20th Century does not fade or change like many other flowers, but it is a case where each succeeding flower opens lighter and lighter as the season advances. The deep colored zone gradually becomes lighter until September, when it is a beautiful pure pink; toward October this zone becomes delicate pink, and in October the flowers are pure white, delicately suffused blush pink, as shown in the photograph of a field view taken last October. One of the greatest merits of this flower is the fact, as described above, that every week we really have a new flower. The past season the cut flowers of the 20th Century sold in the open market at a higher price than th

## ITALIAN SWEET PEPPER.

The Italian colonies living in New England have had among them for years a favorite sweet variety of pepper raised from seed brought with them from their native country. We obtained from one of them last spring a few seeds of the variety and from them raised a small quantity which we can offer by the package only. This pepper is one of the sweet class, of large size, prolific and shaped much like Ruby King but not quite so oblong and larger in diameter. Per package 15 cts.

# RECOMMENDATIONS.

Darius Weekes, Cuttyhunk, Mass., writes: "From two hills of your Warted Hubbard Squash I raised 16 squashes that weighed 285 lbs. My friends found them fine in quality."

O. S. Robson, Halls Corners, N. Y., writes: "Transplanting plants of your All Seasons Cabbage the last week in June, we began cutting heads from them the first week in September. The crop, which were about all good heads, were taken up in time to sow winter rye, which did well."

Mrs. Ruhama Metz., Chambersburg, Pa., writes: "We cannot get beets to take the place of your Fausts. They are always the earliest, largest and tenderest of all."

N. E. Slayton, Mandan, N. D., writes: "Your White Egg Turnips and Budlong Rutabagas are both simply first class in every respect."

C. S. Lloyd, Stanley, N. Y., writes: "The package of Parsnip from you planted twenty rods and then came up too thick."

A. A. Bonney, Woodburn, Pa., writes: "Your Bond's Early Tomato is first class amongst the first earliest."

L. L. Goodell, Brattleboro, Vt., writes: "I have taken four prizes at our Fair here on your Hubbard Squash, which were fine."

Frank H. Snow, Orleans, Mass., writes: "From 10 1-2 square rods I sold \$21.54 worth of Beets, Carrots and Parsnips and had 6 bushels of Beets and 6 bushels of Carrots left."

George B. Howland, East Bridgewater, Mass., writes: "Your Marblehead Early Marrowfat Peas were completely covered with pods. They were a sight to behold."

# The Perfection Currant.

(SEE CUT ON LAST PAGE OF COVER.)

Awarded the Barry Medal, the fifty dollar gold medal of the Western New York Horticultural Society, July, 1901, after three years trial. The first fruit to receive this grand prize for ten years. Also received Highest Award given any new fruit at the Pan-American Exposition.

Color, bright red. Size larger than Fay, with larger bunches having long stems making them easy to pick. A great cropper, being superior to F.y or any other large sort. Quality less acid and better than any large currant in cultivation. A good grower, with foliage remarkably large and healthy. At New York Agricultural College it was tested for three years in competition with sixty varieties and on its general merits came out ahead of all introduced varieties.

"In flavor and quality I consider it distinctly better than Fay or Cherry. In fact I do not know of any other large currant in cultivation that is its equal in this respect. It ripens about with Fay and Cherry. Taking all things into consideration I do not hesitate to pronounce it a most excellent variety for either home use or market."—S. A. Beach, N. Y. Ag. College.

"The clusters and the berries were unusually large and fine, and struck me as being very attractive."—L. H. Bailey, Prof. at Cornell.

"We think you have selected a good name for the currant, as it is about as near the ideal currant as any we have seen."—W. & T. Smith.

"We should regard this as a very great acquisition."—Smith & Powell.

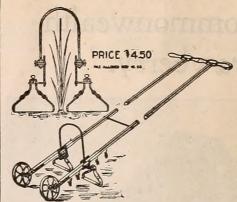

"I have watched your new Currant, called Perfection, with interest, and it appears to me to be an introduction of much value."—Messrs. Elwanger & Barry.

"Its large size, its fine clusters, and its general appearance, permits us to truthfully say that it is worthy of dissemination."—E. Smith & Son.

"It certainly is of fine quality, and a fine bunch and berry."—Storrs & Harrison Co.

Harrison Co.

Price, postpaid, \$1.00 each; six for \$5.00.

# New Eclipse Weeder.

We here offer an invention (on the market for the first time this season) which cannot fail to commend itself to every market gardener. It is so light and simple that a boy can use it; blades which can be set at any distance apart, and the

This machine straddles handle-bar adjusted to height of operator. the row, thereby doing away with one-half the weeding, and will pass clearly even plants up to twenty inches in height.

We give below the testimonial of a very successful practical market gardener, who had one of the Weeders on trial last season,

SWAMPSCOTT, MASS., Aug. 25, 1903.

Gentlemen:—I have used, and had my help use, your Eclipse Weeder, and will say that it is the best tool I have ever seen or used for the purpose of cultivating close sown crops, and will do the work complete from start to finish, which can be said of no other tool made, thus making it a great saver of time and money.

Yours respectfully,

(Signed) George B. Courtis.

Price, per express, at purchaser's expense, \$4.50.

# QUANTITY OF SEED FOR AN ACRE.

Seedsmen vary much in their directions for the quantity of seed to be planted to the acre. In the following list we give the quantities of the more common sorts where first-class seed is used. Of course the poorer the seed the larger the quantity required :-

Dwarf Beans, in drills	I 1-2 bushels
Peas	11-2 "
Beets, in drills	
Cabbage, in hills	8 ounces
Cabbage, in beds to transplant	2
Carrots in drills	1 1-2 pounds
Corn, in drills	o quarts.
Muskmelon, in hills	I I-2 pounds
Mangald Wurtzel in drills	6 " 1
Onions, for bulbs to sell green, or to trace, in drills	6 to 8 "

Onions, for dry bulbs, in drills,	pounds
Onion Seed for Setts, in drills,3	0 ""
Onion Setts, in drills	bushels
Potatoes, in drills, cut, depends on number of eyes	8 to 14 "
Radish, in drills	pounds
Spinach, in drills	o to 15 "
Sage, in drills	1 to 6 "
Squash, running varieties, in hills	2 to 2 1-2"
Tomato, in beds to transplant	2 ounces
Turnip, in drills	
Rye	t > 2 bushels

Amidst great diversity of opinion concerning the quantity of the usual mixture for seeding for hay, we would recommend 1-3 bush. (15 lbs.) of Timothy, 9 lbs of clean Red Top, and 5 lbs. of Red Clover per acre.

#### COLD FRAME AND HOT-BED.

Early tomato plants in a small way may be raised in flower pots or boxes in a warm kitchen window: so also may egg plants and peppers. When raising them in the house, the pot or box containing the seed should be placed quite near the stove for a few days, and the soil be kept well moistened until the plants begin to break ground, when they may be removed to a warm window. It is best, if practicable, to have but one plant in each pot, that they may grow short and stocky. If the seed are not planted earlier than the 1st of April for out-of-door cultivation, a cold frame will answer. Select the locality for the cold frame in the fall, choosing a warm location on a southern slope, protected by a fence or building on the north and northwest. Set posts in the ground, nail two boards to these parallel to each other, one about a foot in height and the other towards the south about four inches narrower; this will give the sashes resting on them the right slope to shed the rain and receive as much heat as possible from the sun. Have these boards at a distance apart equal to the length of the sash, which may be any common window sash for a small bed, or the length of a usual gardener's sash. If common window sash is used, cut channels in the cross barsto let the water run off. Dig the ground thoroughly (it is best to cover it in the fall with litter to keep the frost out), and rake out all stones or clods; then slide in the sash and let it remain closed three or four days, that the soil may be warmed by the sun's rays. The two end boards should rise as high as the sash to prevent the heat escaping, and the bottom board of a small frame should have a strip nailed inside to rest the sash on. Next rake thoroughly in guano or phosphate or finely pulverized hen manure, and plant in rows three to six inches apart, depending on whether the plants are to be allowed to remain or are to be transplanted; if the latter, then three inches will be sufficient distance. Thin out the tomato plants when quite small, but allow peppers to re

about the close of May, just before the more tender varieties are set in open ground, allow the glass to remain entirely off both day and night, unless there should be a cold rain. This will harden them so that they will not be apt to be injured by the cabbage beetle, as well as chilled and put back by the change. If the tomato plants have been well hardened, the stalks will be of a red color. Should the plants be getting too large before the season for transplanting, they should be checked by drawing a sharp knife within a couple of inches of the stalk. If it is desirable to dwarf the tomatoes and thus force them into a compact growth, transplant into another cold frame, allowing each plant double the distance it before occupied.

The structure and management of a hot-bed is much the same as that of a cold frame, with the exception that being started earlier the requisite temperature has to be kept up by artificial means, fermenting manure being relied upon for the purpose, and the loss of this heat has to be checked more carefully by straw matting, and in the far North by shutters also. The front and back are also made higher than in a cold frame.

Horse manure with plenty of litter and about quarter its bulk in leaves, if attainable, all having been well mixed together, is thrown into a pile, and left for a few days until steam escapes, when the mass is again thrown over and left for two or three days more, after which it is thrown in the pit (or it may be placed directly on the surface) from eighteen inches to two feet in depth, when it is beaten down with a fork and trodden well together. The sashes are now put on and kept there until heat is developed. The first intense heat must be allowed to pass off, which will be in about three days after the high temperature is reached. Now thrown on six inches of fine soil, in which mix a very liberal supply of well-rotted manure free from all straw, or rake in thoroughly superphosphate or guano, at the rate of 2,000 pounds to the acre and plant the seed as in cold

# NOVELTIES IN PLANTS FOR 1904.

STOKESIA CYANEA.

rists. Single bulb, 10 cents; 12 bulbs, \$1.00; per 100, \$7.00.

#### Tritoma.

Tritomas, Red-hot Poker's Flame Flower, or Torch Lilies. Brilliant showy, plants coming rapidly into favor for beds and in mixed borders. Hardy if given the protection of a few inches of leaves or litter.

Tritoma Pfivzerii (The Ever-blooming Flame Flower). The freest flowering variety in cultivation, with spikes from 3 to 4 1-2 feet high and heads of bloom over 12 inches long of a rich orange-scarlet, shading to salmony-rose at edges, producing a grand effect whether planted singly in the border, in masses, or beds of a dozen or more.

15 cents each; \$1.50 per dozen.

Tritoma Coralina. A dwarf variety, rarely exceeding 2 feet, producing freely medium-sized spikes of coral-red flowers, shading to yellow. 15 cents each: \$1.50 per dozen.

# Stokesia Cyanea.

The Cornflower, or Stokes' Aster.

A charming and beautiful native hardy plant. The plant grows from 18 to 24 inches high, bearing freely from early in July until late in October its handsome lavender-blue centaurea-like blossoms, which measure 4 to 5 inches across. It is of the easiest culture, succeeding in any open, sunny position, and not only is it desirable as a single plant in the hardy border, but it can also be used with fine effect in masses or beds of any size. Price, 15 cents each; \$1.50 per dozen.

# Groff's New Hybrid Gladioli.

[Cut on 4th cover page.]

Winners of sixteen first awards at Pan-American Exposition, Buffalo, N. Y., 1901. Mr. Arthur Cowee, who makes a specialty of Groff's New Hybrid Gladioli, is undoubtedly the world's great Gladioli grower. The present season he had 75 acres devoted to them, from which he gathered 10,000 bushels of bulbs. These wonderful Gladioli were one of the chief attractions of the Pan-American Fair at Buffalo. Those who saw the exhibit, small in number though it was

the exhibit, small in number though it was, at the annual exhibition of the Massachusetts Horticultural Society at Boston, need not to have a word said in their praise, for it was a revelation of a beauty never before thought possible. People were thrilled with surprise at the splendor of the sight. We believe the public will be greatly the gainers by our cataloguing some of these magnificent hybrids in our list of the present season. present season.

Groff's Gold and Silver Trophy strain, that won the first award at the great Buffalo Ex-position. Single bulbs, 12 cents; per dozen, \$1.20; per 100, \$8.00.

Groff's Popular Strain, which won at the New York Exhibi-tion of American Flo-

TRITOMA PFITZERII.

# NOVELTIES IN FLOWER SEEDS FOR 1904.

# SILENE PENDULA Double "BIJOU."

# Nasturtium Lobbianum Cinabar Red.

Giant Pansy Indigo King. The brightest blue Pansy that has yet been offered. The flowers are of good size and of a vivid true indigo blue color, without any spots or markings, somewhat deeper in the centre, running to a lighter shade in the outer part of

A beautiful and distinct color. Price, per package, 15 cents.

the petals.

Price, per package, 15 cents.

## Silene Asterias Grandiflora.

A beautiful and free-flowering, hardy perennial, forming low bushes of light green lanceolate foliage and throwing up in great profusion upright flower stalks 2 to 2 1-2 feet in height; each stalk carrying a large globular head of crimson scarlet flowers. Blooms early in the spring, making it of great value for cut flowers. Price, per package, 15 cents.

Flowers extra double of a delightful shade of brilliant salmon rose. Like all annual Silenes this new variety can be specially recommended for autumn sowing, as it will then produce a most effective show in the spring garden.

Price, per package, 15 cents.

SILENE ASTERIAS GRANDIFLORA

# NOVELTIES IN FLOWER SEEDS FOR 1904.—Continued.

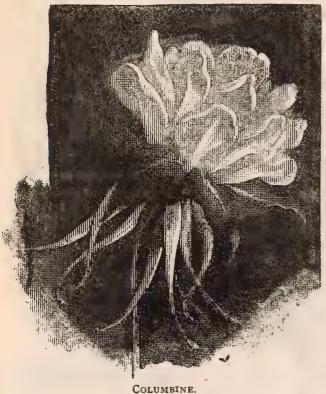

# Asparagus Plumosus Robustus.

A very remarkable variety of the now universally grown ornamental Asparagus. The fronds, which sometimes attain a length of nine or ten feet, are very finely feathered and of the darkest green color. Being of vigorous, robust and uncommonly rapid growth, this new variety yields more sprays for cutting than any other and has the further advantage of being very easily and extensively propagated. Price, per package, 20 cents-

# Chysanthemum "Golden Wheel." (A.)

In this new, pretty annual Chrysanthemum the flowers assume a peculiar form, the quill-shaped ray floret standing out around the disk like the spokes of a wheel. Flowers golden yellow with purple centres.

Price, per package, 15 cents.

# Columbine. Long Spurred Double Flowering Hybrids. (P.)

New double flowering hybrids of the beautiful California Columbine with longspurred flowers. The colors range from

white and yellow to light and dark blue. These beautiful perennials, with their fine foliage and abundance of long-stemmed graceful flowers rising above it, should be more generally cultivated.

CHRYSANTHEMUM "GOLDEN WHEEL."

Price, per package, 20 cents.

# Eccremocarpus Scaber Aureus. (A.)

A favorite annual climber which, because of its rapid growth and profusion of bloom, does excellent service in covering walls, trellises, etc. A specimen with its garland-like foliage, often running to a height of sixteen feet and covered with a wealth of yellow blossoms, is indeed a beautiful sight.

Price, per package, 15 cents.

A charming vigorous annual, with long-spurred, snapdragon-like flowerets growing in bunches. The plants are completely covered with blossoms almost hiding the foliage,

and, as they grow very evenly to about twelve inches in height, are fine for beds and borders. Cut flowers keep fresh in water for

Price, per package,

Bride Atropur-

The plants grow about twelve inches in height, forming pyramidal-shaped bushes literally covered with beautiful large flowers. The flowers are exquisitely marked, and range in all shades from white to pink and blue, beautifully spotted with red, yellow, brown or purple, thus producing a most charming effect.

Price, per package, 15 cents.

Mourning

Very fine double purple black flowers, some measuring three inches across.

purea "Othello."

Price, per package, 15 cents.

NEW DWARP SCHIZANTHUS.

JAMES J. H. GREGORY & SON'S RETAIL CATALOGUE.

# VEGETABLE NOVELTIES AND SPECIALTIES OF PREVIOUS YEARS.

For Prices in full per Bushel and Pound and fractions thereof see pages 38-51 inclusive.

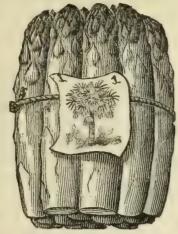

# ASPARAGUS.

For Asparagus Roots see Page 51.

# PALMETTO ASPARAGUS.

This variety has the reputation of being less subject to blight than other varieties.

"Until we found this new Palmetto asparagus," writes a prominent seedsman, "'Conover's Colossal' had always been the leading sort, and justly so, but when we state that the Palmetto is not only much earlier, but it is also a better yielder, and it is more even and regular in its growth, than Conovers, it will be seen, we think, that it must eventually supplant the old favorite." Price, per pound, postpaid, 68 cents; per I-4 pound, 23 cents; per ounce, 10 cents; per package, 5 cents.

PALMETTO ASPARAGUS.

MOORE'S CROSS BRED.

For twenty years Mr. Moore took first prize on asparagus at the shows of the Massachusetts Horticultural, which proves either that Mr. Moore used extra manure and extra cultivation, or that he had, what he claimed, an extra variety of asparagus. Price, per pound, postpaid, 75 cents; per 1-4 pound, 23 cents; per ounce, 19 cents; per package, 5 cents.

COLUMBIAN MAMMOTH WHITE.

A variety of asparagus which is sure to be in great demand in many localities, because it furnishes white shoots which stay white as long as fit for use without earthing up or any other artificial blanching. It can be depended on to give eighty to ninety per cent. white plants from seed. The green shoots can be discarded when setting the permanent bed. Fine for the market gardener or for canning. Price, per pound, postpaid, 68 cents; per 1-4 pound, 23 cents; per ounce, 10 cents; per package, 5 cents.

# DWARF, SNAP OR BUSH BEANS.

For full prices per bushel and peck see pages 38 and 39.
(See Snowflake on Page 32.)

# GIANT STRINGLESS GREEN-POD VALENTINE.

This new variety should not be compared with Burpee's Stringless Green-Pod, from which it is entirely distinct, resembling more closely the Valentine, the pods averaging one-third larger than those of the later variety. As early as six weeks, a little smaller than Stringless Green Pod, which it otherwise resembles, with the advantage of being a better cropper. The plants are of strong growth, very productive; pods five inches long, light green, slightly curved, very meaty, being broadly rounded, saddle-backed and absolutely stringless.

Price, per quart, per express, 35 cents; postpaid, 50 cents;

per package, to cents.

BOUNTIFUL GREEN BUSH.

Let us see what our note book says as to how it deported itself among the fifty-two varieties we carefully tested last season. It reads as follows: "Very early, entirely free from strings, a fine cropper, pod flatter than Stringless Green Pod, a desirable variety." Our field notes are always very brief: we could throw in a good many strong adjectives that would but honestly present the good qualities of this fine new variety.

A G Tillinghest La Comer Wash writes: "Last year we found the

A. G. Tillinghast, La Comer, Wash., writes: "Last year we found the Bountiful B-ans to be the earliest, most prolific and the most tender to cook of any kind in our trial grounds."

Price, per quart, per express, 30 cents; postpaid, 45 cents; per package, 10 cents.

# ROUND POD KIDNEY WAX BEANS.

(Novelty of 1903.)

This is an improved type of the well-known Wardwell's Kidney Wax. It is as early as that variety, a luxuriant grower with pods long, straight and entirely stringless. A great cropper. One of the strongest points is that the pods remain tender even when nearly mature. Price per quart, per express, 40 cents; postpaid, 55 cents; per package, 10 cents.

WARREN BUSH.

After having carefully tested the Warren side by side with scores of varieties, we unhesitatingly pronounce it to be the best of all bush beans we are acquainted with, for table use. The Warren crops medium well, and has a large, green, pulpy stringless pod. When cooked, it has the rich quality that heretofore has been believed to be confined to the best of the pole beans. Price, per quart, per express, 30 cents; postpaid, 45 cents; per package, 10 cents.

## STRINGLESS GREEN PODDED.

We now have the pleasure of cataloguing a green podded dwarf bean, which is absolutely stringless even when the pods are old enough to contain large beans. It has also the recommendation of being one of the very earliest of beans. Pods plump and straight. S. D. Reid, Pidcock, Ga. writes:—"The Stringless Green Podded Beans surpass any bean that I ever grew in size and quality." A first-class cropper. Price, per quart, per express, 30 cents; postpaid, 45 cents; per package, 10 cents

LOW'S CHAMPION BUSH.

This new Green Podded bush bean is well adapted to the table, garden, and market. Being entirely stringless, it is extremely tender, and of exquisite flavor as a string-bean. The pods are large and long in shape, containing from five to eight beans each. Says the originator, "On less than one-eighth of an acre it yielded seven and one-half bushels of clean, hand-picked seed-beans." We have a good supply of them this year. Price per quart, per express, 30 cents; postpaid, 45 cents; per package, 10 cents.

#### DREER'S BUSH LIMA.

This is a much larger bean and of decidedly better qual-

ity than the H e n d erson Bush Lima. The beans are thick and grow closer together in the pods. Plantinrows two and one half feet apart, and have the plants a foot apart in the rows. We find Dreer's to be decidedly the earliest of the two varieties of large Bush Lima. Price, per quart, per express, 40 cents; postpaid, 55 cents; per package, 10

DREER'S BUSH LIMA.

Harlan E. Campbell, Derry, N.H., Writes: "Your Marblehead Early Horticultural Beans and Quincy Market Corn are both very first-class spains."

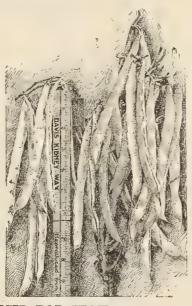

BEANS. -- Continued.

Oran W. Burke, East Kingston, N.H., writes: "My Mammoth Carmine Podded Pole Hort. Beans with their bright pods were a very pretty sight. They are fine."

# DAVIS KIDNEY WAX DWARF BEANS.

The Davis Kidney Wax is a new and distinct kidney variety. The engraving, as shown, is a genuine production from life. The plant is vigorous, of compact, upright growth. The pods are extra long, straight oval, clear, waxy white color and handsome, often growing to a length of seven to eight inches, and when young are quite stringless and of fine flavor. A little stringy as they grow old, but fine eating at every stage of growth.

One of the main points of superiority over other sorts is its extreme hardiness and shipping qualities. This new Bean will be likely to become a popular, standard wax sort. Price, per quart, per express, 35 cents; postpaid, 50 cents; per package, 10 cents.

KEENEY'S PENCIL POD WAX.

Keeney's Pencil Pod Black Wax grows a taller, stronger, and more vigorous bush than the Improved Prolific Black Wax, which is one of its parents. Very early and productive, and destined to become very popular. Price, per quart, per express, 40 cents; postpaid, 55 cents; per package, 10 cents.

## VFULLER BLACK WAX.

The Fuller Black Wax differs from the ordinary Black Wax in the following points. The pod is a little larger, a little longer, a little darker yellow, a little thicker, solid and meaty and at the same time absolutely stringless. Very prolific—vines medium in size. Price, per quart, per express, 40 cents; postpaid, 55 cents; per package, 10 cents.

## CHALLENGE DWARF BLACK WAX.

One of the earliest wax beans in cultivation. As vigorous and prolific as Prolific German Wax Black Seeded; pods as large and of as good color, ripening remarkably uniformly and well together. Price, per quart, per express, 35 cents; postpaid, 50 cents; per package, 10 cents.

# KEENEY'S RUSTLESS GOLDEN WAX.

Keeney's Rustless Golden Wax. All wax beans are more or less subject to rust, which spoils them for market use. Mr. Keeney, the great bean grower, believes he has at last secured a bush variety, a sport from the Golden Wax, that excels all others in its comparative freedom from rust. The pods are entirely stringless. Price, per quart, per express, 35 cents, postpaid, 50 cents; per package, 10 cents

# EARLY CARMINE PODDED DWARF HORTICULTURAL.

There is no bean raised that is earlier than this. While just as early as our Marblehead Dwarf Horticultural, it surpasses it in the richer red color of its pods, most of which are bright red, making it desirable as a market bean. While the common Bush Horticultural is a late bush bean, the Marblehead and the Carmine stand in the front rank of the

earliest sorts. Price, per quart, per express, 40 cents; post-paid, 55 cents; per package, 10 cents.

#### BURPEE'S BUSH LIMA BEANS.

Look ded House like

This is a true bush form of the luscious large Lima bean, coming absolutely true from seed. The bushes grow eighteen to twenty inches high, are stout and always erect, yet branch so vigorously that each plant develops into a magnificent circular bush, from two to three feet in diameter, filled with large pods. Later than Dreer's. Price, per quart, per express, 35 cents, postpaid, 50 cents; per package, 10 cents.

# MARBLEHEAD EARLY HORTICULTURAL.

What would our customers say to a variety of Dwarf Horticultural that, with all the fine traits of that excellent variety, large beans, and large, mostly carmine-striped pods, excellent either for shelling or stringing, there could be added the capital trait of being in the very front rank for earliness? The Marblehead Early Horticultural is one of the earliest beans grown. Price, per quart, per express, 30 cents; postpaid, 45 gents; per package, 10 cents.

## IMPROVED GODDARD DWARF HORTICULTURAL.

Pods of this dwarf variety are large, long, flat, usually curved with long, curved roints; green when young, but as the beans become fit for use are splashed and striped with crimson. Beans very large, splashed with red and of fine quality. Dry beans marked like Dwarf Horticultural and of the same color, but longer and much larger, making them more desirable for market use. Price, per quart, per express, 35 cents; postpaid, 50 cents; per package, 10 cents.

## KENTUCKY WONDER WAX POLE.

(Novelty of 1903.)

The enormous productiveness of the old Kentucky Wonder pole bean is well known. We now introduce a variety having all its superb qualities, except that it is of a beautiful transparent yellow color.

It is a rampant grower, one plant filling a pole with a mass of vines densely loaded with luscious beans, almost a solid mass of pods from bottom to top.

The pods are so fleshy that they are frequently greater in width than breadth. They are solidly meaty, entirely string-

less and when cooked deliciously rich and buttery.

Price, per quart, per express, 40 cents; postpaid, 55 cents;
per package, 10 cents.

# MAMMOTH CARMINE PODDED HORTICULTURAL POLE.

One of our clerks, who visited a large plantation of this new bean in 1893, told us that it was the handsomest sight in beans he ever saw. Thousands of poles were literally covered from top to bottom with its extra large, carmine-colored pods; "painting the landscape red" with their brilliant coloring. Not only are the pods so much richer in color, but both pods and beans are much larger than those of the common kind. Its cropping qualities vary with different soils. Price per quart, per express, 55 cents; postpaid, 70 cents; per package, 10 cents.

# KING OF THE GARDEN LIMA POLE.

The King of the Garden is a vigorous grower, requiring but two vines to each pole. When not too closely planted they set their beans early at the bottom of the pole, producing a continuous bloom and fruitage to the end of the season.

Price per quart, per express, 30 cents; postpaid, 45 cents; per package, 10 cents.

# GOLDEN CHAMPION POLE.

This is the earliest of all the wax pole varieties, has pods as long as the longest, eight inches, which are of a peculiarly rich waxy white color, more so than that excellent variety, the Golden Butter. Price, per quart, per express, 40 cents; postpaid, 55 cents; per package, 10 cents.

# GOLDEN CLUSTER POLE.

The pods enormously large and long, exceeding in size any pole bean cultivated; they are of a fine waxy white, and snap capitally. Price per quart, per express, 35 cents; postpaid, 50 cents; per package, 10 cents.

John Black, Cheshire, Vt., writes: "Your Crosby's
Egyptian Beets were the earliest in our neighborhood and as fine as they were early."

# BEETS.

Clover Crest Garden, Hugo, Minn., writes: "The earliest table beets were the Dirigo and Faust's Crimson. Both are of fine quality and very sweet.

We find this to be as early as Crosby's Egyptian, with flesh as dark as the Edmands, with a more Tops intense red. upright-growsmall, ing, so that the rows may be nearer together; roots globular or ovoid; color of skin dark blood red; very tender crisp, and sweet, and remaining so for a long time. An early beet of the finest quality for either home or market use. Price, per pound, postpaid, 68 cents; per 1-4 pound, 20 cents; per ounce, 10 cents; per package, 5 cents.

We are pleased with the rich crimson color of this beet and were surprised to find that it was one season the earliest in our experimental plot, which included such varieties as Egyptian and Eclipse. We think this is the sweetest of all beets, and a first-class for every one, and of especial value to market gardeners. It is sometimes catalogued as the Mitchell's beet. Price, per pound, postpaid 58 cents; per 1-4 pound, 18 cents; per ounce, 10 cents; per package, 5 cents.

CRIMSON GLOBE.

For an early cop, especially on light soils, the value of this handsome beet will be recognized by every grower. It is a desirable crop in every garden, both for its admirable shape and its high qualities as a vegetable. Its form, which is as round as a Snowball Turnip, and the richer color of the flesh, distinguish this variety from the Egyptian Turnip-rooted Beet. Price, per pound, postpaid, 68 cents; per 1-4 pound, 20 cents; per ounce, 10 cents; per package, 7 cents.

THE LENTZ.

This strain of early turnip beet has a great reputation in the Philadelphia market, it being a great favorite with the prominent market gardeners. On testing it in our experimental grounds, we note that it is early, of a fine symmetrical form, and that it has a remarkably small short top. The flesh is very prettily ringed in color, and its quality is tender and sweet. This beet, as an early kind, will prove popular with market gardeners. Per pound, postpaid, 48 cents; per 1-4 pound, 18 cents; per ounce, 10 cents; per package, 5 cents.

DIRIGO.

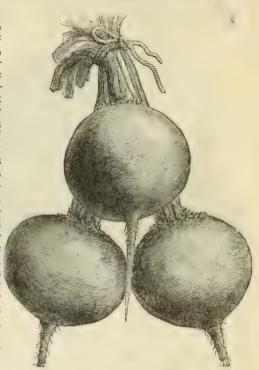

A critical comparison between the Dirigo and Crosby's Egyptian raised side by side is what our customers want, as these two beets are competitors for the early market. The difference between them as they grew on our experimental grounds was: 1st, that the Dirigo was the finest made up beet of the two; 2nd, that it had a smaller top; and 3d, that it was rather earlier than the Crosby. It was the most attractive beet among eleven varieties. Price, per pound postpaid 58 cents; per 14 pound 18 cents; per ounce, 10 cents; per package, 5 cents.

#### GIANT YELLOW INTERMEDIATE MANGOLD.

This variety grows more than half above the ground, and is of a russet-yellow color. It has a thick neck, large leaves with green stems, and a very smooth and fine skin. Flesh white, firm and sweet, much liked by cattle. An excellent root, producing enormous crops, and an excellent keeper. We find in them a little irregularity in shape. Price, per pound, postpaid. 33 cents; per I-4 pound, I5 cents; per ounce, I0 cents; per package, 5 cents.

ECLIPSE BEET.

This valuable beet. of which we were the original introducers, has become a standard variety. George B. Courtis, of Marblehead, a prominent market gardener writes us: "In an experience of fifteen years, I find the Eclipse surpasses all in color, smallness of top and smoothness; and, moreover, it is a splendid crop-per." We might fill per." pages with recommendations; but the one above will answer, as it sets forth its strong Price, per points. pound, postpaid, 58 cents; per 1-4 pound, 18 cents; per ounce, 10 cents; per package, 5 cents.

EDMANDS' BLOOD TURNIP.

This is a standard strain of late turnip beet, with flesh of an extra dark color, which makes it very popular with market gardeners. Our customers will find it an excellent variety for general crop where a dark-colored beet is wanted. Price, per pound, postpaid, 58 cents; per 1-4 pound, 18 cents; per ounce, 10 cents; per peckage, 5 cents.

ARLINGTON FAVORITE.

In the matter of new vegetables we can safely follow where the Arlington (Mass.) market gardeners lead.

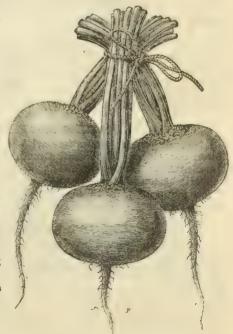

We find this new beet of theirs to be a fine early sort, dark red in color, having a small tuft of leaves for foliage, of good form and fine flavor. An excellent variety either for the market gardener or for the home garden. Price, per pound, postpaid, 58 cents; per 1-4 pound, 18 cents; per ounce, 10 cents; per package, 5 cents.

CROSBY'S EGYPTIAN.

A dark-fleshed, smallnecked, early variety of beet.

As early as the original Egyptian, by careful selection it has been made thicker and is less inclined to push up a woody neck as it advances in growth.

George B. Courtis, one of our best resident market gardeners, expresses but the general sentiment when he says: "After trials of many varieties, I pronounce the Crosby's Egyptian the best for the early market." Price, per pound, postpaid, 58 cents; per I-4 pound, 18 cents; per ounce, 10 cents; per package, 5 cents

I never had such nice Cabbage as the Houser. The heads are very large and as hard as a rock. They do not crack open as most large-headed Cabbages do, writes Philip Burnox, Herkimer, N.Y.

# CABBAGES.

SEE PAGE 36.

Mrs, H. C. Ostrander, East Aurora, N.Y., writes: "We find your Earliest Cabbage to be the finest hard heading, first early cabbage that we have yet seen.

**★ CABBAGE, "GLORY OF ENKHUISEN."** 

Of all the early white Cabbage there is none equal to this novelty. It has a great advantage in comparison with other early sorts in that it grows large heads, which are very compact, of a nice yellow green color, and of fine foliage. This will no doubt have a good reception amongst market gardeners, as well as those who grow vegetables for their own use. Price, per ounce, 45 cents; per package, 15 cents.

ALL-SEASONS. (Headquarter's Stock.)

Sometimes called "Vandergaw."
This fine variety, which we were the first to catalogue, has through clear, sheer merit, introduced itself into every leading catalogue in the United States. It is called "All-Seasons" because it is just as good for late market or to keep over winter as it is for the early market. Our stock is from specially selected heads.

Price, per pound, postpaid, \$2.33; per 1-4 pound, 65 cents; per ounce, 20 cents; per package, 5 cents.

EARLY SPRING.

This variety is earlier than the Early Summer but not quite as early as our stock of Early Wakefield. It is about one-fifth smaller than Early Summer, makes a nice fine, hard, flattish, thick head, having a shade of green peculiar to itself. It is short stumped Price, per pound, postpaid, \$2.50; per 1-4 pound, 75 cents; per ounce, 25 cents; per package, 5 cents.

TWISS' EARLY DRUMHEAD.

This variety has these two advantages over the Warren, viz: it heads a week or ten days earlier, and besides makes a rounder, more globe-shaped head. A splendid market sort. Price, per pound, postpaid, \$3.33; per 1-4 pound, \$1.00; per ounce, 30 cents; per package, 10 cents.

EARLY DEEP HEAD.

Everyone of our customers who has raised them must have found our Early Deep Head a magnificent cabbage. The Deep Head makes a larger and deeper head than the original Fottler; hence is better to keep over winter, "peeling" well in the spring. Price, per pound, postpaid, \$2.00; per I-4 pound, 60 cents; per ounce, 25 cents; per package, 5 cents.

ERFURT ROUND SUGAR.

This new Drumhead was one of the best of all the early varieties among the sixty-four different kinds of cabbage raised on our experimental grounds in 1896. Every specimen headed and all the heads were as like each other as are peas in the same pod, and all remarkably hard. The heads are of fair market size for early, and stand right out, making them very easy to cut. Medium thick. Price, per pound, postpaid, \$3.33; per 1-4 pound, \$1.00; per ounce, 30 cents; per package, 5 cents.

THE HOUSER CABBAGE.

The striking engraving, made from a photograph, gives a good idea of the remarkably round and hard heading new cabbage. It bears the name of its originator. It is the result of 20 years' careful selection. The heads are large, weighing, on an average, 10 to 12 pounds. For late marketing it should be planted two weeks earlier than any other sort.

#### The Claims for This Distinct New Cabbage Are:

First, Lateness. It is the latest of all large Cabbages, being at least two weeks later than any other strain of the Late Flat Dutch type.

Second, Solidity. The Houser Cabbage cannot be excelled in this respect by even the Danish Ball-Head. Very compact, each leaf well overlapping the head.

Third, Size. It is fully as large as any of the common varieties, the heads veraging from 10 to 12 pounds. Many specimens have been grown to weigh averaging from 10 to 12 pounds. 18 to 20 pounds.

Fourth, Shape. The heads are round and deep through, and should any of the heads crack, it is at the stem end, which does not destroy its use for market. The heart extends only 2 to 2 1-2 inches into head. See illustration.

Fifth, Quality. The main feature of a good Cabbage is tenderness. In this respect Houser surpasses most others. It is free from that coarse rib always found in late cabbages.

Sixth, Yield. By reason of its compact habit of growth and its freedom from loose leaves, fully 500 more heads can be set out to the acre than of many other good-sized varieties. Fully 95 per cent. of these plants in an ordinary season will make good merchantable heads.

Alice Carpenter, Cameron, Mo., writes: "The Houser Cabbage from your seeds is the best cabbage that I ever grew."

Silas M. Griswold, Bantam, Conn., writes: "From the package of your Houser Cabbage seeds I raised some of the finest heads that I ever grew, and I recommend them to all growers as first-class in every respect."

Mrs. J. Pollensworth, Carson, Nevada, writes: "I have grown cabbage for a great many years, but never had any equal to your Houser."

Price, per pound, postpaid, \$4.08; per 1-4 pound., \$1.25; per ounce, 40 cents; per package, 15 cents.

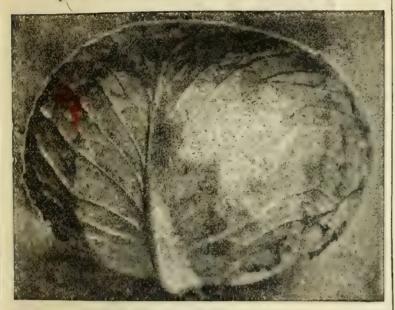

#### DANISH WINTER BALL HEAD.

The Danish and Hollander cabbage, under various names, have become exceedingly popular in our late winter and spring markets for the good reason that the imported varieties have been bringing from 50 cents to a dollar more per barrel than the best of our native sorts. This is because of the remarkable hardness of the heads. All are very reliable for heading if planted early on strong, well-manured land. In the latitude of central Massachusetts, they should be planted the first week in Tune. Price, per pound, postpaid, \$3.33; per 1-4 pound, \$1.00; per ounce, 35 cents; per package, 10 cents.

Fred Junge, Seola, So. Dak., writes: "Being now past 72 years old I hereby express my perfect satisfaction with CABBAGES—Continued. all my dealings with you for many years."

George D. Brigham, Boylston Center, Mass., writes: "This is the thirty-third year I have planted your seeds and have always found them satisfactory."

# THE SOLID EMPEROR CABBAGE.

Our farmers find that we can raise at home as good specimens of the Danish and Hollander cabbage as the imported, provided that the seed planted is not more than one remove from the foreign-grown. All the various strains of these foreign late cabbages are characterized by stumps longer than those of our native sorts. All are very reliable for heading if planted on strong, well-manured land. In the latitude of central Massachusetts, they should be planted the first week in June. We have made a careful test on our experimental grounds of all the various strains of these Danish or Hollander cabbages, and find no one variety equal to the Solid Emperor. Our seed is from the very best Danish stock and raised from selected heads. Price, per pound, postpaid, \$2.83; per 1-4 pound, 80 cents; per junce, 30 cents; per package, 10 cents.

THE WARREN.
(Sometimes called "Warren Stone Mason.")

This first-class cabbage is an improvement on the old Mason cabbage of thirty years ago. It makes a deep, round, medium sized and very hard head, the outer leaves wrapping it over very handsomely. In reliability for heading no cabbage surpasses it. It comes in as early as some strains of Fottler and a little earlier than others. The heads being very thick through and nearly round make it an excellent sort to carry through the winter. Price, per pound, postpaid, \$2.83; per 1-4 pound, 80 cents; per ounce, 30 cents; per package, 5 cents.

# MARBLEHEAD MAMMOTH.

This is the largest variety of the cabbage family in the world. Our patrons generally succeed in growing the Mammoth from our seed to the weight of thirty and forty pounds and in some instances over ninety pounds! It is the best of all varieties to raise for cow cabbage and winter feed for poultry. The selected heads from which we raised this seed averaged forty pounds each. Price, per pound, postpaid, \$2.48; per I-4 pound, 70 cents; per ounce, 25 cents; per package, IO cents.

# DANISH SUMMER BALL HEAD.

Thus far all that we have had of this variety have been very late sorts, very good kinds to keep over for the spring market but in the Summer Ball Head we have a decidedly new departure in a hard heading second early kind. The heads are medium sized, in this respect and in their hardness closely resembling the old Cannon Ball which we catalogued years ago. Price, per pound, postpaid, \$3.58; per I-4 pound, \$1.10; per ounce, 35 cents; per package, 10 cents.

W. H. McConnell, Yorksville, S.C., writes: "The Houser Cabbage last season had an early crop of large heads. The Earliana Tomato is the earliest that I ever had. It bore an enormous crop of fine smooth fruit."

# EARLY JERSEY WAKEFIELD CABBAGE.

The standard early cabbage in the markets of New York and Boston. Our seed stock will be found to be very choice. We have tested many varieties side by side with our own, but have never found one superior to our present strain. Price, per pound, post-

paid, \$2.33; per 1-4 pound, 65 cents; per ounce, 20 cents; per package, 5 cents.

# GREGORY'S HARD HEADING. (or Luxembourg.)

This is the king of all cabbage for late spring selling. It differs from all other sorts in coming out as green as when it was buried, making it very attractive.

A. W. Dodge, Commission Merchant, Boston, Mass., writes: "You may say to any one who may think of growing the Hard-Heading that they are the finest cabbage ever put in Boston market at this time, May 11, 1891."

Writes Mr. R. M. Edgecomb, from Mapleton, Mich.: "I have just (April 15) taken out a load of your Hard-Heading almost as green as when buried."

For late fall, or for winter marketing, and pre-eminently for spring and late spring sales, when cabbages usually bring their highest price, this is the cabbage. Those who raise it will have the markets of late spring entirely to themselves. To get the very hard heavy heads plant ten days earlier, and manure more liberally than for the common Drumheads. Price, per pound, postpaid, \$2.08; per 1-4 pound, 60 cents; per ounce, 20 cents; per package, 5 cents.

"THE EARLIEST."

An improved strain of Early Wakefield, and ranked as the earliest and hardest heading of all the first earlies. Several days earlier than Early Jersey Wakefield. This gives the market gardener complete control of the early market, where the greatest profit in cabbage raising is usually found. Price, per pound postpaid, \$2.58; per 1-4 pound, 75 cents; per ounce, 25 cents; per package, 5 cents.

## HENDERSON'S SUCCESSION.

This is a valuable variety. It has been thoroughly well bred, and has uniformly short stumps, about all of them supporting well-shaped, firm, solid heads, as like each other as twins. Mature about ten days later than Early Summer. Price, per pound, postpaid, \$2.48; per 1-4 pound, 75 cents; per ounce, 25 cents per package, 5 cents.

#### IMPROVED AMERICAN SAVOY.

The Improved American Savoy is one of our old standbys. It grows to a good size, is as reliable for heading as the Warren or Premium Flat Dutch, and has as short a stump as either of these varieties. We heartily recommend it to all those market gardeners who grow Savoys by the acre for the

general market. Price, per pound, postpaid, \$2.00; per 1-4 pound, 60 cents; per ounce, 20 cents; per package, 5 cents.

Ira R. Brown, Mt. Vernon, N.H., writes: "We have always bought our seeds of you and they have always proved to be all that we could wish."

CAULIFLOWER. F. W. Gilbert, East Hartford, Conn., writes. "You are the only seedsman that I can absolutely rely upon for purity of seeds."

larger than common Snowball, and can be left longer in the field without decaying. Price, per ounce, \$2.20; per package, 25 cents.

LONG ISLAND BEAUTY.

In a late trial every specimen of the Long Island Beauty made fine heads, and the heads averaged larger than any other sort. It is among the earliest. We would advise all our market-garden customers, who are raisers of cauliflower, to give this a trial, not forgetting that cauliflowers will sometimes vary for reasons thus far untraceable. Price, per ounce, \$2.00; per package, 20 cents.

EARLY SNOWBALL.

This ranks extremely high among the early varieties; for earliness, reliability for heading, size of head, and rich, white, curdy appearance, it is deservedly very popular. Price, per ounce, \$2.40; per package, 25c.

EARLY PADILLA.

We have planted the early Padilla with that excellent variety, the Snowball, and the Padilla headed earlier, and made as many and as good heads as the Snowball. Give this American cauliflower a trial. Price, per ounce, \$2.00; per package, 25 cents.

CHANTENAY - THIS IS THE FINEST TYPE.

# CARROTS.

DANVERS - OURS IS THE MARKET GARDENER'S STRAIN.

V DANVERS CARROT.

In the town of Danvers, Mass., the raising of carrots on an extensive scale has for years been quite a business, the farmers finding a large market in the neighboring cities of Salem, Lynn, and Boston. After years of experimenting they settled upon a variety which originated among them (as did the Danvers onion), known in their locality as the "Danvers Carrot." It is in form about midway between the Long Orange and Short Horn class, growing on light soils generally with a stump root. Under high cultivation (see our treatise on Carrots and Mangolds) forty tons are raised to the acre, and, at times even larger crops. This carrot is of a rich, dark orange in color, very smooth and handsome, and from its length is easier to dig than the Long Orange. It is a first-class carrot for any soil. The seed we offer is from most carefully selected stock. Price, per pound, postpaid, \$1.18; per 1-4 pound, 35 cents; per ounce, 12 cents; per package, 5 cents.

P. L. Pasco, Ripon, Wis., writes: "I have grown Dan-vers carrots from your seeds at the rate of sixteen hundred bushels to the acre"

CHANTENAY.

Of a rich, dark orange color. In earliness it ranks intermediate between the Danyers and the Short Horn. Of the style of the Danvers, hardly as large, but finer and more symmetrical. Our customers will find the Chantenay a decided acquisition for those markets which call for carrots of a finer type than the Danvers. Don't plant it for stock feeding, as it will not yield equal to the Danvers. Price, per pound, postpaid, 98 cents; per 1-4 pound, 30 cents; per ounce 10 cents; per package, 5 cents.

#### LONG RED CORELESS.

This variety is almost cylindrical in shape, blunt at the lower extremity, and has extremely red, very sweet, and fine flavored flesh. It is especially an early, small-leaved, kitchen-More profitable for market garden variety. CHANTENAY. than as a carrot for stock. Price, per pound,

postpaid, 78 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

# GUERANDE HALF LONG, STUMP ROOTED OR OX-HEART CARROT.

Intermediate as to the length between the Scarlet Horn and the Short Horn. It is much thicker at the neck than either, and, as will be seen by the engraving, carries its thickness well down towards the bottom. Crops as heavy as the Danvers, with this advantage, that it can be grown thicker

and can be raised on stonier land, while every carrot can beeasily pulled by hand; ploughing or digging being rarely necessary. Price, per pound, postpaid, 98 cents; per 1-4 pound, 30 cents; per ounce, 10 cents; per package, 5 cents.

# IMPROVED SHORT WHITE.

This new and distinct variety, Mr. Ferry thinks, is destined to take first rank as a field carrot, owing to its enormous productiveness and the ease with which it can be harvested. Roots half long, very heavy at the shoulder, smooth; color light green above ground, white below; flesh rich, white, solid, crisp and of excellent flavor. As a heavy cropping, easily harvested, white carrot, it is probably the best of its class. A real acquisition. Price, per pound, postpaid, 58 cents; per 1-4 pound, 18 cents; per ounce, 10 cents; per package, 5 cents.

#### IMPROVED LONG ORANGE.

We have had this strain of the Orange grown for us for many years by the same party, and think that we are justified in saying that there is no better. It grows long, but not too long for a long Orange. Price. per pound, postpaid. 93 cents; per 1-4 pound, 30 cents; per ounce, 10 cents; per package, 5

Joseph S. Wormstead, Marblehead, Mass., writes:—"Itried a root of the new Rose Ribbed Celery, not blanched, and found it to be as crisp and tender as any blanched celery I ever tasted."

Rev. B. T. Russell, Welcome, Minn., writes:—"Your Rose Ribbed Celery is very fine. It keeps well into February, and its flavor is delicious."

# GIANT PASCAL CELERY.

This self blanching variety of celery comes to us from France. It is a tall sort, growing large, thick, and solid stalks. Dark green in color, it has a golden heart, and a rich, nutty flavor. Unlike some of the self-blanching varieties, this is a fine keeper, being

found in the markets of Paris from the end of December to the beginning of March. Well worthy the attention of every enterprising market gardener. Price, per pound, postpaid, \$1.98; per 1-4 pound, 60 cents; per ounce, 20 cents; per package, 5 cents.

# PARIS GOLDEN YELLOW LARGE SOLID.

This surpasses in about all the characteristics sought after in an early celery-vigor of growth, large size, readiness in blanching, it being to a large degree self-blanching, and in possessing the rich nutty flavor of the best varieties. After having tested the stock with which we are to supply our customers the coming season we can truly say that it is first-class in every respect. Its true sphere is that of a fall and early winter celery. This has become the acknowledged early variety grown for the very discriminating people of Boston by the market gardeners who supply them. Price, per pound, postpaid, \$4.58; per 1-4 pound, \$1.40; per ounce, 45 cents; per package, 10 cents.

NEW WINTER QUEEN.

"This," says the introducer, "is without doubt the most valuable variety of celery for winter and spring use ever introduced, even excelling the celebrated Perle Le Grand and Perfection Heartwell as a late winter keeper. It is also much stouter, thicker and heavier, with double the amount of heart of any known celery. The plant blanches to a beautiful cream white, with ribs perfectly solid, crisp and of delicious nutty flavor. Price, per pound, postpaid, \$3.00; per 1-4 pound, postpaid, 85 cents; per ounce, 30 cents; per package, 5 cents.

## WHITE PLUME CELERY.

The peculiarity of this that by closing the stalks, either by tying them up with matting or by simply drawing the soil up against the plant and pressing it together with the hands and again drawing up the soil with the hoe or plough, so as to keep the soil that has been squeezed against the celery in its place, the work of blanching is completed. This is unfit for a spring celery, as its tenderness and crispness of structure cause it to rot quicker than the old green kinds. Price, per pound, postpaid, \$1.98; per 1-4 pound, 60 cents: per ounce, 20 cents: per package, 5 cents.

EVANS' TRIUMPH.

The stalks of this new variety do not grow as large with us as those of the Giant Pascal or Kalamazoo, but are larger than those of Boston Market or White Plume. It has a compact habit of growth, and is a fine keeper. While it is crisp, brittle, and tender, it has a stronger celery taste than any other variety. We recommend it as a first-class late keeping sort. Price, 20 cents; per package, 5 cents.

George P. Winn, Arlington, Mass., writes: "The Evans' Triumph celery grew finely and branched nicely. After blanching it came out clear, white and solid."

Chatles Hill, Arlington, Mass., writes: "The Evans' Triumph celery you ent me severy nice. I shall plant more of it next spring."

## NEW ROSE-RIBBED OR GOLDEN ROSE.

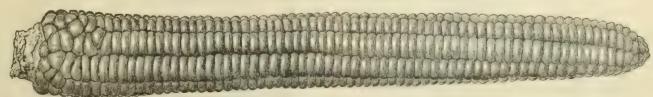

A fine sport from the Golden self-blanching. It adds to all the unsurpassed characteristics of that popular sort, a delicate rose tinting of the ribs as the season advances. This makes a rich contrast in color which makes it very beautiful on the dinner table. Price per pound, postpaid, \$2.98; per 1-4 pound, 90 cents; per ounce, 30 cents; per package, 5 cents.

## BOSTON MARKET.

(Novelty of 1903. Original Strain.)

This variety, which was the standard of excellence in the markets of Boston, Mass. for so many years, is yet unequalled in quality when at its best. Our seed of this was grown from the finest strain of plants by one of the best gardeners of Arlington, Mass. Price, per 1-4 pound, \$1.40; per ounce, 45 cents; per package, 10 cents.

# LONGFELLOW'S FIELD CORN.

This fine field corn is the result of careful selection in the Longfellow family (relatives of the distinguished poet) for over fifty The ears are remarkable long, some of them fifteen inches, and oftentimes two good specimens grow on one stalk. cob is quite small and the kernels large. It is the largest variety of yellow field corn that we have ever found it safe to plant in the latitude of Massachusetts, where it is quite extensively grown. Jonathan Skilton, Northboro, Mass., reports one hundred and fifteen bushels shelled corn from an acre. This is the variety that took the first premium among the flint corns at the great exhibition. bition at Chicago a few years ago. Price, per bushel, per express, \$2.25; per peck, 65 cents; per quart, postpaid, 40 cents; per package, 10 cents.

# For Prices per Bushel, SOME CHOICE VARIETIES OF CORN. See also page 15.

# EARLY ESSEX SWEET CORN.

(Novelty of 1903.)

Who that has raised that sweetest of all varieties of sugar corn (which we were the first to catalogue over a dozen years ago under the name of "Quaker sweet," but has since been renamed "Ne Plus Ultra") has not regretted that the ear was so small as to make it difficult to market it? In this new variety, "The Country Gentleman," we have ears of good market size which retain all the delicious quality of the "Ne Plus Ultra." Cobs small and kernels long. Our customers will find this to be a decided acquisition either for home use or for marketing. Price, per quart,

EARLY ESSEX.

per express, 40 cents; per quart, postpaid, 52 cents; per package, 10 cents.

# WHITE CORY.

Some have objected to the Cory because the kernels of some of the cars have a reddish cast. Here is a new strain which is not open to this objection, for by planting only white-cobbed ears of the Cory, after several years of care, a distinct variety has been produced, nearly entirely free from the objectionable red cob and kernels. It is equally as early as the original Cory and averages sweeter. Price, per quart, per express, 35 cents; per quart, postpaid, 47 cents; per package, 10 cents.

# MAMMOTH WHITE CORY.

This has all the earliness of the original Cory, with the great advantage of being decidedly larger in both ear and kernel; it is king of the market, for no other variety can compete with it as an extra early, and thus the market gardener who raises it monopolizes the cream of the early trade. Price, per quart, per express, 35 cents; per quart, postpaid, 47 cents; per package, 10 cents.

# V PERRY'S HYBRID.

On our experimental grounds this has proved to be very early and a remarkably large-eared sort for one so early. We would suggest to our farmer friends that either this or the Boston Market, if planted at the same time, would follow, for marketing, just after the Cory. Price, per quart, per express, 35 cents; per quart, postpaid, 47 cents; per package, 10 cents.

#### POTTER'S EXCELSIOR.

We don't think there is a sweeter, richer-flavored corn for the table than this midsummer variety. In its season this is the favorite corn in the restaurants of the large cities. Price, per quart, per express, 35 cents; per quart, postpaid, 47 cents; per package, 10 cents.

#### QUINCY MARKET CORN.

We want every one of our patrons to be sure to plant sufficient of this excellent early corn to test its merits, and if they do not find it of decidedly superior quality to the average of early varieties we will very cheerfully refund their money. Market gardeners who have raised it have no trouble in selling it, for it becomes the favorite table corn after their customers have once tried it. It holds the same rank among the early varieties for sweetness as Potter's Excelsior does among the later sorts. It comes in just after the Cory and just before the Crosby, but is larger than either. Twelve rowed. Price, per quart, per express, 50 cents; per quart, postpaid, 62 cents; per package, 10 cents.

## KENDEL'S EARLY GIANT.

This is decidedly the largest of all the second earlies, the ears measuring eight to ten inches long, and having 10 to 18 rows on each cob, the majority having 12 rows. Kernels white, sweet and tender. It comes into use just after Cory, with ears twice as large. Price, per quart, per express, 35 cents; per quart, postpaid, 47 cents; per package, 10 cents.

QUINCY MARKET.

# LIVINGSTON'S EVERGREEN.

We find that this white cob variety comes in about a fortnight earlier than Stowell's and though it is not quite as large, it yields large, handsome, ten or twelve-rowed ears. Capital variety to follow Moore's. Price, per quart, per express, 35 cents; per quart, postpaid, 47 cents; per package, 10 cents.

## MARBLEHEAD MAMMOTH.

Green ears have been exhibited weighing between two and three pounds. It is the earliest, sweetest, and largest of all the Mammoth sweet varieties. Probably no other sweet corn will yield as much fodder, and for this reason it is extensively planted, to be fed green or dry. Price, per quart, per express, 35 cents; per quart, postpaid, 47 cents; per package, 10 cents.

#### NELSON'S YELLOW FIELD.

A superior variety of yellow field corn, originated by Mr. Nelson by crossing the famous old King Philip on the Early Canada, followed by eight years of careful selecting of stock seed. It is earlier than Longfellow, large kernelled, and very prolific. It is exceedingly popular with farmers who have raised it, and millers say it makes the best meal of any corn they grind. Price, per quart, per express, 25 cents; per quart, postpaid, 40 cents; per package, 10 cents.

#### SIBLEY'S PRIDE OF THE NORTH FIELD.

This is one of the very few dent corns which will mature in 90 days and can be ripened as far north as Southern Maine, Vermont and New Hampshire. A characteristic of the dent varieties is that the cobs are very small so that they are sure to measure well after shelling. Price, per quart, per express, 20 cents; per quart, postpaid, 35 cents; per package, 10 cents.

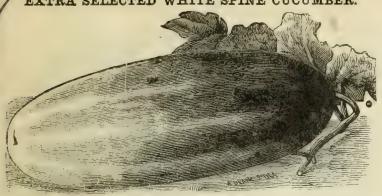

#### MEXICAN JUNE FIELD.

A giant among corn, growing from sixteen to eighteen feet in height. A grand variety for grain in the South, for the silo in the North when ears are not a desideratum, and a grand curiosity for every section. Here on our experimental grounds, it reached the height of sixteen and one-half feet. Planted before June 1, it will mature in the South. Price, per quart, per express, 30 cents; per quart, postpaid, 45 cents; per package, 10 cents.

Mrs. L. S. Johnson, Van Wert, Ohio, writes: SOME CHOICE CUCUMBERS. "My Cumberland cucumbers from your seeds took the first premium at our County Fair."

George F. Teague, Lexington, Mass., writes: "Would say further that your seeds have this the first premium at our County Fair."

EXTRA SELECTED WHITE SPINE CUCUMBER.

We offer to our customers a new strain of the White Spine which they will find superior, in its fine size and symmetrical shape, to many strains, while in purity it is remarkable, being perfectly pure—not a single one off color appearing in a crop covering nearly an acre of ground. We confidently recommend this strain for hot-house culture.

Per pound, postpaid, \$2.58; per 1-4 pound, 75 cents; per ounce, 25 cents; per package, 5 cents.

LEMON.

This is a new and entirely distinct type of the cucumber family, one of the unique curiosities which seedsmen now and then discuss.

The fruits are nearly round, with the yellow and green markings and smooth skin of the Lemon, while the flesh is exceedingly tender and crisp, with a sweet flavor surpassing all other cucumbers. They have none of the bitter or acrid taste so generally found in cucumbers. For slicing they excel, and are well adapted for serving whole upon the table. For pickling, ripe or green, one of the best and the most attractive, on account of their quaint form. They can also be used same as small melons for mangoes. They can be served green, but are at the best just as they are turning yellow. Price, per package, 15 cents.

Excellent sort for pickles, and also good for early forcing. Color, dark green; flesh crisp; very prolific. and always straight, smooth and handsome.

Price, per pound, postpaid, \$1.83; per 1-4 pound, 60 cents; per ounce, 20 cents; per package, 5 cents.

THE EMERALD.

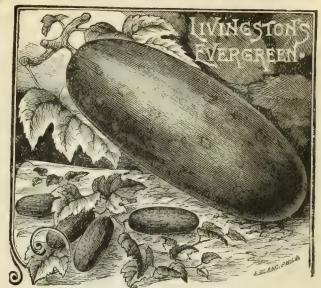

It is an improvement on that excellent variety, the White Spine, in size, quality, and appearance, for it is green in color even when ripe. It is very prolific, while its smooth, spineless skin attracts the attention and admiration of all. It retains its deep green color longer than the common varieties raised under glass. Price, per 1-4 pound, 50 cents; per ounce, 15 cents; per package, 5 cents..

BENNETT'S WHITE SPINE. (New.)

This is considered the best cucumber brought into the New York market. We find it to be a fine strain of very pure stock, retaining its glossy green color quite late. It will be found to be a little later than the "Improved White Spine" we catalogue. Per lb., postpaid, \$2.33; per 1-4 lb., 70 cts., per oz., 25 cts.; per pkg., 5 cts.

LIVINGSTON'S EVERGREEN CUCUMBER.

The New Evergreen is very hardy and evergreen, withstanding drought and bearing until frost. A very strong grower, extra early, and of best flavor, bearing firm, crisp fruits, either for pickling or slicing.

A celebrated vine-seed grower says: "I believe I never saw cucumbers lie thicker on the ground than the Evergreens did. When the frost killed the vines it really looked as though the whole surface of the ground was covered."

Price, per pound, postpaid, \$2.08; per 1-4 pound, 60 cents; per ounce, 20 cents; per package, 5 cents.

COY'S EARLY CYCLONE.

If the market of any of our patrons calls for an improvement on Improved White Spine in earliness, so much that it is ready to accept it at the cost of a reduction in size, they will find it combined in this "Early Cyclone" of Mr. Coy. Price, per 1-4 pound, \$1.00; per ounce, 40 cents; per package, 10 cents.

**▼THE CUMBERLAND.** 

(Novelty of 1903.)

"This variety is of the hardy, white spine type, is a rapid,

strong, and vigorous grower and very prolific in fruit.

"The pickles differ from all other hardy sorts in being thickly set with fine spines; the form is exceptionally straight and symmetrical, thus being as choice as a slicing variety as it is

As a table variety, in crispness and flavor, our better-half concluded she had never found its equal. Price, per pound, per express, \$2.59; per pound, postpaid, \$2.58; per 1-4 pound, 75 cents; per ounce, 25 cents; per package, 10 cents.

PARISIAN PICKLING.

A new French cucumber. It is markedly distinct from all other varieties, the fruit being strikingly long and cylindrical, and densely covered with fine prickles. The flesh is both hard, crisp and tender, what we all greatly desire in our pickles. Rather a shy cropper. Price, per pound, postpaid, \$1.83; per I-4 pound, 60 cents; per ounce, 20 cents; per package, 5 cents.

The white color is peculiarly clear and strong. For all who desire to raise the most attractive variety possible for exhibition purposes, we know of no sort which can give greater satisfaction than the Giant German. Like all the other mammoth varieties with which we are acquainted it will sometimes sport. Price, per package, 15 cents.

Crawford H. Thomas, Ramsey, Ark., writes: "Your Marblehead Mammoth Cabbage Lettuce is a gem in its way."

# FINE LETTUCES.

W. G. Dane, Newport, Vt., writes: "Your Marblehead Mammoth Cabbage Lettuce, also your Hanson, are the finest."

(See also page 23.)

# DENVER MARKET LETTUCE.

This on our grounds proves to be what the introducer claims, "an early variety of head lettuce, either for forcing or open ground. It forms large solid heads, of a good, light green color, and is very slow to go to seed. The leaves are beau-

tifully marked and blistered (like the Savoy cabbages), very crisp and tender and of excellent flavor. By these blistered leaves it distinguishes itself from any other kind of lettuce now grown. The shape of the head resembles somewhat the 'Hanson,' but is more oblong." Price, per

pound postpaid, \$1.23; per 1-4 pound, 40 cents; per ounce. 12 cents; per package, 5 cents.

HITTINGER'S FORCING.

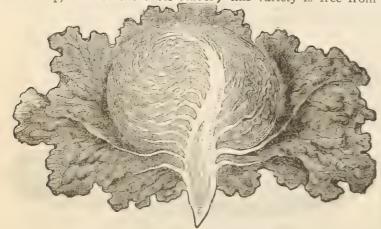

The very best for forcing for winter and early spring use. Our stock was supplied by one of the leading firms of market gardeners in Arlington, Mass. The junior member of our firm says that in a large section of a greenhouse in Arlington where he saw it growing there was not one head that

was "off" in shape or color. Price, per 1-4 pound, postpaid, \$1.00; per ounce, 30 cents; per package, 10 cents.

THE HANSON.
The Most Popular Lettuce Catalogued.

The cut below shows the inside of this very popular lettuce. Its heads grow to a remarkable size, and are sweet, tender, and crisp, even to the outer leaves; this variety is free from

any bitter taste found in some sorts. It is not recommended for forcing, but for outdoor cultivation it is rarely equalled, if grown on ground well manured and well cultivated. Price, per pound, postpaid, \$1.25; per 1-4 pound, 40 cents; per ounce, 15 cents; per package, 5 cents.

SUGAR LOAF LETTUCE.

If you want a first-class, all round family lettuce, try this. Its habit of growth is such that while it branchesout (growing under good cultivation, to ten or twelve inches in diameter), it also grows thick and high, thus making a large plantwith plenty of heart. Medium green in color, with a fine brown tinge. Of excellent quality, and does not quickly

run to seed. We recommend it as being among the best of summer lettuces. Price, per pound, postpaid, \$1.25; per 1-4 pound, 40 cents; per ounce, 15 cents; per package, 5 cents.

This variety is especially adapted to greenhouse and hot-bed culture. A sure header, making larger heads than White Tennis Ball, and is not liable to rot. Price, per pound, postpaid, \$3.08; per 1-4 pound, \$1.00; per ounce, 30 cents; per package.

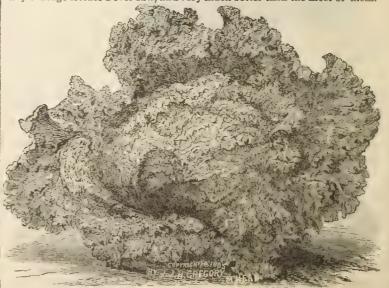

\$3.08; per 1-4 pound, \$1.00; per ounce, 30 cents; per package, 10 cents.

MARBLEHEAD MAMMOTH CABBAGE.

This makes the largest head of all the lettuce we have ever

raised, measuring eight inches in diameter across the solid head, or as large as a good Drumhead cabbage. Moreover, the heads are as distinctly defined, and nearly as closely wrapped together, as are found in the average Drumhead cabbage, Leaves are lightish green in color. It belongs among the second early. In quality tender, crisp, and free from bitterness.

Mr. Meggatt, the well-known seed grower, writes us: "Planted in my trial grounds, it proved a splendid summer cabbage lettuce; very large, a hard header, good quality, and very slow runner up to seed. I think it is equal to any cabbage lettuce I ever saw, and very much better than the most of them."

Price, per pound, postpaid, \$1.58; per 1-4 pound, 45 cents; per ounce, 20 cents; per package, 5 cents.

In writing, please give your name, post-office, county and state.

Says Mr. Goff of the New York Ag. Exp. Station: "Your Miller Cream Melon is extremely sweet, rich, and delicious, and very distinct."

# FINE MUSKMELONS.

Chas. Purrington, Pequabuck, Conn. writes: "The Miller Cream is the very best variety I ever raised; I have a good many friends when melons are ripe."

#### ROCKY FORD MUSKMELON.

This new variety is of the Netted Gem class; it grows to about the same size as that fine melon, but is rather coarser netted. Green fleshed and of good quality. The Coloradogrown crop which stands at the head of all the muskmelons grown in the country for fineness of flavor, has had a great run in our Eastern

markets for the past two years, to the detriment of our homegrown sorts. We have found the difference between it and Netted Gem so slight that we hesitate to recommend it to those of our customers who are raising that variety. Still, it might be wise to try it on a small scale to determine whether it is an earlier strain. Price, per pound, postpaid, \$1.00; per 1-4 pound, 30 cents; per dunce, 10 cents; per package, 5 cents.

# GOLDEN NETTED GEM.

A valuable acquisition. On our experimental grounds, side by side with several other sorts, we found it ripened as early as the earliest of the whole crop considered, decidedly the earliest of any of them. Green-fleshed, nearly round in form, flavor delicious, very heavy for its size, which is below the average, making it a better variety for family use than for market, yet a tremendous cropper, yielding as many as twenty to a single hill. Price, per pound, postpaid, \$1.00; per 1-4 pound, 30 cents; per ounce, to cents; per package, 5 cents.

# NEW NORFOLK BUTTON.

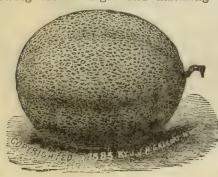

This is the earliest muskmelon to reach the markets of northern cities such as Philadelphia, New York or Boston. Being the earliest it has full control of the market and sells. It will be found to be earlier than the earliest strain of the Jenny Lind and of uniformly better quality. Price, per pound, postpaid, \$1.48; per 1-4 pound, 40 cents; per ounce, 15 cents; per package, 5 cents.

# DELMONICO.

This has a taking name, that of the famous New York caterer, who may be supposed to know what a good melon is. The flesh is of an orange-pink color, of the same fine quality as the Emerald Gem. Mr. McCoy, of Waterloo, Neb., probably the largest melon grower in the world, writes us that Delmonico was the only muskmelon of uniform good quality with him in 1889. Price, per pound, postpaid, 88 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

# THE MILLER CREAM.

This melon, which we were the first to name and catalogue, has deservedly become exceedingly popular, probably more so than any other muskmelon now before the public. It is a cross between those two delicious melons, Sill's Hybrid and Casaba, growing rather larger and maturing a little later than the former. The flesh

former. The flesh is of a rich salmon color, very sweet and melting in quality, and so very thick that the melon is almost solid, the seed cavity being remarkably small. The rind is thin, slightly sutured. The vine is a strong grower, and fairly productive. Price,

per pound, postpaid; \$1.58; per 1-4 pound, 50 cents; per ounce, 15 cents; per package, 5 cents.

## EMERALD GEM MUSKMELON.

Of the Christiana type, small in size, very early, and in form flat-round. The flesh is of a deep orange color, and verythick, the seed cavity being exceptionally s mall. They are

very sweet and the flavor delicious, the melon being always good. Very uniform in appearance. Price, per 1-4 pound, 60 cents; per ounce, 20 cents; per package, 10 cents.

#### HACKENSACK.

Considered in New York the most popular variety of musk-melon for market. It attains a large size, is round in shape, flattened at the ends; of a most delicious flavor, and wonderfully productive. Price, per pound postpaid, \$1.38; per 1-4 pound, 35 cents; per ounce, 12 cents; per package, 5 cents.

# CHAMPION MARKET.

This new claimant for public favor is said to be quite distinct from other varieties. They weigh from four to five pounds each. The flesh is light green in color, of a rich, sweet flavor. It is deeply ribbed and heavily netted. It is about three times the size of the Netted Gem. It has been sold in the markets of New York for \$1.50 per barrel higher than the average of meions. It is said to be very productive. It is an excellent shipper and promises to make a first-class market variety. Price, per pound, postpaid, 83 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

## BANANA.

This melon surpasses all others in its delicious fragrance. Externally it is of a creamy white, or delicate straw color. The flesh (the melon being nearly solid) is of a rich salmon. The quality is first-rate when the melons are thoroughly ripe. It grows from eighteeen inches to two feet in length and is very prolific. When ripe its shape reminds one of a large, over-grown banana, and it smells like one, having a remarkably powerful and delicious fragrance; one melon will scent the house. Price, per pound, postpaid, 83 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

Seeds ordered at mail prices, will be sent postpaid by us.

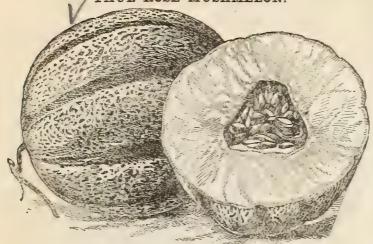

When seeds are ordered to be sent per express or railroad the cost of the transportation will be at the expense of purchaser.

For prices in full for bushel and

MUSKMELON5 - Continued.

pound to package, see pages 38 to 51.

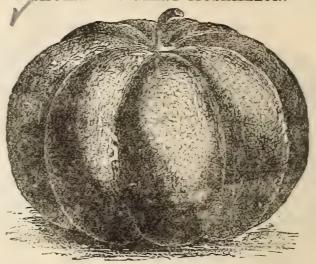

Of medium size, rather elliptical in shape; netted; salmon fleshed and so thick meated as to be almost solid; quality first-class. It is a cross between the Netted Gem and the Osage (or Miller Cream), two of the best melons for quality ever introduced. A first-class shipper, and in the Chicago market has been quoted at an average of more than double the price of other sorts. Price, per pound, postpaid, \$1.33; per 1-4 pound, 35 cents; per dunce, 15 cents; per package, 5 cents.

## MONTREAL NUTMEG.

This has been raised to weigh over thirty pounds. Exceptionally uniform in shape; netted; flesh green, quality superb. Price, per pound, postpaid, \$2.08; per 1-4 pound, 60 cents; per ounce, 20 cents; per package, 5 cents.

SHUMWAY'S GIANT MUSKMELON.

Of the fifteen varieties of cantaloupes grown on our trial grounds in 1893, nearly all of them new sorts, this was the largest of all. It has been raised to weigh over twenty pounds. The color of the skin is a yellowish green; the shape is nearly round, slightly flattened. The flesh is a light salmon in color. Quite thick meated, it suggests in quality a cross between a muskmelon and a cantaloupe. It ripens clear to the skin. A large showy melon, and likely to take well in any market. Prolific and remarkably pure. The seeds are the largest of all the muskmelon class. Price, per pound, postpaid, \$1.00; per 1-4 pound, 30 cents; per ounce, 10 cents; per package, 5 cents.

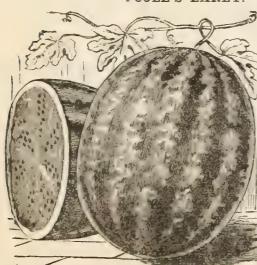

# A. H. Wade, Richmond, Me., writes: "I have always found your seeds true to name and first-class in every respect." CHOICE WATERNELONS

Wm. J. Kelly, Attica, Ohio, writes: "Your Cole's Early is the best Water-melon in the world for family use."

#### SEMINOLE WATERMELON.

This new melon originated in Florida, the land of melons as well as flowers. It sports from gray to green in color, but all are of the same size, shape, flavor, etc. It is said to possess four distinguishing qualities; it is extra early, extra large, enormously productive, and of most delicious flavor. Price, per pound, postpaid, 78 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

#### VCOLE'S EARLY.

Cole's Early is one of the finest every-day melons ever offered, for the amateur and for the home mar-Being somewhat brittle, it will not do for shipping purposes. It is very early, and will mature in every State; very hardy, vigorous, and a sure crop-Sweet and delicate, flesh a deep red color; the rind is thin and the quality of the flesh is sustained clear to the

rind. The melons are of medium size, nearly round in shape, rind green, striped with lighter shades. Price, per pound, postpaid, 83 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

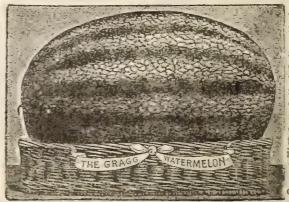

#### FLORIDA FAVORITE WATERMELON.

Mr. Girardeau, of Florida, who originated this new variety, thus describes it: "In shape, it is oblong; in coloring, green and white stripes blended; flesh, light crimson, crisp, and deliciously sweet, ripening ten days earlier than Rattlesnake, Kolb's Gem, and Iron-Clad, all having been planted at the same time." Seeds rather small and of a creamy white color. Price, per pound, postpaid, 78 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

IRON-CLAD.

A large melon, chiefly resembling the Gypsy. Flesh of a rich red; flavor sugary and delicious, keeping its quality to quite near the skin. Called Iron-clad because they stand rough usage so well. Price, per pound, postpaid, 78 cents; per 1-4 pound, 25 cents; per onnce, 10 cents; per package, 5 cents.

THE GRAGG.

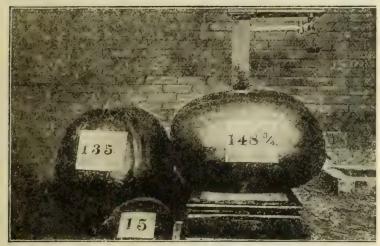

Adistinct variety, in both inside and outside appearance. Color, dark green with alternate stripes of lighter green, with a tracery of dark veins. The flesh is of a delicate salmon which tint, makes it exceedingly handsome.

sweet, juicy, with a rich flavor. Large, oblong, just about the right size for marketing. Price, per pound, postpaid, 78 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5

# WATERMELONS - Continued.

## THE MONSTER WATERMELON .- "THE TRIUMPH."

The above is the better name for a new variety of watermelon, which Mr. Girardeau introduced under the name of "Triumph." The accompanying illustration shows two in the process of weighing: one, 135, and the other 148 3-4 pounds. Well might he add, "such monsters were never thought of before.

Mr. Girardeau's statements relative to the enormous weight of his melon are supported in letters from the governor of Georgia, the editor of the Atlanta Journal, and other men of

He adds: "The Triumph is not only a monster in size (a single specimen of the largest filling a flour barrel), but it is very prolific, early, and of delicious flavor. Moreover, it is a capital shipper, carrying as well long distances as Kolb's Gem or any other variety. Price, per pound, postpaid, 78 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

#### THE DUKE JONES.

Many new watermelons have been introduced of late, but there will always be room for an improved variety, and this the Duke Jones must be, according to the testimony of those who have handled it on a large scale. It is a nearly round variety, of enormous size, of surpassing quality, and excellent shipper. J. R. Wilder, of Anthony, Florida, writes: "In our judgment, the Duke Jones is destined to supersede all varieties as a shipper as well as a local market melon. It has every desirable quality." Price, per pound, postpaid, 78 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

DIXIE. Southern variety, which is said to surpass the funceis Kolb's Gem as a shipper, and to be mexiciled in quality on productiveness. One grower realized \$2.0 pc; acre: another got \$30 to \$40 per hundred, a demind there's in the best in his

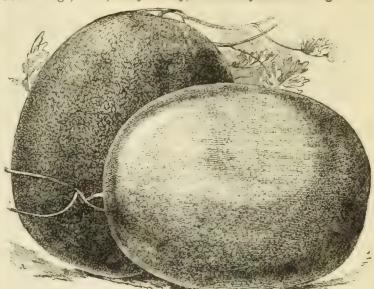

thirty years of experience: a fourth counted a dozen ripe to a hill, and a fifth took first premium at the Illinois tair. per pound, postpaid, 78 cents; per 1-4 pound, 25 cents; pounce, 10 cents; per package, 5 cents

#### SWEET HEART WATERMELON.

A large handsome, heavy melon, a good shipper, long keeper of bright color and best quality.

"Vine vigorous and productive, ripening its fruit early. Fruit large, oval, very heavy, uniformly mottled light and

dark green. Rind thin, but firm. Flesh bright red, firm, solid. but very tender, melting, and sweet. Fruit remains in condition for use longer than most sorts. Seeds gray." Price, per pound, postpaid, 88 cents; per 1-4 pound, 25 cents: per ounce, 10 cents; per package, 5 cents.

# FERRY'S PEERLESS.

This melon is of medium size, thin rind, mottled green, flesh bright scarlet, solid to centre, very sweet. An excellent sort for garden cultivation. Per package, 5 cents; per ounce, 10 cents; per pound, postpaid, 78 cents.

#### GREEN AND GOLD.

This melon grows to weigh from twenty to forty pounds, and ranks among the very earliest. Its rich golden color will make it most desirable as an ornament for the table, if arranged in contrast with the common sorts. It is, unquestionably, an acquisition. Price, per pound, postpaid, 78 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

One of the best of melons, possessing a delicious flavor. There are two varieties,-a light and a dark skinned,-differing in color only. Price, per pound, postpaid, 78 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

KOLB'S GEM.

on and grows to weigh from twenty-five to fifty pounds. Processor pound, postpaid, 78 cents; per 1-4 pound, 25 cents;

per omice. To cent

# SUPERIOR ONION SEEDS

For Full Directions for raising Onions, see our Treatise on Onion Growing, = = Sent to any Address for 30 Cents. As a Rule, Red Onions are Superior to the Vellow Varieties for Table Quality.

#### PEDIGREE-ONION SEED.

We still continue to raise our Pedigree strain of onion seed of the various kinds, by which we mean seed grown from most carefully selected, hand-picked onions. We send the men over the beds after the onions are pulled, raked in windrows, and dry enough to house, on their hands and knees, to select out the driest, and therefore the earliest, the thickest, hardest, and best-shaped onions; all to be of good market size. We have a right to claim that seed raised from such onions is decidedly superior to the great mass of seed to be found in the market.

We would invite any onion planter to visit our seed farms, at Howe's Station, Mass., and examine our seed onions.

There is onion seed and onion seed, but the Danvers Onion seed that we offer is grown from carefully selected stock in the very Danvers where that onion originated or the towns bordering it, and if that supply is exhausted then from New England grown stock which is the very best raised in the United States. A few dollars an acre invested in seed of extra qual-

ity is many times made up in the crop raised from them.

An observing, intelligent farmer claimed that earliness, reliability for bottoming, smallness of neck, can be as thoroughly inbred in an onion as capacity to transmit her good qualities can be inbred in a cow or any class of animals. What is possible to attain to in this matter our customers find in our onion seed, as shown in the extracts from letters given below.

J. R. Peckham & Son, Norwich, Conn., write: "From less than one quarter of an acre planted last year to your chion seeds we harvested 20 bushels, besides 1500 bunches sold before harvest."

Henry Shaw, Waterville, N.S., writes: "Your Early Cracker Onion gives general satisfaction. They are liked the best in our local market."

Robert M. Willis, Marietta, Minn., writes: "Your Pedigree Onion seeds are something wonderful. They grow fine, even sized bulbs."

M. W. Chapman, Starks, Me., writes: "From onions grown from your Early Round Yellow Danvers Onion seeds, I took the first premium at our Sandy River Fair."

Sandy River Fair."

John Lyons, Venfield, N.Y., writes: "The Early Round Yellow Danvers Onion seeds I got from you last year did first rate. On 5 1-4 acres of land grew 5,400 bushels."

#### SOUTHPORT WHITE GLOBE.

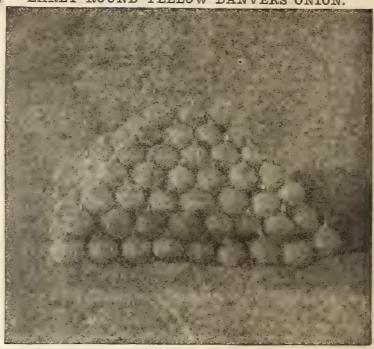

About as white and handsome as a newly made snowball; sells at a higher price than other sorts. Too late to grow safely north of Massachusetts. A tremendous cropper; we have raised these at the rate of 1,300 bushels per acre. To get a very fine white onion, pull just as they begin to go down and dry in an airy and shady place. The white class of onions are not as good keepers as the red and yellow sorts. Price, per pound, postpaid, \$3.08; per 1-4 pound, \$1.00; per ounce, 30 cents; per package, 5 cents.

Also known as Late Danvers Globe.

In this we have a variety precisely like the Southport White and Red in shape, differing from them in color only. It may be defined as a late Globe Danvers, a larger cropper than the early Round Yellow Danvers. It has matured well as far north as Central Massachusetts. The Southport Globes always command the highest prices in the New York market. Price, per pound, postpaid, \$2.08; per 1-4 pound, 60 cents; per ounce, 20 cents; per package, 5 cents.

PHOTO, OF OUR EARLY ROUND YELLOW DANVERS ONION, TAKEN IN THE FIELD.

We have by careful selection increased the roundness of our Danvers Round Yellow until it now is a fine, large, thick onion. The Danvers onion does best on a gravelly loam, making harder and brighter colored bulbs than on heavy, dark or mucky soil, while it keeps better. If to be raised on muck, the land should first receive two hundred loads per acre of gritty soil. Price, per pound, postpaid, \$2.33; per 1-4 pound, 60 cents; per ounce, 20 cents; per package, 5 cents.

## LARGE FLAT WHITE ITALIAN.

Our customers will find it to be an extra large, extra early, white onion, that bottoms down well and is nearly entirely free from scallions. Its sphere is as a fall onion. For this purpose it is decidedly an acquisition. Price, per pound, postpaid, \$2.08; per I-4 pound, 60 cents; per ounce, 20 cents; per package, 5 cents.

SOUTHPORT LATE RED GLOBE.

Very popular in the markets of New York; it measures better and sells at a higher price than Red Wethersfield. It is late and we do not recommend it for north of Central Massachusetts. Price, per pound, postpaid, \$2.25; per 1-4 pound, 63 cents; per ounce, 25 cents; per package, 5 cents.

## WHITE DUTCH EARLY ROUND HARD PICKLING

The White Dutch is the beau ideal of a pickling onion, small, round, hard, and white, surpassing every other variety for this purpose. It is the only one used in the immense pickle factories of England and France.

For pickles you need to plant thickly, at the rate of 30 pounds or more per acre, to pro-duce the small pickling size. Price, per pound, postpaid, \$1.75; per 1-4 pound, 53 cents; per package, 5 cents.

#### SUPERIOR ONION SEED - Continued,

## THE EARLY YELLOW CRACKER ONION.

Is the earliest of all our yellow sorts and is an excellent kind to raise where the seasons are short. It is the best of all the yellow onions in quality, but needs to be harvested as soon as it dies down, and handled as carefully as an apple. Price, per pound, postpaid, \$1.75; per 1-4 pound, 53 cents, per ounce, 20 cents; per package, 5 cents.

#### PRIZE TAKER.

This is one of the best of the huge foreign varieties. When started early under glass, and transplanted into open ground, they bottom fairly well, are nearly free from stiff necks, and when offered for sale always attract marked attention. They are not good keepers. The variety is without doubt the largest onion grown, samples under special culture sometimes weighing five pounds. We offer this season American-grown seed. Price, per pound, postpaid, \$1.58; per 1-4 pound, 50 cents; per ounce, 15 cents; per package, 5 cents.

#### V EARLY RED GLOBE DANVERS.

This variety, though it has had the name "Globe" given it, is a thick, flat, rather than round onion. In our trial grounds we

have found none of the varieties of Red Globe equal, in bottoming earliness, and cropping qualities, to our Early Red Globe Danvers. This onion is not as well known as it ought to be; it ripens two weeks earlier than Red Wethersfield. Scallions are almost unknown when grown from carefully selected seed stock, it being as reliable for bottoming well as Winningstadt cabbage is to make a head.

Price, per pound, postpaid, \$2.00; per 1-4 pound, 60 cents; per package, 5 cents.

# YELLOW GLOBE DANVERS. (Western grown.)

We again catalogue the same grade of Danvers Onion Seed sold by seedsmen in general. This will vegetate first-rate and produce such Danvers onions as are usually found in the market. Price, per pound, postpaid, \$1.33; per 1-4 pound, 40 cents; per ownce, 15 cents; per package, 5 cents.

#### LARGE RED WETHERSFIELD.

This is the famous old standby, which perhaps is more extensively raised than any other sort. It is hardy, later than Danvers, and has not been bred to make as handsome an onion. The Reds are sweeter onions to eat than the yellow sorts, but do not look so inviting when cooked. Price, per pound, postpaid, \$1.58;

per 1-4 pound, 50 cents; per ounce, 15 cents; per package, 5 cents.

#### PRICES OF ONION SEED.

See note at foot for prices for quantities. See also page 46.

We offer onion seed this year at the following rates:—Per lb.

Early Round Yellow Danvers (our New England strain). \$2.25

Early Red Globe Danvers (our New England strain). 1.92

Early Yellow Cracker (our New England strain)... 1.67

Early Flat Red (our New England strain)... 1.50

Southport White Globe (our New England strain)... 3.00

Southport Yellow Globe (our New England strain)... 2.00

Southport Late Red Globe (our New England strain)... 2.17

Wethersfield Large Red (our New England strain)... 1.50

FIn case 10 to 25 pounds of any of the above are taken, the price will be 25 cents less per pound.

These quotations are per express or freight at purchaser's expense. If ordered by mail, remit 8 cents to above rates per pound for postage.

#### EGYPTIAN OR PERENNIAL TREE ONIONS.

When once set out, without the slightest winter protection, these will come up year after year, as soon as frost breaks ground, and grow so rapidly that they are ready for market or home use two or three weeks before any other onions. The bulbs are not round, but irregular, just like those called "rare ripes," which we get by setting out old onions in the

spring. They are larger the second year. For family use it is unsurpassed for sweetness and tenderness. The young sets grow on top of the stalks, like tree onions. These should be planted in the fall. They will be sent out in August or September, as soon as ripened. Price, per quart, postpaid, 37 cents; per express, 25 cents; per package, 10 cents; per peck, per express, 75 cents; per bushel, per express, \$2.50.

THE MORSE LETTUCE.

Mr. Morse is the largest grower of lettuce seed the world over. From his large experience he has selected and propagated this new variety as specially worthy the attention of market gardeners. It is a sort between the black and white seeded Simpson lettuces, being larger than either and lighter in color than white seeded. It is not as light and fluffy as black seeded, but is a more thrifty and vigorous variety. Good for growing either under glass or out of doors. Excellent for either spring or summer use. Price, per 1-4 pound, 30 cents; per ounce, 12 cents; per package, 5 cents.

#### MARKET GARDENERS PRIVATE-STOCK LETTUCE.

A strain of black-seeded tennis ball selected with special care for hot bed and cold frame culture. It makes large, solid heads, which stand a long time before sending up seed shoots. Price, per 1-4 pound, 80 cents; per ounce, 20 cents; per package, 5 cents.

#### IMPROVED LARGE-LEAVED WATER-CRESS.

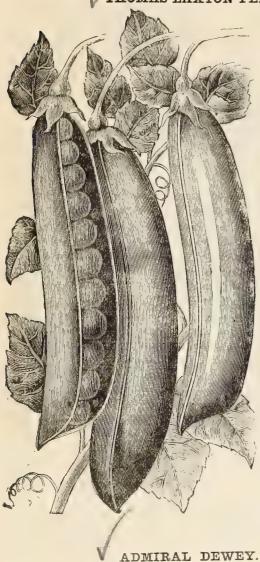

A decided improvement on the old well-known and highly esteemed Water-cress. It has considerably larger leaves, is more productive and better in quality, being very tender, and of a very pleasant flavor. Much better suited for garnishing dishes than the old sort. There is no doubt but that it will by and by supersede entirely the old form, to which it is superior in all respects. Price per package, 15 cents.

Nott's Excelsior, the leader of the wrinkled dwarfs.

# SOME CHOICE PEAS. Gregory's Surprise, the eartiest wrinkled. No earlier round pea.

THOMAS LAXTON PEA.

This is a rare new pea sent out Mr. Laxton by of England who was the origina-tor of the now famous Gradus pea, which in its combination of size of pod, earliness and quality has produced such a sensation among the market gardeners of United the States. This fine pea was made by crossing Gradus or a seedling of the earliest of all It very types. closely resembles the Gradus in size of pod and peas, the pod is of a darker color. Mr. Laxton considers it earlier than Gradus; in our trial grounds we could see no difference in this respect.

Price, per peck, per express, \$2.75; per quart, per express, 50 cents; per quart, postpaid, 65 cents; per package, to cents.

A chance seedling found among a lot of peas received from England. Its originator, who is a pea grower of the largest experience, declares it to be "without exception, the largest podded pea of which we have any knowledge," and when to this is added heavy cropping and richest quality, it can readily be seen that it stands at the head of its class. Height, 3 1-2 feet; foliage, vine and pod a rich dark green. Remarkably healthy and vigorous, producing abundance of pods of largest size, sometimes six inches in length, well filled with peas of largest size, tender, and of first-class flavor. the best of all the class of long vine, large podded, wrinkled peas." In our experimental grounds this was the best of all the late varieties in cropping. Price, per peck, per express, \$2.00; per quart, postpaid, 55 cents; per package, 10 cents.

This new early English pea takes the palm from all others of its class. It is as early as Alpha, and decidedly larger in both pods and peas than all others of the same early cla. Height of vine, 3 to 4 feet.

"Your A  $\tau$  is the best pea I know of; my crop was a grand sight. I never saw peas hang so thickly."—A. PIKE.
"A ris a spleadid pea. Those who grow it will never go back to the small sorts again."—W. COOKE.

The experience with it on our experimental grounds was an endorsement of all the best things that were said of it. Price, per quart, postpaid, 70 cents; per package, 15 cents.

# HORSFORD'S MARKET-GARDEN PEA.

Of this remarkable pea, in our note-book on our experimental garden, in which we test all new things, comparing them with standard sorts, we find the following entry: "A tremendous

cropper, excelling, with a single exception, every one of the forty-five varieties on trial; pods as long as Advancer, and as well filled. It grows nearly as tall as Advancer, but is a better cropper." At the Ohio experimental station, tested with twenty-eight of the leading varieties, they had about the same results. Twenty-five plants of each kind were carefully harvested, and the pods and peas counted, and the total product of The each weighed. result was, that the

shelled peas of the Market-Garden weighed nearly twice as much as the heaviest cropper of either of the other varieties. Grown by ourselves, on a large scale, it yielded not far from fifty bushels of dry secd-peas to the acre. The seed should be planted from three to five inches apart in the drill. Price, per peck, per express, \$1.50; per qt., postpaid, 40 cents; per package, 10 cts.

THE GRADUS.

Our experimental tests appear to demonstrate that this pea is before the public bearing four different names, viz.: early Giant, Extra Early Long Pod, Prosperity, and Gradus. The very fact that it has been so much named is significant of the value of the new pea. It is undoubtedly the earliest of all the large podded, wrinkled peas yet introduced, being as early as those of the Alaska class, and but a few days later than the Surprise. We must say that we do not find it to be a heavy cropper, but the large size of the pod, the quality of the pea, with its extreme earliness, make up a trio of good reasons for its introduction as a decided acquisition into the family garden. Price, per peck, per express, \$2.75; per quart, per express, 50 cents; per quart, postpaid, 65 cents; per package, 10 cents.

# GREGORY'S SURPRISE.

This new pea, which we named and introduced, is the earliest of all the wrinkled sorts. It will be found to be even earlier than the Alaska and Maud S. The vines grow 20-24 inches in height and need no sticking. Pods are not as large as the American Wonder, but far more numerous, while they are ready for market days before it. Though full as early as the earliest hard sorts, it has the delicious sweetness which belongs only to the wrinkled varieties.

This pea is sometimes confounded with the Station, but it had a different origin and has a distinct individuality, which aill be shown on comparing the two in the field, when a greater difference will be found than exists between many of the earlist of the hard peas.

Price, per peck, per express, \$2.00; per quart, postpaid, 50 cents; per package, to cents

# TELEPHONE.

A tall wrinkled marrow of the best quality, a strong grower. and very productive. The pods are of the largest size, and contain from six to seven large peas. The rich dark green color f the pods make the peas sell well in the market; hence it has become very popular with farmers and gardeners. Price, per ock, per express, \$1.75; per quart, postpaid, 45 cents; per kage to cinte

For prices per Bushel

Hat?

Nort's

SOME CHOICE PEAS.—Continued.

please see page 47.

## NOTT'S EXCELSIOR PEA.

This has gained the position of the standard first early pea. It is as early as the American Wonder, while the pods are larger, fully as well filled, and there are more of them. It grows half taller than the American Wonder, and is a much heavier cropper.

In a comparison made on our own grounds, between the American Wonder and Excelsior, we found that under the same conditions the Excelsior yielded one quarter more, in shelled peas one fifth more, and in weight of peas one third more.

Price, per peck, per express, \$2.00; per quart, postpaid, 50 cents; per package, 10 cents.

JUNO.

Pods are remarkably large, long, straight, thick through and well filled. The color of the pea is that very dark green which is so desirable. Seven or more great peas in a pod. The vines, are short jointed, large leaved, and stalky at times, and from eighteen to twenty-four inches in height. It crops heavily; quality delicious; every way desirable. Medium early. A first-class pea to follow the early EXCELSIOR. sorts. Price, per peck, per express, \$1.60; per quart, postpaid, 45 cents; per package, 10 cents.

#### IMPROVED STRATAGEM.

The improved variety that we catalogue this season will be found to be nearly free of the vexing small sort, and to yield an ideal crop of pods of immense size, well filled with dark green peas. Price, per peck, per express, \$1.75; per quart, post-paid, 45 cents; per package, 10 cents.

EARLY PRIZE.

A Cross between Tom Thumb and the Advancer. Grows eighteen inches high, being slightly taller than Premium Gem, and while equally early, it is decidedly a better cropper. Pod large, heavy, well-filled; also equal to the wrinkled varieties in sweetness and flavor; it can be planted earlier than these without danger of the seed rotting in the ground.

Writes Mr. O. H. Alexander, the well-known pea grower of Vermont; "Having tested Early Prize by the side of eighty varieties from all parts of the country, I consider it in all respects one of the best."

Price, per quart, postpaja, 45 cents; per package, 10 cents.

CLAUDIT.

This is one of the best of the many new sorts. It comes in just after Gradus, which it decidedly excels as a cropper and in length of pods; in some of these we counted 9 peas, which as every gardener knows is very rare among American grown The peas are blue-green in color, sweet, tender, and of a rich flavor. Vines about 3 feet in height. Its splendid cropping qualities and the extra size of the pods will please everybody. Price, per peck, per express, \$1.75; per quart, postpaid, 45 cents; per package, 10 cents.

Rev. J. Reynard Lawrence, Lanesboro, Mass., writes: "Your Admiral Dewey Pea is a beauty. I grew pods of it four and occasionally five inches in length, all well filled and of delicious flavor.

O. H. Buckley. No. Amberst, Ohio, writes: "Planted July 14th your Gregory Surprise Peas were ready to pick August 16th. Your Faust's Early Crimson Beet is very early, sweet and productive."

John R. Wise, Bellaire, Ohio, writes: "We have as yet found no peas as good in quality as your Markhalved Carly Marrowfat."

#### THE HEROINE PEA.

This is one of the large-podded, largepea class, though the vines grow but 2 1-2 feet high, medium early, green, wrinkled, The pods are of large size, well filled, long, and pointed, containing from six to nine large peas. Quality the very best. Mr. Charles E. Pecker, one of our best market gardeners, writes: "I find the type of the Heroine pea to be thoroughly fixed. It is a fine pea for the most critical market garden-Price, per peck, per express, \$1.60; per quart, postpaid, 45 cents; per package, 10 cents.

## L MAY QUEEN.

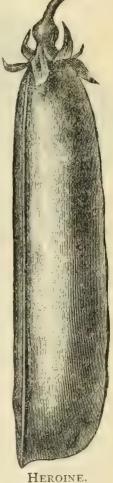

This closely resembles A 1, but it is more dwarf (grows 2 1-2 feet high) and a little earlier. Either are capital sorts. Price, per quart, postpaid, 70 cents; per package, 10 cents.

# DWARF CHAMPION.

First class as a variety to follow the Advancer; very healthy and vigorous. This is another favorite with the market gardeners of Long Island, where it is sown August I, as a second crop, being less liable to mildew than other sorts. Pods and peas large, quality very sweet and rich. Price, peck, per express, \$1.75; per quart, post-paid, 50 cents; per package, 10 cents.

ECLIPSE.

One of the very earliest of the new wrinkled peas, being about as early as any of the earliest hard kind. Makes stout vines, grows good-sized pods, and lots of them, being a splendid cropper. Price, per peck, per express, \$2.00; per quart, postpaid, 50 cents; per package, 10 cents.

NEW LIFE.

The object sought by the originator of the New Life was to find a new variety which should possess all the good characteristics of the Stratagem without its defect of bearing more or less of small pods. In this we think he more than succeeded, for there are no small pods and, in addition, they are dark green in color, making the new pea a decided acquisition. It comes in just after Heroine and is a capital sort to follow that fine variety. Price, per peck, per express, \$1.75; p quart postpaid, 45 cents; per package, 10 cents.

## CARTER'S DAISY OR DWARF TELEPHONE.

Height, 18 inches; habit, dwarf and stocky; healthy, vigor ous, and very uniform in height; very productive, plants bearing from five to seven pods. Pods frequently five inches long. broad, and well filled. Peas large and of delicious flavor From five to seven days earlier than the Stratagem. In the new pea we have all the excellent qualities of the Teleph without its tall vines. Price, per quart, postpaid, 50 cents; package, 10 cents.

#### HANCOCK.

Many of our fellow-seedsmen send out an extra early pe-bearing their own name. Were we to "follow suit," we should elect the Hancock as our extra early.

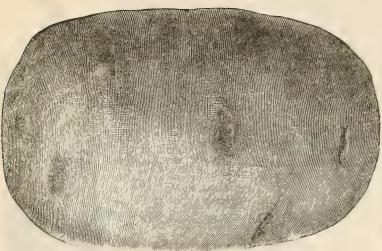

per peck, per express, \$1.25; per quart, postpaid,

To get our largest crops of potatoes with the largest and smoothest tubers, plant on inverted clover sod and apply about .000 pounds of potato fertilizer, half in drill and half broadcast.

# POTATOES.

(FOR PRICES PLEASE SEE PAGE 27.)

## THE DELAWARE POTATO. A Valuable Potato.

It is seldom we find such a combination of size, yield, and quality in any potato. A professor in one of our agricultural colleges recently told us that he dug a carpet-bag full from a single hill, and a day or two after a farmer stopped me to say that it was the finest eating potato that he knew of. The average form is shown in the engraving. It is medium early; in size it is large, being above the average; the skin and flesh are white; in yield it is a remarkable cropper, while in quality it is first-rate, being dry and mealy. It is one of the few varieties that do well on all kinds of soil. Every farmer who has tested the Delaware has become enthusiastic in its praise.

F. A. Gray, Philbrook, Montana, writes: "From the 3 pounds of Delaware potatoes, from you last year, I grew 221 pounds, some weighing 1 1-4 pounds. H. M. Turner, Wentworth, N.H., writes: "From the 1 pound of your Delaware potatoes, from you, I grew 90 pounds of fine tubers. Your seeds have always been as represented."

R. D. Page, Campton, N.H., writes: "In 1895, on one acre, I grew 400 bushels of nice Delaware potatoes from stock purchased of you."

J. R. Jester, Brown's Canon, Col., writes: "From three pounds of your Delaware potatoes I got four hundred and seventy-five pounds of very large and smooth potatoes."

## EARLY ROBERTS.

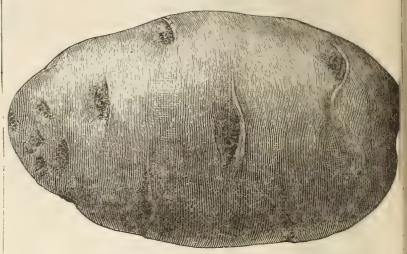

Many of you have raised the New Queen, and we know that all who have, have found it to be among the very best; now the Roberts is a sport from this famous sort, and while fully equal to it in yield and quality, is at least a week earlier when planted side by side at the same time. In color it varies, being sometimes clouded, sometimes white. The average crop of Mr. Roberts, who is one of the most successful market gardeners in Essex county, for several years has been 100 barrels to the acre. He informs us that his neighbors who are prominent market gardeners, have had the same successful experience with it. They have all observed that while it is every way as good as the New Queen, in all its many desirable qualities, it has the great advantage of being a week earlier. Mr. J. E. Chase of Essex county, Mass., says that his Roberts ripened so much earlier than the Beauty of Hebron that he had them all marketed before the Beauty of Hebron was ripe enough to dig. David Warren, who has had a large experience with many sorts, says, "The sum of my experience is that the Roberts is the best and earliest of the first early sorts now on the market."

This valuable variety is too good a one to be monopolized by a few enterprising market gardeners. As Mr. R. was the first to make known its merits, he deserves to have his name attached to it.

#### EARLY MICHIGAN.

An oblong, white, handsome potato with eyes on the surface. On well enriched land this is one of the most profitable market potatoes of recent introduction. Six hundred and eightyfour bushels have been raised under high culture on a measured acre. It is among the very earliest sorts, and when planted early will mature before dog days set in, and so escape the rot. The clear whiteness of their skin makes them very attractive. Our old friend, Mr. Andrew Lackey, who has been an experimenter for over half a century, called our attention to its merits as an early market sort.

# EARLY NORTHER POTATO.

A seedling raised from a seed-ball of the Early Rose. In shape, color, and season of ripening it very closely resembles the Early Rose, but it is earlier and more prolific. Likely to become as popular as the New Queen.

N. G. Kilborn, Douglas County, Minn., writes: "This has been a very poor season for potatoes, but, nevertheless, from the one barrel Early Norther, bought from you last spring, I harvested one hundred and forty-seven bushels."

#### THE "ENORMOUS,"

We tested this new seedling for two seasons in our trial grounds. Our field notes read as follows: "Late, vines very healthy, stalks very stout and tall. Crop remarkable in quantity; potatoes very large, skin very white." Our experience led us to investigate its merits as tested by others, and the results were so uniformly in its favor that we have now introduced the Enormous to our customers as a variety that can be raised at a decided profit over many now on the market. In 1895 Mr. Manum raised 604 bushels on a measured acre, on a light, dry, sandy loam with a gravel sub-soil, and the next season averaged 533 on three measured acres. The land had been four years in grass; 400 pounds of potato fertilizer were used in the furrows when planted, and 200 with a little ashes appiled in the rows afterwards, and cultivated in. It needs thin planting, not more than two good eyes each 15 inches. Pennsylvania Agricultural College reports that the Enormous yielded the best of thirty varieties tested at rate of 480 bushels per acre, of which 98.90 per cent. were merchantable, large and smooth.

## WONDERFUL.

(Novelty of 1903.)

This is the new variety for which \$300 was offered for a name. Yields have been reported up to 875 bushels per acre. We were exceedingly pleased with the crop raised on our farm the past season. It proved to be a heavy cropper, yielding potatoes of large size and good shape. The eyes were close to the surface. They had that rich russet-brown skin with its fine network that is so attractive to the eye. Their shape is medium oblong. They all cracked when cooked, were very mealy and were nice flavored. Medium late. Our customers cannot fail to like this new comer.

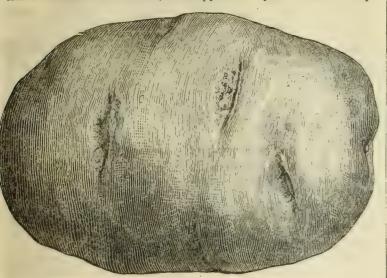

H. G. Lewis, Whiteside, Mo., writes: "The early Fortune potatoes that we got from you last year,

POTATOES. — Continued.

eleven in number, made over four bushels of fine potatoes. We were agreeably surprised."

#### EARLY SIX WEEKS POTATO.

The Six Weeks is very evidently a seedling from the Ohio, which it very closely resembles in every way, but is earlier, makes rather taller stalks, and appears to yield better on up-

land than that fine variety. The potatoes grow so rapidly that, under favorable circumstances, they are as large as hens' eggs, and therefore fit for family use, in six weeks from time of planting and mature in between ten and eleven weeks. We find it a fair yielder, and though not so extraordinarily productive as some claim, still a good cropper for so early a sort. It revels in moist land.

Robert B. Lalltoute, New York City, writes: "Planted April 6th, we dug in sixty-four days some of your Six Weeks potatoes the size of hens' eggs"

You have got the best early and the earliest potato in existence. We had the Early Six Weeks Market potato large enough for the table in six weeks from planting. They outvielded all other varieties.

August Broeker (Gardener) Allegan Co., Mich.

Ten dollars per bushel would not buy my Early Six We ks Market potatoes if I could not replace them for I ss. They are the earliest of all, and a heavy yielder. I predict they will be universally grown by market gardeners for early, and those gardeners who get them first will reap handsome profits.

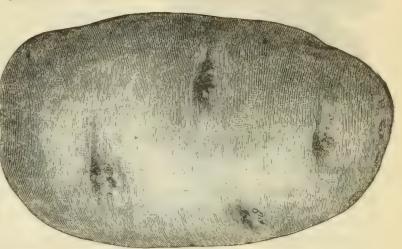

JACOB E. STILSON, Onondaga Co., N.Y.

## NEW QUEEN.

This has become exceedingly popular. It is very early, a capital cropper, yielding fine, large tubers, so handsome that half of them, without culling, would be good enough to exhibit at any agricultural fair. Under high cultivation, there are almost no small ones. In quality it is most excellent, the flesh being a pure white and of that sparkling, mealy texture that we all like so well in a potato when brought on the table. In shape and color it closely resembles its parent, the Beauty of Hebron.

# EARLY FORTUNE POTATO. (New.)

We have raised this potato on a large scale, and find it to be a very carly sort and a splendid cropper. They are of good quality and cook dry. Our customers can make no mistake in

planting the Early Fortune. It will give the best results, if cut to single eyes and these are planted 12 to 14 inches apart on land that has been liberally manured. The extra profit of the early market is what we are all after, and it is these extra early varieties of potatoes that bring it. In our own experience we are not prepared to say that either the Early Roberts or the Early Fortune are earlier than Early Six Weeks, but we find that they yield much better and that the tubers are less liable to scab or rot.

#### Carman No. 3.

The Carmen No. 3, with the exception that the tubers are a little more elongated, is in its origin and appearance like the Carman No. 1 a seedling from seedlings raised through several generations. The eyes are very shallow and but few in number. Of the shapeliest form, and even in droughty seasons its perfect shape is retained. A great yielder of large potatoes. It may fairly be claimed that it does not yield any small tubers in ordinary seasons. It bears its tubers very close to the plant, a single turn of the fork turning out every potato of the largest size. A perfect keeper. Both skin and flesh are of extreme whiteness. At digging time our workmen preferred this to any of the numerous white varieties on the grounds. Very valuable for the main field crop.

Our claims for the Carmen No. 3 are: 1st. It is one of the handsomest large potatoes ever produced. 2nd. It will outyield most varieties. 3rd. Practically every potato is of marketable size. 4th. Its table qualities are good. It has no hollow hearts

and no dark parts.

# PRICE LIST OF POTATOES. (Per Express or Freight at Purchaser's Expense for Charges.) We will supply up to and including three varieties in one barrel at barrel rates.

We would advise our customers at the South to order potatoes in the fall, as there is more or less danger of their being injured by frost if forwarded between December 1 and April 1. While, therefore, we will guarantee, in filling such orders, to use our best judgment, all potatoes ordered to be forwarded between those dates must be at the risk of the purchaser, but if any customer wishes to order them before April 1st and is willing to take the risk of freezing we will ship them at any date requested.

#### If Ordered per Express, Customers can Deduct 8 cents per Pound from Mail Prices Named Below.

# GIANT PERPETUAL SPINACH SWISS CHARD.

This, though a variety of Chard, is to all practical purposes a giant spin-ach, the huge curled leaves being tender and cooking readily with a decided spinach flavor. Its great merit is that it will supply the greens from spring until late in the fall. The large midribs can be cooked and served like asparagus.

Mrs. E. C. Main, Mar-

blehead, writes: — "To-day we cooked some of your Spinach Beet and found it very fine. It tasted as good as any spinach we ever ate."
William T. Knight, Marblehead, writes: "Your Spinach Swiss Chard was simply grand."

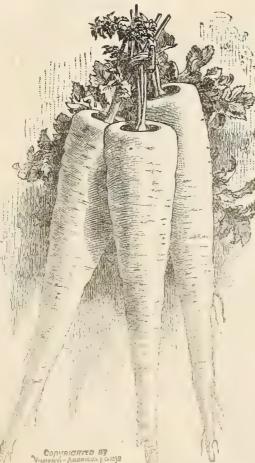

Price, per 1-4 pound, postpaid, 30 cents; per ounce, 16 cents; per package, 5 cents.

#### FERRY'S IMPROVED LARGE PURPLE EGG PLANT,

We tested this new variety in our experimental grounds, and found it decidedly earlier than the standard sorts. Say the introducers: "This variety has about superseded all others, both for market and private use. The large size and high quality of its fruit and its extreme productiveness make it the most profitable to grow. Plants large, spreading; foliage, light green; fruit, very large, oval; color, dark purple. Plants ripen usually two to six large fruits. It is spineless, which is a great advantage in handling. Per ounce, 25 cents; per package, 5 cents.

#### ABBOTT'S IMPROVED HOLLOW CROWNED PARSNIP.

The roots of this variety are long but not too long; it generally has a very clear, smooth skin and is easily distinguished by the leaves rising from a depression on the top of the root. Parsnips do best on a deep, rich, sandy soil, but will do well on any soil which is deep, mellow and moderately rich. Some dairymen grow these to feed to their stock. Price, per pound, postpaid, 58 cents: per 1-4 pound, 20 cents: per ounce, 10 cents; per package, 5 cents.

## VICTORIA SPINACH.

This variety has this to recommend it, that while it fully equals the Long Standing in being slow to run to seed it has a thicker leaf than that variety. Color, a rich dark green. Price, per pound, postpaid, 38 cents; per 1-4 pound, 15 cents; per ounce, 10 cents; per package, 5 cents

WARD'S NECTAR MUSKMELON.

This, which we introduced over 30 years ago, is still a firstclass variety of green fleshed muskmelon. Of medium size, exceedingly prolific, sweet, rich and delicious, we confidently bring it anew to the attention of our customers. Price, per pound, postpaid, \$1.00, per 1-4 pound, 30 cents; per ounce, 10 cents; per package, 5 cents.

# ARLINGTON DOUBLE CURLED PARSLEY.

This is specially a market gardener's strain. One of the most successful of these says of it: "The plant is very robust and of free growth. The leaves are large, very dark green, and beautifully curled. An exceedingly large yielder, while it stands the heat, cold and drought better than any other." Price, per 1-4 pound, 35 cents, per ounce, 15 cents; per package, 5 cents.

#### RUBY KING PEPPER.

are always remarkably mild and pleasant to the taste. They can be eaten sliced like cucum-Very handsome and very produc-tive. They need to be started in a hot-bed. Price. per oz., 25 cents: per pkg., 5 cents.

#### NEW VIRGIN MUSHROOM SPAWN.

It is a fact well known that mushroom spawn produced in the ordinary methods degenerates in both the quality and quantity of the crop. Dr. Repin has, after many failures, succeeded finally in raising spawn by sowing the spores of the best mush-room, which is called "Virgin Spawn." This is characterized by its great vigor of growth, and produces the best of mushrooms, that are not so liable to be attacked by disease. now offer this to our customers, obtained directly from the laboratory in France, where it is manufactured in compressed, sterilized manure slabs, thoroughly pervaded by the spawn, about 1-2 inch thick. Price, per pound, postpaid, 68 cents; per -4 pound, 20 cents.

# PUMPKINS.

SUGAR PUMPKIN.

This is the pumpkin for the traditional Yankee pumpkin pie. All others (the Gibson excepted) are coarse and barbarous when compared with this, and to bring them, when prepared in any way, to the table is to rob the stock and wrong the family. Not so with this gem of the pumpkin tribe. For it is also excellent as a good table delicacy, either simply boiled or when entering into the composition of the traditional pumpkin pie. If fed to the cows it both increases and greatly enriches the quality of the milk, besides imparting to it a rich

yellow. About as fine grained as the average squash. It grows to average five pounds, and yields enormously, the ground covered with the golden fruit being a sight not soon forgotten when once seen. There is quite a call for the Sugar pumpkin in our city markets, where they bring from half to two-thirds as much as the best of squashes. Price, per pound, postpaid, 75 cents; per 1-4 pound, 20 cents; per ounce, 10 cents; per package, 5 cents.

# MAMMOTH RED ETAMPES PUMPKIN.

This mammoth, which has been raised to weigh over one hundred and fifty pounds, has a brilliant, showy, red skin. The flesh is very thick, and in quality is about equal to any of the Mammoth class of pumpkins, whose real value is for stock feed. Our stock is the purest raised, no strain is perfectly Price, per pound, postpaid, \$1.58; per 1-4 pound, 48 cents; per ounce, 15 cents; per package, 5 cents.

> For quick out door sort try the Earliest White.

# RADISHES,

Ultra and Scarlet Globe.

# NE PLUS ULTRA RADISH. Deep Scarlet Strain.

This is now accepted as a standard variety for forcing, being fit for the table in three weeks. Flesh tender and delicate;

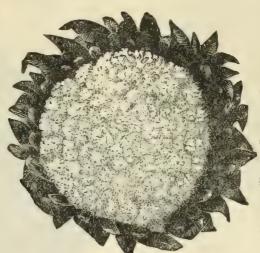

produces but few small leaves. Price, per pound, postpaid, 78 cents; per 1-4 pound, 25 gents; per ounce, 10 cents; per package, 5 cents.

ICICLE. A handsome first-class early variety, in color snowy white. It grows to the average length of the long varieties, but holds its fullness well down to the tap-root. Exceedingly attractive and excellent in every way. Price, per ounce, 10 cents; per package, 5 cents.

# MATTITUCK ERFURT CAULIFLOWER.

(Novelty of 1903.)

This is a new candidate for the favor of gardeners, sent out by Mr. Marsh, a seed grower of Washington, who for many years has been experimenting with all the known varieties of early cauliflower. He writes us, "We had sixteen of the best varieties of cauliflower growing on our trial grounds and the Mattituck made the most perfect heads, and but one of the varieties was earli-er and that made but 70 per cent. of

For forcing try the Ne Plus

#### BECKERT'S CHARTIER RADISH.

good heads. One firm to whom I sent seed on trial gave glow-

ing report and have ordered 20 lbs. of seed. The seed is giving satisfaction everywhere. The Mattituck has come to stay. The

great beauty of it is the leaves grow curled over the heads, so

that by breaking a few and bending over the head there is no need of tying as they blanch perfectly without." We tested Mr. Marsh's new cauliflower in our experimental grounds last

season; they were perfection itself. Price, per ounce, \$2.00;

This radish has rapidly grown into high favor for spring and summer use. It is very hand-some, about one-third of its length being of a rose color. We find them in our experimental grounds to be as early as Covent Garden. It is very popular among market gardeners. Price, per pound, postpaid, 68 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

per package, 25 cents.

#### TRIUMPH.

All early, round radish, white with horizontal stripes of bright scarlet. It is strikingly handsome and attractive, making it valuable as a novelty. strain is not quite perfectly established, but a large percentage come true. Short leaved, and of very thick growth. Price, per ounce, 30 cents; per package, 10 cents.

BECKERT'S CHARTIER.

CRIMSON GIANT FORCING. (Novelty of 1902.) This novelty is quite a new type amongst all sorts of Radishes at present in the market, as the knolls or roots of the same, fully developed, resemble in size a Summer radish without becoming hollow or fuzzy. The "Crimson Giants" gain a circumference of 5 to 6 inches and a weight of soul i 1-2 to 2 ounces without losing in delicacy and tenderness. When sowing it is therefore

necessary to allow plenty of space for their proper development. This novelty combines the advantages of a good hot house radish with that of a Summer radish and there is certainly a great future in store for it. The color as already mentioned is crimson, the shape varies a little, the roots are either quite round or

sometimes a little oval. Price, per 1-4 pound, 50 cents; per ounce, 20 cents; per package, 5 cents.

# SQUASHES.

# HE NEW GOLDEN BRONZE SQUASH.

"A cross, some four years ago, of the Bay State and Boston Marrow. In form the same as the last named, with stem and blossom end precisely like that vaiety, also having that peculiar wrinkled appearance of the skin, like the Boston Marrow. Size, averaging from eight to ten pounds; color, a dark, grayish green with bronze on upper surface when ripe; flesh an exceedingly bright golden yellow; fine grained, very sweet, and of good flavor. Early in maturing, a good keeper and yielder. Squashes of very uniform size and appearance. It combines the quality desired for the table and pies. Specimens grown in 1897 were kept until June, 1898.

Mr. M. B. Faxon, who introduced to the public the famous "Faxon Squash," thus writes of this new variety:

I have closely watched the development, and tested this squash for two years, and I feel sure it is a most desirable new vegetable. A good cropper and splendid keeper; in fact, I may say that, both as a table squash and for pies, it will, in my opinion, at once become a great favorite.

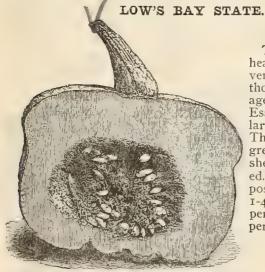

M. B. FAXON.

Eliza G. Reynolds, Marblehead, writes: "I was at dinner at my aunt's table on Nov. 7, and partaking of some boiled squash, I said to her, 'This squash is of extra fine quality,' and she said in reply, 'This is Gregory & Son's New Golden Bronze." Mr. and Mrs. G. P. Craige, Antrim, N. H., write: "For good flavor, for dryness, for sweetness, for good shape, we think that your new squash [The Golden Bronze] cannot be excelled." Mrs. M. Otis, Boston, Mass., writes: "I have thoroughly tried your new squash, both as a table vegetable and for pies, and in both cases it has proved to be of the finest quality. It is a very thick-meated squash, and a most splendid keeper." Katherine Rich, Brookline, Mass., writes: "I have tested your new squash several times, and I have tested your new squash several times, and I have tested your new squash several times, and I have tested your new squash several times, and I have tested whave ever seen. It cannot fail to be very popular." Writes Harry L. Thomas, Hingham: "Exceptionally fine one for table use, having a particularly rice texture and flavor." Writes William H. Thomas, Hingham: "I consider your new squash superb. The flavor is of the best. I believe it to be a great acquisition." Writes William Fearing, 2d, Hingham Centre: "The squash received of you for table use excels anything which I have ever before used. A good thing and should be pushed along." pushed along.

Price, per pound, postpaid, \$1.23; per 1-4 pound, 40 cents; per ounce, 15 cents;

per package, 5 cents.

This variety, with heavy manuring, is a very good yielder, though in size it averages a little below the Essex Hybrid. Popular in Boston Market. The color is dark green; it has a thick shell, and is thick meated. Price, per pound, postpaid, \$1.28; per I-4 pound, 40 cents; per ounce 15 cents; per package, 5 cents.

THE WARREN.

The Warren (of which we were the original introducers) has a shell generally harder and thicker than the Essex Hybrid, and the color is of a richer and deeper orange, while the quality is decidedly better. The Warren is now grown very extensively by marketmen. The seeds of this variety are extremely scarce this year. Price, per pound, postpaid, \$1.28; per I-4 pound, 35 cents, per ounce, 10 cents; per package, 5 cents.

MAMMOTH CHILI.

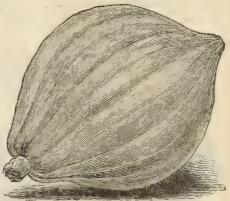

The Mammoth squashes, though of but little value for table use, on rich land, in those sections where roots are but little cultivated, are very profitable as food for cattle. If you wish to grow a "big" squash to exhibit at your annual fair, try this. Seed never perfectly pure. Price, per ounce, 20 cents; per package, 5 cents.

#### MAMMOTH WHITE BUSH SCALLOP.

This variety is about twice the size of the ordinary White Bush Scallop and much whiter and handsomer. Price, per pound, postpaid, 88 cents; per 1-4 pound, 25 cents; per ounce, 10 cents; per package, 5 cents.

## DUNLAP'S EARLY PROLIFIC MARROW.

The standard early of the running varieties. No variety can compete with it for earliness, it being about twelve days ahead of Boston Marrow. Very productive. Color a brilliant orange-red; a good keeper. Price, per pound, postpaid, \$1.08; per 1-4 pound, 30 cents; per ounce, 10 cents; per package, 5 cents.

#### GOLDEN HUBBARD.

A very distinct sort of the shape and general character of the Hubbard, but a little smaller; earlier to mature and of rich orange-red color, instead of the dark olive-green of the old Hubbard, while the flesh is a little deeper colored. Price, per pound, postpaid, \$1.48; per 1-4 pound, 45 cents; per ounce, 15 cents; per package, 5 cents.

# THE AMERICAN TURBAN.

This standard squash is as good for fall as the Hubbard is for winter; in proof of which please see extracts in former catalogues from letters re-

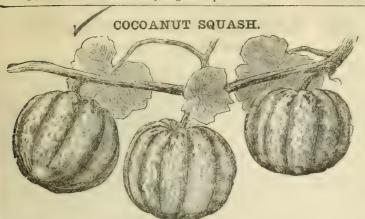

Price, per pound, postpaid, \$1.28; per 1-4 pound, 35 cents; per ounce, 10 cents; per package, 5 cents.

Vegetable Seeds Enough for a family garden for \$1.00. See page 51.

Ruhana Metz, Chambersburg, Pa., writes: "Your seeds have always given per-

SQUASHES.—Continued.

ect satisfaction, your Squash seeds especially.

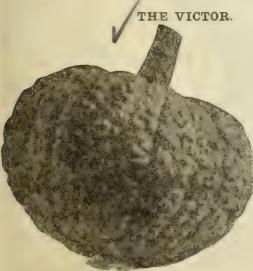

A fine little squash for family use which succeeds where other varieties fail; very prolific, yielding from six to a dozen to the vine. The flesh is fine grained, sweet, and very solid, and the quality excellent, being remarkably hardy. With its rich green and gold coloring, it makes an ornament that would grace the center table. Price, per ounce, 15 cents; per package, 5 cents.

#### THE FAXON.

The strong and fixed characteristics of this squash are earliness, long keeping, variety of colors, and the excelling in richness, sweetness, and flavor. It is very productive, though rather below the average size (five or six pounds). It is a good keeper, and has the exceptional recommendation of be-

ing a table delicacy during three seasons,—summer, fall, and winter. Mr. Joseph Stone, a squash expert, states that for sweetness and dryness the Faxon squash cannot be excelled, if equalled, and says: "I know what I am talking about." We think he does. Price, per pound, postpaid, 88 cents; per I-4 pound, 30 cents; per ounce, 10 cents; per package, 5 cents.

This new squash we which first to catalogue, is of a rich orangeyellow color, generally with a hard shell thickly cov-ered with warts. The flesh is thickmeated and the quality good during its season, which is from September till December. An excellent cropper, the squashes being of the size of the Essex Hybrid. They very heavy, are

handling like blocks of oak. Per pound, postpaid, \$1.53; per 1-4 pound, 45 cents; per ounce, 15 cents; per package, 5 cents.

# STRICKLER SUMMER SQUASH.

This variety of Summer Crook-neck we find grows twice as large as the common sort, averaging from 5 to 6 pounds in weight. The two engravings show

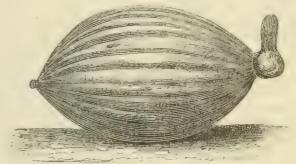

# WINTER CROOKNECK.

Of all vegetables to preserve from season to season please commend us (as we kindly commend you) to the Winter Crookneck squash. It is a sure grower, with a quality of its own, not fine, but with a flavor of old time, and a first-rate keeper. It is perfectly at home in the homestead, for we have kept them well for two years, and so we invite customers to join with us in reviving a custom which is truly honored in the observance, that of growing some Winter Crooknecks and hanging them up in the

kitchen, as did our fathers of old. Price, per pound, postpaid, \$1.58; 1-4 pound, 40 cents; ounce, 15 cents; package, 5 cents.

#### BOSTON MARROW.

This is a standard fall variety of a rich orange color and very productive. It was introduced and named in 1834 by John M. Ives of Salem, Mass. The above engraving represents its original form, but by careful selection it has been made rounder in shape like the Golden Bronze (see page 30).

We would recommend the Boston Marrow for table use until the close of November, when it can be succeeded by the winter varieties. It is the standard squash for pies. Price, per pound, postpaid, \$1.08; per 1-4 pound, 30 cents; per ounce, 10 cents; per package, 5 cents. Wm. F. Tucker Kenyon, R.I., writes: "Your New Golden Bronze quash was carefully tested by me the

SQUASHES. — Continued.

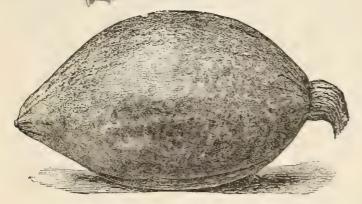

past season and I find it to be a valuable introduction. It is thick meated and a splendid keeper.'

#### WARTED HUBBARD SQUASH.

This form of the Hubbard is a great favorite with many marketmen, as it is very striking in appearance, and having been selected for years from exceptionally large specimens, it crops heavily. The warty knobs draw general attention, and it sells in the market better than those having smooth shells. We do not think it of as good quality as the smooth-shelled sort, and the greater hardness of the shell is more apparent than real. The large size to which it has been developed has been accomplished, we think, with some sacrifice in purity, for we find that in the course of years it is necessary to cross the warted variety on the smooth Hubbard to retain the shell. Price, per pound, postpaid, \$1.58; per 1-4 pound, 50 cents; per ounce, 15 cents; per package, 5 cents.

In this squash, which we introduced, the combination of sweetness, dryness and delicious flavor is something really remarkable. Its outer color is a light blue. A great favorite where known. J. M. Merrick, Wilbraham, Mass. wrote:-"The Marblehead Squash seeds I had of you produced a large crop of very fine quality of fruit. I had 1200 pounds from 13 square rods of land." Price, per pound, postpaid. \$1.28; per 1-4 pound, 40 cents; per ounce, 15 cents; per package, 5 cents.

## THE STONE TOMATO.

The Stone is excellent for main crop; it is very large, and of bright scarlet color; spherical in shape; very smooth, with occasionally a specimen very slightly octagon shaped; ripens evenly to the stem; exceedingly solid and firm fleshed, of hull. It ripens a week or ten days earlier than the Mansfield.

Not Subject to Rot .- Prof. J. L. Budd, of Iowa State Agricultural College says: "It was large enough, smooth, firm fleshed, and, above all. not subject to rot. I did not see a rotten specimen, although a bad year for rot."

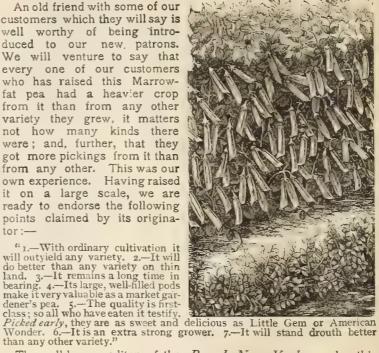

Price, per ounce, 25 cents; per package, 5 cents.

# THE MARBLEHEAD EARLY MAR-ROWFAT PEA.

An old friend with some of our customers which they will say is well worthy of being introduced to our new, patrons. We will venture to say that every one of our customers who has raised this Marrowfat pea had a heavier crop from it than from any other variety they grew, it matters not how many kinds there were; and, further, that they got more pickings from it than from any other. This was our own experience. Having raised it on a large scale, we are ready to endorse the following points claimed by its originator:-

"1.-With ordinary cultivation it will outyield any variety. 2.—It will do better than any variety on thin

The well-known editor of the Rural New Yorker makes this statement: "Pods large, often containing eight peas. immensely strong; remains in bearing a long time. Comes in after the earliest. First picking July 1; a fine kind." Close after the earliest sorts. Per peck, per express, \$1.75. Per quart, postpald, 50 cents; per package, 10cents.

SNOWFLAKE FIELD BEANS.

COPY-FIGHTED 188

The snow. flake is so well liked by many among our cus-tomers of long standing that we believe our new patrons who may make trial of it will thank us for having called their attention to its merits.

The cut was engraved from a photograph of a vine raised on our farms. This is a decided improvement on the common standard pea beans in earliness, having dry beans eighty days from the time of planting. It is an upright grower and a great bearer. The pods are packed thick, in clusters, and ripen in August, all ripening at once.

leaves falling earlier than with some varieties open the pods to the sun. Enormously productive.

Mr. S. H. Seamans, of Milwaukee, counted one hundred and

twenty completely filled pods on a single vine.
Samuel Sabin, Dorset, Minn., writes: "From one ounce of Snowflake Beans from you I grew 14 pounds of good beans.

Price, per peck, per express, \$1.50; per quart, postpaid, 40 cents; per package, 10 cents.

JAMES J. H. CREGORY & SON'S RETAIL CATALOGUE.

F. W. H. Speegle, Trimble, Ala., writes:—"Your Earliana Tomato is good as well for late as for early On Nov. 12, 1900, we gathered 1-2 bu. from three vines, ripe and fine."

# TOMATOES.

Anna Currier, Plainfield, Wis., writes:—"Your Stone Tomatoes are the best I ever raised, Although our summer was very dry they grew to an extremely large'size."

### LIVINGSTON'S BEAUTY TOMATO.

This (now a standard) is as early as the Acme or Perfection, of a glowing crimson in color, with a slight tinge of purple. In shape perfectly spherical. It has a thick skin, and hence is not so liable as some other varieties to crack just after a rain. Has more solid flesh and fewer seeds than average kinds. Price, per ounce, 25 cents; per package, 5 cents.

### BUCKEYE STATE.

Mr. Livingston says of the Buckeye: "In addition to its extra large size, it is also smooth and uniform, and, though so large, is the heaviest cropper we have ever grown. It yields immense clusters of from four to ten purple, luscious solid fruits." Price, per ounce, 25 cents; per package, 5 cents.

### BOND'S EARLY MINNESOTA.

This is the earliest of all the round spherical sorts. Of a dark red color, round as a ball, firm of flesh, and very productive; size below the average. Our customers will find it a choice variety to open the market with before the larger sorts have ripened. Price, per ounce, 20 cents; per package, 5 cents.

### DWARF CHAMPION.

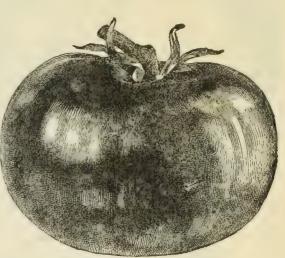

This variety grows stiff and upright, with very thick and short-jointed stems. Fruits perfectly spherical and very brilliant in color. It can be planted as close as three feet. The foliage is very dark green in color, thick and corrugated. To crop heavily it should be liberally manured. It has become very popular. Per ounce, 30 cents; per package, 10 cents.

### NOLTE'S EARLIEST TOMATO.

(See first cover page.)

For heavy mucky soil the Nolte's is much the best of all early varieties while for gravelly, strong land the Earliana gives better satisfaction.

This gave great satisfaction on our trial grounds last season. That most excellent sort for most locations, the Earliana, in some quarters fails to do its best, while Nolte's appears to adapt itself to a greater variety of conditions. being otherwise very similar to the Earliana in earliness, size, shape of fruit

and vine. Though the vine is small the fruit compares well in size with the standard sorts. Quality excellent. On our grounds, which were in a high state of cultivation, we gathered 70 bushels of ripe tomatoes from 75 plants. Price, per ounce, 30 cents; per package, 15 cents.

### THE MAGNUS.

When Mr. Livingston informed us that he had a new tomato to put on the market we had some fear lest he was overdoing the matter of introducing new varieties, feeling that he had already brought out what seemed to be the best that was possible, but after having given the Magnus a test as a market tomato on rather a large scale, we are now ready to heartily endorse all the good things he has said in its favor. Color, purple; vine, potato leaved. It is thicker, heavier and more solid than either Acme or Beauty. While perfectly adapted to main crop planting, yet it matures so quickly that it will take first rank for early market. The form is perfect, uniform, large and attractive. Flesh is very firm. It is a robust grower, with short joints, setting its fruit clusters closer together than most varieties, and is therefore a heavy cropper. The fruits are very deep from stem to blossom end, many of them being almost globe-shaped. It ripens evenly, does not crack about the stem, and the flavor is most desirable. Excellent, either for open field or greenhouse. Price, per ounce, 25 cents; per package, 5 cents.

Pliny Mosher, No. Westport, Mass., writes: "Your Magnus Tomato is unsurpassed in quality. Our customers will buy no others as long as they can get the Magnus."

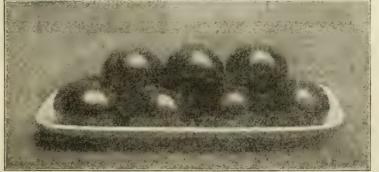

### ENORMOUS.

This new tomato may well be called the Enormous, for Mr. Miesse, its originator, exhibited a dish of them, any eight of which placed in a row would measure a yard. This means, of course, that the tomatoes must have averaged 4 1-2 inches in diameter. The tomatoes average symmetrical, are solid meated, and are every way of excellent quality. A good cropper. It is doubtless the giant among the round tomatoes. The only objection to it is that a small variety now and then appears in the strain. Price, per oz., 20 cents; per package, 5 cents.

### EARLIANA.

The Earliana is the early tomato for gravelly but the Nolte's gives better satisfaction on heavy mucky soil.

Last season we classified the Earliana as by all odds the best very early large round tomato that has been introduced for years. Our experience has led us to modify our estimate only so far as to state that on some soils Nolte's, which closely resembles it, has given greater satisfaction. Though early it is also of fine market size, grows about as round as a bail, color a bright-red, so-

lidity and quality all that could be desired. We will add one other valuable characteristic which the intro-ducer has overlooked and that is that though the tomatoes are of such good size the vines are exceptionally small, which will admit of their being planted a quarter nearer than standard sorts. Price, per package, 15 cents, per ounce, 40 cents.

E. S. Horton, Winterton, N. H., writes: "The Earliana Tomato from you last spring produced the finest early tomatoes that I eyer knew. And they were as large, handsome and shapely as they were early."

John Marschal, Galveston. Tex., writes: "I must say that your Earliana Tomato is the best I eyer raised for early use."

M. B. Huntley, Jacksonville, Me., writes: "Your late introductions in tomatoes—the Earliana and New Magnus—are simply first-class. They were both ready to pick in August...

J. R. Staneeynke, Chuckey City, Tenn., writes; "Your White Egg Turnips were very fine."

# TURNIPS.

H. A. Candage, South Blue Hill, Me., writes: "Your Carter's Elephant Swede Turnip planted on rockweed on clay loam land grew the most splendid shaped of any that I ever raised."

### WHITE EGG TURNIP.

By all odds the most popular of this class of turnips.

Six hundred bushels of this fine turnip have been raised to the acre as a second crop, bringing the market gardener who raised them two hundred dollars.

It is perfectly smooth, of a pure, clear white, growing half out of ground, and at times to the size of a Ruta-baga. A very choice kind for table use, of excellent flavor, sweet and mild. It pulls clean from the ground, and with its thin, snow-white skin, looks almost as attractive as would a basket of huge eggs. It is a first-rate keeper for winter use. Our stock is from headquarters. Comes to size for use just after Early Red Top. Price, per pound, postpaid, 58 cents; per I-4 pound, 20 cents; per ounce, 10 cents; per package, 5 cents.

BUDLONG.

An American white Ruta-baga, earlier and rounder than any other of the sweet German, Improved White French, Rock or Russian turnips, all of which names are given, in dif-

ferent localities, to the various strains of white Ruta-Baga. Mr. Budlong, probably the most extensive raiser of Ruta-bagas in New England, has by years of careful selection, produced this excellent strain. Price, per pound, postpaid, 58 cents; per 1-4 pound, 20 cents, per ounce, 10 cents; per package, 5 cents.

SCARLET KASHMYR.

The beautiful pinkish red color of this new turnip makes it very striking. It is unique among turnips, bearing some resemblance to a large radish. It produces large, smooth, white-fleshed roots, of excellent keeping qualities. Among the earliest. Price, per pound, postpaid, 48 cents; per 1-4 pound, 20 cents; per onnce, 10 cents; per package, 5 cents.

### IMPROVED PURPLE TOP SWEDE.

A very early, free-growing variety, with short neck and small top; flesh, deep yellow. "The handsomest Purple Top Swede in cultivation," says the English firm who introduces it. Price, per pound, postpaid, 48 cents; per I-4 pound, 20 cents; per ounce, 10 cents; per package, 5 cents.

### EARLY PURPLE TOP MILAN.

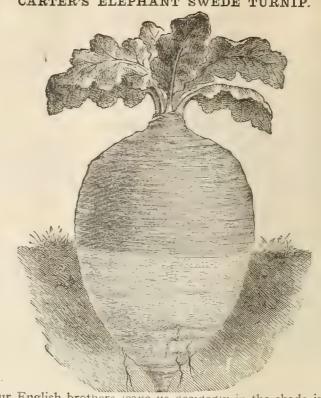

This variety of turnip is sent out by the same reliable firm that sent out the Munich. Earlier than the Munich. Of the strap-leaved class, flat in shape, and of excellent quality. Price, per pound, postpaid, 68 cents; per 1-4 pound, 20

cents; per ounce, 10 cents; per package, 5 cents

By test made in our experimental grounds, we find this new salsify to be a decided improvement on the common kind. It is a distinct sort; it makes larger roots than the standard

CARTER'S ELEPHANT SWEDE TURNIP.

Our English brothers leave us decidedly in the shade in the raising of turnips, especially of the Swede class, and if any improvement is made in varieties, it is usually by them. The Messrs. Carter, a standard authority in varieties, present to the public a new turnip which they have named Elephant Swede. It has been tested in England, Scotland and Ireland, and side by side with the standard varieties, including, of course, Skirving's, and has proved to be superior to all of them, in some instances giving as much as ten tons more per acre. Price, per pound, postpaid, 48 cents; per 1-4 pound, 20 cents; per ounce, 10 cents; per package, 5 cents.

### EXTRA EARLY WHITE MILAN.

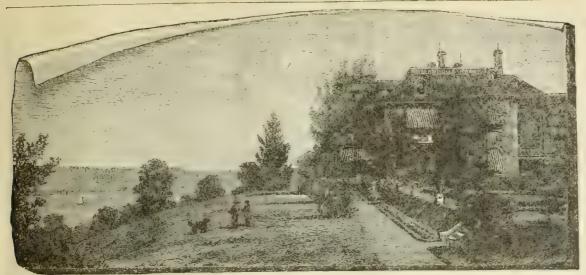

For early use the white top turnips are better than the purple. In our experimental grounds this white variety matured carlier than the Purple Milan, which makes it the earliest of

all turnips. Top and tap root small. Certainly the king of the extra early turnips. The beauty of its clear white color and the fine symmetry of its shape, make this a very attractive variety. It takes in the market. Per pound, postpaid, 83 cents; per

pound, postpaid, 83 cents; per 1-4 pound 25 cents; per ounce, 10 cents; per package, 5 cents.

> variety, while the flavor when cooked we found to be fully as rich. The flesh is of a yellow cast. Our customers will find this an acquisition. Per ounce, 30 cents; per package, 5 cents.

# Try Our Timothy, Red GRAINS AND GRASSES. Top, and Red Clover,

### FINE LAWN GRASS.

For this we offer a mixture of twelve fine varieties of grass seeds, and would recommend it as not surpassed by any Lawn Grass sold in this country. It makes a fine velvety lawn. Sow in April, May, August or September. Manure the land well at the start, and it will last for several years. Price, per peck of 4 pounds, \$1.00; per bushel of 16 pounds, \$3.75; 3 pounds, postpaid, \$1.00; 1 pound, 35 cents.

Carefully read instructions on order sheet.

### LINCOLN OATS.

A Western firm who have had a large experience in oat raising pronounce the Lincoln oat "the best oat now before the American people. First, because of its great productiveness, four farmers having raised from 120 to 174 bushels from a single bushel of seed. Second, because it is very early. Third, because it appears to be nearly rust proof. Fourth, because it stands up better than most kinds. Fifth, because its thin hull, soft rib, and heavy meat make it an excellent feeding oat. Sixth, it makes an excellent oatmeal." We have before us recommendations from twenty-one farmers located in fourteen states, each of which substantiates one or all of the above claims. John S. Hyatt, Hoosac, N. Y., writes us: "From one acre of land planted to your Lincoln oats I raised 78 bushels of fine oats and a very heavy crop of straw." Price, per bushel per express, \$1.65; per peck, 55 cents; 3 pounds, per mail, 50 cents; pound, 20 cents; package, 10 cents.

### IRISH VICTOR OATS.

This variety originated in Ireland and was introduced in America three years ago. The introducers claim that it has proven superior to all other sorts grown in the same section in vigor of growth, stiffness of straw and productiveness. It is a very large oat, plump and heavy, pure white in color, entirely free from rust and smut and a great yielder. It will please every one who plants it. They grew thick and even, stood up perfectly and did not color, as did most oats last season. Those who have tested it are thoroughly in love with the Irish Victor. Price, per peck, per express, 50 cents; per bushel, \$1.40; 3 pounds, per mail, 50 cents; I pound, 20 cents; per package, 10 cents.

### MANSHURY BARLEY.

A six-rowed barley, with very long heads, well filled and heavy; straw bright and strong. In our experimental grounds the Manshury proved to be the earliest of the five leading varieties which were tested there. The Baxter is the only variety we have found to be earlier. Price, per bushel, \$1.50; per express, per peck, 50 cents; per pound, postpaid, 20 cents; per package, 10 cents.

CHAMPION BEARDLESS BARLEY. (New.)

This is an improved beardless barley similar to the Success but it is larger, has a longer straw and yields more per acre. It is perfectly pure and literally beardless, just as represented, which makes it pleasant to handle, while the straw can be fed stock without fear of injury. While growing it looks like wheat but after being threshed looks like other barley. It is earlier than any bearded barley, better to seed with, better for feeding, and yields fully as well. Price, per peck, per express, 60 cents; per bushel, \$2.00; 3 pounds, postpaid, 50 cents; I pound, 20 cents; per package, 10 cents.

### SASKATCHEWAN SPRING WHEAT.

Says Charles A. Pillsbury, of Minneapolis, Minn., of the Saskatchewan (whose mill has a capacity of seventy-five hundred barrels per day): "No such milling wheat has been received at our mill since we have been in the milling business." Per bushel of 60 pounds, per express, \$2.25; per peck, 65 cents; one pound, postpaid, 20 cents; per package, 10 cents.

### ALFALFA OR LUCERNE.

In this the success turns on using American-grown seed, and planting it in deep, porous soil, and keeping clean of weeds the first season. A top dressing, with fine manure, would help it through the first winter. Sow at the rate of 12 to 15 lbs. per acre. Price, per pound, postpaid, 30 cents; per package, 10 cents. Price, per bushel upon application.

### TIMOTHY, RED TOP, AND RED CLOVER SEED OF EXTRA QUALITY.

Every farmer has learned to his sorrow in the course of his farming life that ordinary grass seed as sold at the stores comes mixed with more or less of white daisy, plaintain, thistle, pig weed, smart weed, wild carrot, dock, etc., while in clover he finds buckthorn, plantain, dock in two varieties, smart weed, sorrel, wax weed, etc., and in addition more or less of sand and dirt in buckthorn, plantain, dock in two varieties, smart weed, sorrel, wax weed, etc., and in addition more or less of sand and dirt in buckthorn, plantain, dock in two varieties, smart weed, sorrel, wax weed, etc., and in addition more or less of sand and dirt in buckthorn, plantain, dock in two varieties, smart weed, sorrel, wax weed, etc., and in addition more or less of sand and dirt in buckthorn, plantain, dock in two varieties, smart weed, smart weed, wild carrot, dock, etc., while in clover he finds buckthorn, plantain, dock in two varieties, smart weed, smart weed, wild carrot, dock, etc., while in clover he finds buckthorn, plantain, dock in two varieties, smart weed, smart weed, wild carrot, dock, etc., while in clover he finds buckthorn, plantain, dock in two varieties, smart weed, smart weed, wild carrot, dock, etc., while in clover he finds buckthorn, plantain, dock in two varieties, smart weed, smart weed, wild carrot, dock, etc., while in clover examined at the prime cause for a good deal of vertical plantain, there were sufficient queer seed extends through the weeds being like the dock and daisy, perennials, and therefore very hard to get rid of. The quality of the hay produced on such land is consequently reduced in value. Let us not forget that the extra advantage for using pure seed extends through all the three or five years of the seeding down, and distributing the entire cost through these years, we shall find that it will amount to but a few cents per acre, while the annual difference in the market value of the crops may be a serious one. In one sample of red clover examined at the Department of Agriculture at Wash

# PLANTS FOR FODDER, ETC.

SAND, WINTER, OR HAIRY VETCH. (Vicia villosa.)

One of the pea vine class of plants, exceedingly nutritious, surpassing even the several varieties of clover. It will do better than other fodder crops on poor soil, while on good soil it makes a rank growth of four or five feet. It is a great favorite with cattle and can be fed with safety to any stock. Perfectly hardy all over the United states, and will remain green all winter. Sow for spring use in August or September, mix it with clover, or, in spring, with oats, to help support it. It is one of the earliest of fodder crops for spring cutting,—a full crop can be cut in season to plough and plant any other crop on the same land. Wherever Scarlet Clover winter kills, by all means plant this. In the South and dry West it will make a capital hay crop by fall sowing it, for it will make its growth in the fall and spring months, before the dry weather sets in. One bushel per acre, with half bushel of Rye. Price, per bushel of 60 lbs., \$8.50; per peck of 15 lbs., \$2.25; three lbs., per mail, 75 cents; one lb., 30 cents; package, 10 cents.

### MILO MAIZE.

Yields from six to sixteen stalks from one seed; much sweeter than cornstalks. It stands wind and drought that would ruin corn. It will sprout again after cutting. Grows from six to ten feet high. Four pounds of seed plant an acre. Price, per peck of 15 pounds, express, \$1.25; per pound, postpaid, 20 cents; per package, 10 cents.

GIANT BEGGAR WEED. (New.)

A new forage plant which appears to be especially of value for the South. This seed is hard to vegetate. The Commissioner of Agriculture for Florida advises "every farmer in the South to give this new plant a trial. It is superior to corn, peas or clover, because it is more fattening than either, or any forage plant known, and will thrive on much poorer land. Price, per pound, postpaid, 65 cents; per 1-4 pound, 20 cents; per package, 10 cents.

### KAFFIR CORN.

The stalks of this keep green and are brittle and juicy, making fodder, green or dry, which is relished by cattle, horses and mules. To Kaffir Corn, Doura, and Milo Maize stand dry weather better than corn, and will thrive west of the 100th meridian, where the seasons are too dry for corn. Its seed heads, eight or ten inches long, are eagerly eaten by horses, hogs and fowls. It cannot be relied upon to mature its seed in the latitudes of New England. Price, per peck, of 15 pounds, by express, \$1.25; per pound, postpaid, 20 cents; per package, 10 cents.

### YELLOW DOURA.

This is earlier than the Branching Doura (or Milo Maize) and is not so delicate in starting. The grain, which is abundant, is readily eaten by cows, horses, hogs, and mules. It grows from nine to twelve feet high, bearing the grain on the large tops. Price, per peck of 15 pounds, \$1.25; per pound, postpaid, 20 cents; per package, 10 cents.

### COW PEAS.

The black variety. This is of great value, both in the Southern and in the Northern states as a green summer feed for sheep and as a green crop for ploughing under to enrich the soil. Sow for ploughing under at the rate of two bushels to the acre and with oats at the rate of I I-2 bushels of each per acre. Price, per bushel, per express, \$2.25; per peck, 65 cents.

### PEARL MILLET OR MAND'S WONDER GRASS.

We find on trial the difference between Mands Wonder and Pearl Millet to be too slight to make one in any costly degree preferable to the other, indeed, we are inclined to the belief that one or both of them are in the market with interchanged names; such being the case we would recommend our customers to buy the cheaper seed of the two, viz., the Pearl Millet, to which same description of amazing growth and fod-der qualities will equally apply. This will thrive in this country

in any latitude that will produce corn. It is an annual with foliage resembling corn leaves. When fully grown it is from 12 to 15 feet high with numerous heads covered with seed much relished by poultry. Each plant throws out numerous shoots, sometimes as high as 60 and if raised on rich soil and cut when 2 or 3 feet high can be moved from four to five times, yielding many tons of dry hay. If cut when 7 feet high it will yield the heaviest fodder crop per acre of any plant under cultivation. It is sweeter than corn. Don't plant before ground is warm, then it can be planted May 15. On strong land it has given five cuttings, each crop heavier than a good crop of millet.

Sow 6 pounds per acre in drills 3 feet apart or broadcast at the rate of 30 pounds per acre. Price, per pound, postpaid, 25 cents; per 1-4 pound, 10 cents; per package, 5 cents; per pound, per express, 17 cents; 10 pounds and upwards, per ex-

press, 10 cents per pound.

### ORCHARD GRASS.

(Dactylis glomerata.) It is one of the most desirable of all pasture grasses, coming earlier in the spring, and remaining later in the autumn, than any other. It grows to a height of two to two and one-half feet, and produces an immense quantity of foliage. It yields a large amount of hay, and sends up a thick growth very quickly after being cut. It is well adapted to sow either for grazing or for hay. Blossoms same time as Red Clover. Three bushels to the acre; fourteen pounds to a bushel. Price, per pound, postpaid, 30 cents; express, 22 cents.

JAPANESE BUCKWHEAT.

The kernels of this buckwheat are larger than the common kind; the straw is stouter and heavier. It branches more, and it does not need to be sown as thickly; the flour made from it is thought to be equal to that from any other buckwheat; it is a very heavy cropper, and less apt to blight than other varieties. Price, per bushel, \$1.60; per peck, per express, 50 cents; per pound, by mail, 20 cents; per package, 10 cents.

### CANADA FIELD PEAS AND OATS FOR FODDER.

These at the rate per acre of one bushel of peas to one and one-half bushels of oats make very profitable fodder from June 25 to August I, for cows and sheep. The peas should be lightly ploughed in when sown, and the oats broadcasted and brushed in immediately afterward. Price of the peas, per bushel, \$2.25, per express.

THE BEST CORN FOR THE SILO.

Continuing the test of all the large Dent varieties suitable for the silo that are offered, we still prefer and recommend the Leaming. It is very tall and leafy, and the very large ears will mature in New England. The Mexican June variety, just introduced, grows sixteen feet high, the first ear in our experimental grounds starting to feet from the ground. It grows leaves most adundantly, and cannot, we think, be surpassed as a silo corn where stalks and leaves are most desired. When ears count for much, then give us the Leaming before all others. Price, per bushel, of Learning, \$1.75;

### THE HOLLANDER CABBAGE.

The Hollander is one of the best of those hard heading foreign varieties, which have been imported into our markets after spring is well advanced. We find that in this country as fine heads can be raised as are imported. The heads are thick, round, of medium size and about as hard as a rock. Plant at least a fortnight earlier than the common Drumhead, and manure very liberally. Per pound, postpaid, \$2.83, per 1-4 pound, 80 cents; per ounce, 30 cents; per package, 5 cents.

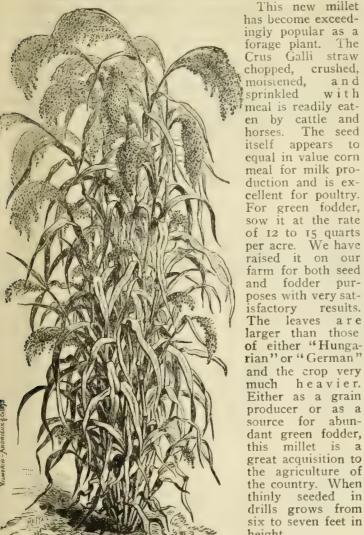

MAMMOTH ROCK RED CABBAGE.

This Wa variety of Red Drumhead which, while in every other respect equal to our standard sort, makes larger heads. The head is large, round, very solid, and of deep red color. Ninety-eight per cent. of the plants will form extra fine heads. Per pound, postpaid, \$2.00; per 1-4 pound, 60 cents; per ounce, 20 cents; per package, 5 cents.

Be sure and write your name on your order; also giving Post Office, County and State. Goods ordered at mail prices are sent per mail, postpaid, by us.

C. S. Chapman, East Hartford, N.Y., writes:— PLANTS FOR FODDER, ETC.—Continued. sheep that ever I had. After being wet four your Crus Galli makes the best winter feed for

### JAPANESE MILLET.—CRUS GALLI.

height. F. R. Woodward, of Hill, N. H., tells us that his cows left sweet fodder corn, Pearl Millet, and common grass, and took Crus Galli in preference. He supposes it was because the stalks were so much sweeter. They increased their milk when fed on it. Mr. Wm. C. Dunham, of Ridgeland Farm writes:
"My yield of Crus Galli was at the rate of 21 3-4 tons per

acre. Sown at the same time as German Millet it gives a valuable succession of green fodder."

J. H. Davis, Pittsfield. Me., writes: "That Japan Millet, Crus Galli, is a great thing for green fodder for stock."

Per bushel, of 35 pounds, per express, \$2.00; per peck, of 8 3-4 pounds, 60 cents; 3 pounds, postpaid, 50 cents; 1 pound, 20 cents; per package, 10 cents.

SOJA OR SOYA BEANS.

We have grown about all the varieties of Soja imported directly from Japan, and from them have selected two to cata-

American Coffee Berry.-This variety of Soja has been sold in the West at fabulous prices. It does not even belong to the coffee family of plants; still it is a fact, as we find by actual test, that when roasted and coarsely ground it tastes so nearly like the Brazilian coffee the difference is scarcely perceptible. there is nothing injurious about it, it being the most nutritious of all vegetable products, and it can be raised almost anywhere where corn will mature, yielding from twenty to thirty bushels per acre. Cows are very fond of the ground beans, and the meal mixed with corn meal makes valuable food for poultry. Price, per bushel, of 58 pounds, \$3.50; per peck, per express, \$1.10; per quart, 30 cents; per quart, postpaid, 45 cents; per package, 10 cents.

Medium Early Green.—This variety grows three or four feet high, giving a very heavy yield of vine, and is very valuable for green forage or soiling. It has ripened its seed in cen-

tral Massachusetts every year for the last ten years.

It appears to have great capacity to resist disease or blight. It is excellent to use for ensilage, layer and layer with corn, for it greatly enriches the ensilage, contributing the rich nitrogenous element in which the corn stalks are markedly deficient. For this purpose the stalks should be cut when the beans are about full sized. Sixteen quarts of Soja and ten quarts of Canada Field corn on one acre make good fodder for August. Price, per bushel, of 58 pounds, per express, \$4.00; per peck, \$1.25; per quart, postpaid, 45 cents; per package 10 cents.

### DWARF ESSEX RAPE.

Essex Rape makes the best of pasturage for cattle, calves, sheep and swine. An average acre is sufficient for ten to fifteen sheep or lambs, to bring them from leaner up to the good working condition without the help of grain in 70 days. Rape is more nutritious than clover and is better for fattening. The most profitable results are attained by waiting till the plants have nearly matured before turning in the stock, which will be about two months from the time of sowing. If turned in earlier the most economical way of feeding will be to make three divisions of the pasture, turning the stock from one to the other, thus giving the plants time to renew their growth. In the more Northern and Northwestern states it gives grazing from early June till the ground freezes, and in the South if sown in the early fall, it will supply grazing the open portion of the winter. It does best on deep, rich, moist soils, the richer the better; good corn soil in good condition will give a good crop of rape. Make the soil very fine, and sow four to five pounds of seed broadcast and harrow well in; or from one to two pounds in drills twenty-four to thirty inches apart. When in drills keep clear at early stages by cultivation. There is danger of bloat in cattle and sheep if turned in on crops when hungry to eat their fill. Either turn in after they have had first feed on ordinary pasture, or change from the rape after a short feed on it. Price, per pound, per express, 10 cents; 25 pounds and upwards, 9 cents per pound; 3 pounds, per mail, 60 cents; one pound, 20 cents; per package, 10 cents.

### POULTRY DRESSING.

We catalogue Poultry Dressing, which is a strictly first-class article made from American-grown sage and other herbs, while the dressings generally on the market often contain foreign grown herbs, which are poorly cured. Price, per box, postpaid, 10 cents; per express, 8 cents; per dozen, postpaid, \$1.00; per dozen, per express, 80 cents.

HONEST SAGE AND MUSTARD.

My wife for years has not been able to find in the market the old-fashioned sage, with its good green color and strong sage flavor. What she found was a dirty-colored article, with scarcely any strength to it, and when for this reason an increased quantity was used, which gave a bitter taste to the dressing. We have recently found a young man who is putting up sage in the good old-fashioned way, using the leaves without the coarse stems, and drying and grinding these by a more laborious process; but by it he is enabled to retain the green color, and what is more important, the strong sage flavor. He is also putting up ground mustard in the same honest way, giving a thoroughly pure article of full strength, whereas that in the market is generally adulterated with Indian menser radials, with some coloring substance added. He puts up his mustard and sage in tin boxes. The mustard weighs four ounces and the sage two ounces per box. We can send these to such of our customers as want a pure article, at 12 cents a box for the sage, and 18 cents for the mustard, postpaid by us; or for 10 and 14 cents respectively, when sither by express or freight, and 18 cents for the mustard. either by express or freight, and two cents less per box of each either way, where a dozen of each is taken. The same trust-worthy young man also puts up sage in the leaf for those who so prefer it. Price, per large package, 12 cents, postpaid.

# Complete List of Vegetable Seeds with Full Prices.

One half bushel at bushel rates; half peck at peck rates; half pound at pound rates; pints at quart rates: As a rule, the earliest varieties are placed at the head of each list.

ASPARAGUS. (German, Spargel; French, Asperge.) For roots see page 51.		PPICES OF SEEDS			
Sow the seed in the seed-bed late in the fall or in the early spring, as soon as the ground can be worked, in drills one foot apart, covering the seed about one inch deep. Thin the plants to three inches in the row. The roots may be removed to the permanent bed when one or two years old. In preparing the ground no pains should be spared, as a well-established and carefully cultivated asparagus bed will continue in good condition for twenty-five years or more. Select deep, rich, mellow soil, using a liberal quantity of well-decomposed manure. Set the roots so that the crowns will be four inches below the surface of the ground in rows three feet apart, and one foot apart in the row. Apply a dressing of manure in autumn, working the same into the ground in the spring, taking care not to injure the roots. The bed will produce shows fit for cutting the second or third year after transplanting. Stop cutting	lb. exp.	lb. mail	1=4 lb.	oz.	pkg.
when peas come to market. One ounce to sixty feet of drill.  Early Giant Argenteuil. (New.) See pages 2-6.  Columbian Mammoth White. See page 9.  FALMETTO. See page 9.  Moore's Crossbred. Select a deep, rich loam and manure with well-decomposed compost. Sow in drills fourteen to sixteen inches apart and cover one inch deep. When the young plants appear, thin to four or five inches apart. For early use, sow as soon as ground can be worked in the spring; for autumn use, about the middle of May; and for winter use, about the 20th of June, according to variety, the LONG varieties requiring more time to nature than the ROLND EARLY kinds. When sown late increase the quantity of seed. To preserve during winter cover with earth to keep from wilting. When cooking boil new beets one hour, and old ones two hours or more.	0.	Ib. mail	1=4 1b.	oz.	
Dirigo. (New.) See page II.  Egyptian. Earler than Bassano. Tops remarkably small.  CROSBY'S EARLY EGYPTIAN. See page II.  ECLIPSE. About as early as the Egyptian. Now a first-class standard early market variety Crimson Globe. (New.) See page II.  LENTZ'S HYBRID. See page II. Planted July 20 were marketable by Nov. I.  FAUST'S NEW CRIMSON OR MITCHELL'S PERFECTED. See page II.  DETROIT DARK RED. See page II.  Early Bassano. One of the earliest; fine in quality.  Bastian Early Blood Turnip. As early as the Bassano, but of much darker color; small top Early Blood Turnip. A standard sort; good for summer or winter.  Arlington Favorite. Fine early sort, dark red, small leaves, good shape, fine flavor.  EDMANDS'. See page II.  Dewing's Early Blood Turnip. Very symmetrical, free from fibrous roots. A popular beet Yellow Turnip. An early sort of a beautiful golden yellow color, the best for quality.  Long Smooth Dark Blood. Excellent for Winter use; smooth skinned; flesh dark red.	50 50 60 40 50 60 40 40 50	58 68 58 68 48 48 48 58 58 58 58 58	18 20 18 18 20 18 18 20 15 15 18 18 18 18 18	10 10 10 10 10 10 10 10 10 10 10 10 10 1	55555555555555
The Mangold Wurtzels are grown for stock, and as they grow larger require more room. They should be sown in drills about two feet apart, and be thinned to twelve or fifteen inches in the row. (See our work on Mangold Wurtzels, etc.) One ounce to fifty feet of drill. Five pounds per acre.  Globe Mangolds succeed better than the long sorts on sandy soil. Do not begin to feed them until midwinter.  GATE POST. Orange-colored skin, no sprangling roots, small top, heavy cropper.  Norbiton Giant. A standard Mammoth Long Red; very extensively grown.  CARTER'S ORANGE GLOBE. The best variety of Yellow Globe.  GIANT YELLOW INTERMEDIATE. See page 11  Golden Tankard. Tankard shaped; flesh deep yellow, with colored rings; good cropper.  IMPROVED AMERICAN SUGAR OR LANE'S. A long white variety; for stock.  Vilmorin's Improved French White Sugar. The variety cultivated for making sugar.  White Silesian Sugar. Raised in France for sugar, also excellent for feeding stock.  Red Giant Ovoid. Very large, oval shape; pulls up very freely from dirt.  Red Globe. Globe shaped, as named.  Yellow Globe. Globe shaped also.	30 25 30	88 93 95 95 95 95 95 95 95 95 95 95 95 95 95	15 15 15 15 15 15 15 15 15	10 10 10 10 10 10 10 10 10 10	5555555555
One of the best shrubs for hedges. Perfectly hardy. Never winter kills, and grows on any soil; makes a thick close, impenetrable hedge that will turn cattle, and promises to be one the hedge plant of North America. The berries make excellent preserves. As the seeds of the berberry do best when planted in the berry, we will receive orders and file them to be filled in the fall, as soon as the fruit is matured and dried.	52	60	18	10	
BRUSSELS SPROUTS. (German, Kopfkohl; French. Chou de Bruxelles.)  A class of plants allied to the Cabbage family, producing great numbers of small heads or sprouts on the main stem of the plant, which are used in the manner of cabbages. Plant in rich soil, in hills two feet apart each way, and thin to one plant to the hill.  LONG ISLAND IMPROVED. Of dwarf habit: very prolific; heads first-class  Balkeith. More dwarf and compact than the old sorts and produces larger sprouts  Dwarf Improved. The standard variety.  Items in capitals are specially recommended.			70 50 45	25 15 15	10 5 5

If your seeds should fail to reach you, when writing please repeat your first order.	Prices of Seeds.				
BROCCOLI. (German, Spargel Kohl; French, Chou Broccoli.)  The Broccoli are closely allied to the Cauliflower family, so nearly so that the Walcheren variety is sometimes and treatment to cauliflower. They require similar cultivation and treatment to cauliflower.	lb. exp.	1b. mail	1b. 1=4	oz.	pkg
Large White Early French. A standard French variety.  Walcheren White. One of the very best.  Purple Cape. Late, large, compact.			80 80	25 25	10 10 10
All the principal varieties of cabbage, making over one-half of the list below, are of our own growing.  Cabbage will thrive on any good corn land, though the stronger the soil the better they will develop. New land is preferable. Plough deep and manure very liberally. The early sorts bear planting from eighteen inches to two feet apart in the rows, with the rows from two to two and a half feet apart; the large varieties to be from two to four feet apart in the rows, with the rows from two and a half to four feet apart, but the largest varieties can be planted a the least distances named and do well. The crops should receive as many as three hoeings and three cultivatings Cabbage will not usually follow cabbage or turnips successfully in field culture, unless three or four years have inter vened between the crops. For late fall marketing, plant drumhead sorts from June 10 to 20. For minute information see our treatise on "Cabbage." One ounce to about two thousand plants.					
EARLIEST VARIETIES.					
Earliest. (New.) See page 13	$\begin{bmatrix} 2 & 50 \\ 2 & 00 \\ 2 & 25 \end{bmatrix}$	2 58 2 58 2 08 2 33	75 75 60 65	$\frac{25}{20}$	5 5 5 5
field, though not quite as early. Very popular among market gardeners.  ALL-SEASONS. See p. 12. Now the standard early large drumhead variety.  DANISH SUMMER BALL HEAD. (New.) See page 13.  Very Early Etampes. A fine, early heart-shaped sort; Resembles Wakefield.  Little Pixie. A small, tender cabbage, pointed heads. Earlier than Early York; heads hard Early York. One of the earliest; an old standard sort.  EARLY SPRING. (New.) See page 12.  GLCRY OF ENKHUISEN. (New.) Our prices "per express" apply also to goods to be forwarded per railroad.	PRICES OF SEEDS.				
CARROT. (German, Moehre; French, Carotte.)	lb. exp.	lb. mail.	1=4 1b,	oz.	pkg.
Carrots thrive best in a sandy loam free from stones. The ground should be well manured with fine, well rotted of composted manure, six or eight cords to the acre, and be thoroughly worked quite deep, by two ploughings made at right angles with each other. Also cultivate and drag, if there are any lumps, and then rake level, burying all remaining lumps and stones. Plant in rows fourteen inches apart and thin plants three to four inches in the rows. Plant from the middle of April to the middle of May, to insure crop. As the dry spells, which sometimes prevail in June, are apt either to prevent the germination of the seed, or to burn the plants as soon as they appear above ground, it is therefore advisable to increase the quantity of seed which, under the circumstances, will give the crop a be technice. Keep very clean of weeds. One ounce will sow 150 feet of drill. (See our work on "Mangolds and Carrots.")		man,	10,	oz.	pkg.
Early Very Short Scarlet. Earliest and smallest of all varieties; special value for forcing.  Early Scarlet Horn. Early short variety for forcing; excellent for table; color deep orange Long Red Coreless. (New.) See page 14.  SHORT HORN. The standard early variety; sweeter than Long Orange. Good to color butter CHANTENAY. See page 14. The market gardeners find that this is just what they want.  GUERANDE. See page 14. Enormous cropper; can be pulled by hand.  DANVERS. See page 14. Extra selected gardener's strain. Very fine.  Improved Long Orange. See page 14.  Improved Short White. See page 14.  LARGE WHITE BELGIAN. Productive; good for horses; can be pulled by hand.  Yellow Belgian. Grown partly out of ground; capital for late keeping of stock  CAULIFLOWER. (German, Blumenkohl; French, Choufleur.)	90 80 70 70 90 1 10 75 85 50 65	98 88 78 78 98 98 1 18 83 93 58 73	30 30 25 25 30 30 35 30 18 18 25	10 10 10 10 10 10 10 10 10 10	5 5 5 5 5 5 5 5 5
Pursue the same course as with Cabbage, manuring rather heavier and hoeing oftener. Plant the late varieties early as they require the whole season to mature in. Cauliflowers covet the cool, moist weather of the fall months to perfect themselves. One ounce for two thousand plants.  MATTITUCK. (New.) See page 29.  Early Padilla. (New.) See page 14.  Extra Early Dwarf Erfurt. Specially selected. Very early, hardy, dwarf and compact.  Early Paris. A standard early variety. A standard around Paris.  Italian Early Giant. Fine, large, white-headed and early.  EARLY SNOWBALL. See page 14. Very dwarf, very early and reliable. 1-4 ounce, 75 cents Early London Market. The best strain of this standard English sort.  THORBURN'S GILT EDGE. See page 14.  Long Island Beauty. See page 14.  Carter's Defiance. This sort is fine for forcing or very early use.  Lenormand's Short-Stemmed Mammoth. Dwarf, large and fine; reliable; plant early.  Autumnal Late Giant. Very large headed and productive; late; plant early.  LATE ALGERIAN. Large, late sort; popular with the New York gardeners; plant early.			6 00 6 00 1 80 1 75 8 00 1 50 7 25 5 90 5 90	2 00 60 60 2 40 50 2 20 2 00 60 60	25 20 10 10 25 5 25 20 15
CELERY. (German, Sellerie: French, Celeri.)  This vegetable can be grown as easily as beans. Plant seed in hot-bed or very early in open ground. Transplant four inches apart, when three inches high, in rich soil finely pulverized; water and protect until well rooted, then transplant into rows five or six feet apart, either on surface or in well-manured trenches a foot in depth, half filled with well-rotted manure. Set the plants from eight to twelve inches apart. To blanch, draw earth around the plants from time to time, taking care not to cover the tops of the centre shoots. For winter use in the family celery needs to be hilled up only eight inches. One ounce of seed gives about four thousand plants					
New Rose Ribbed or Golden Rose. (New.) See page 15.  PARIS GOLDEN YELLOW LARGE SOLID. See page 15. Headquarters stock.  Boston Market. This is the short, bushy, compact, solid Roston variety.  BOSTON MARKET, ARLINGTON STRAIN. (New.) See page 15.  EVANS' TRIUMPH. (New.) See page 15.  Dwarf Golden Heart. Half dwarf, silvery white, with golden heart; perfectly solid.  Crawford's Half Dwarf. Of rich nutty flavor, vigorous grower, ornamental for table.  White Plume. See description on page 15.  GIANT PASCAL. See page 15. Stock from the originator.  Perle le Grand. Medium dwarf in habit, good for early use and keeps well for winter.  WINTER QUEEN. (New.) See page 15.  Kalamazoo. Cream white, large size, ribs broad, grows quick, of fine flavor.  Solid Ivory. The perfection of a dwarf celery; compact in habit; crispy and of fine flavor.  Perfection Heartwell. Medium green; tall, vigorous grower, makes a large tender heart.  New Rose Dwarf. Has the good-keeping qualities of the red sorts, and is of a fine pink color London Red. Dwarf, solid and crisp; a first-class variety.  Turnip Rooted. (Celeriac.) The old standard sort. Celeriac is used for flavoring soups.  Large Smooth Paris Turnip Rooted. This grows better and smoother than any other Celeriac Old Celery. For flavoring pickles, etc.	2 90 4 50 1 50 4 50 1 92 1 40 1 90 2 90 2 92 1 42  1 40 1 90 1 40	1 58	90 1 40 50 1 40 65 40 40 60 60 85 40 40 40 35 40	30 45 15 45 20 20 20 30 15 25 15 20 15 25 15 20 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5	10 5 10 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5 5
CHICORY. (German, Cichoren Worzel; French, Chicoree.)  Pursue the same manner of cultivation as for carrot. If to be used as a salad, blanch the leaves by covering, so as to exclude the light. If raised for its root, dig at about the same time as carrots, wash the roots, and then slice them either way, and dry thoroughly by artificial heat.  Large Coffee Rooted. Used as a substitute for coffee	55	63	20	10	5
COLLARDS OR COLEWORTS.  A class of plants closely allied to the cabbage family, used as greens in the sandy sections of the South. Transplant when four inches high into rows three to four feet apart, according to the richness of the soil, and one and one half feet apart in the row. Thin during the summer to three feet apart in the row.	90	98	25	10	5

Be sure you write your name on your order, giving Post Office, County and State.	PRICES OF SEEDS.				
Do not plant before the ground has become warm—nothing is gained by it. Drill cultivation is more profitable than hill cultivation. The smaller varieties may be planted with the drills two and a half feet apart, and the stalks thinned to ten inches apart; the larger sorts should have the drills three to four feet apart, and the stalks a foot apart in the rows, and the largest dent varieties eighteen inches apart. Use some rich manure in the drills. Frequently stir the earth around the roots by hoe or cultivator, but do not draw it up about the stalks. For a succession of corn for family use to be planted at the same time, we would recommend Cory, Lackey's, Crosby's, Potters' Excelsior, Stowell's and Egyptian Sweet. One quart for two hundred hills. Plant Cory by July roth, and if the season is an average one you will have green corn early in November.		bush ex.			pkg.
SWEET VARIETIES FOR FAMILY USE AND MARKETING IN GREEN STATE.  (German, Zucker Maize; French, Sucre maize.)  MAMMOTH WHITE CORY. See page 16.  CORY. Now the acknowledged standard early market sort. Our stock is fine.  White Cory. See page 16. Preferred by many on account of its color.  EARLY ESSEX. (New.) See page 16.  LACKEY'S NEW EARLY SWEET. This comes in just after Cory and surpasses it in sweetness.  Package only  Rendel's Early Giant. (New.) See page 16.  ORIGINAL CROSBY. Early short stocked, twelve to sixteen rowed, and of a rich flavor.  Crosby's New Early Sweet. First-rate every way, either for market or family use.  EARLY BOSTON MARKET. The only early mammoth sweet; twelve to sixteen rows.  Moore's Early Concord Sweet. Twelve to sixteen rows, standard second early, ears large.  QUINCY MARKET. (New.) See page 16. This comes in before Crosby's Early.  Stabler's Early. Second early, twelve rowed, large eared; very sweet.  Perry's Hybrid. See page 16.  POTTER'S EXCELSIOR OR SQUANTUM. See page 16.  MEXICAN SWEET. In sweetness and tenderness this excels all varieties we are acquainted with  COUNTRY GENTLEMAN. (New.) See page 16.  Champion. Large eared; twelve rowed; comes along with Moore's Early. Pure white kernel Marblehead Mammoth Sweet. See page 16. The largest sweet variety grown. A fine strain Livingston's Evergreen. See page 16.  STOWELL'S EVERGREEN SWEET. Green till cold weather; ears large; a standard late EGYPTIAN SWEET. DANDELION. (German, Bardeplum; French, Dent de Lion.)					
This vegetable has become very popular as an early, healthful green, and the roots also are used, when dried, as a substitute for coffee. Its use in either of these forms is particularly recommended to those who are inclined to any disease of the liver. Sow in May in drills one foot apart, covering the seed a half inch deep. A rich soil is preferable but this plant will thrive anywhere.					
ARLINGTON. (New.) Leaves finer than Imp. Thick Leaved, very popular in Boston market  Improved French Thick Leaved. Own growing; saved from open blossoms. 5 pounds per express \$16.25. Seven hundred bushels have been grown on three-fourths of an acre	4 00		1 25 1 00		10
Improved Broad Leaved. A new strain highly recommended to market gardeners	2 00	2 08	1 50 60	$\begin{array}{c} 50 \\ 25 \end{array}$	10 5
Plant the seed in March in a hot-bed; or for family use, in flower-pots in a warm window. Transplant in open ground after weather has become warm and settled, in rows two feet apart each way. They require a rich soil and as favorable a location for warmth as the garden will afford. One ounce to fifteen hundred plants.  White Pearl. (New.) Creamy white, grows large; prolific, of superior eating quality  Very Early Dwarf. A French variety of Long Purple; extra early  Black Pekin. A variety of Round Purple. Blackish violet leaves; fruit very large  LONG PURPLE. Earlier and more productive, but smaller than Round Purple	2 75 2 00	2 83 2 08	60	30 30 20	5 5 10 5
New York Improved Long Purple. Surpassing all in size of fruit. Standard market sort FERRY'S IMPROVED LARGE PURPLE. (New.) See page 28	3 50 3 00	3 58 3 08	20	35 25	10 5
For early use sow as soon as the ground can be worked in the spring, in drills fifteen inches apart, and thin plants to six or eight inches in a row. Any common garden soil will do; but a rather moist situation is preferable. To blanch the leaves, gather them carefully together when perfectly dry, and tie with matting or any soft fibrous material. Another method is to invert flower-pots over the plants. The leaves are very highly esteemed for use as salads. One ounce for three thousand plants.					
Fine Curled Mossy. Very ornamental. A little more curled than the London  Broad Leaved Batavian. A large summer variety	1 12 1 12 1 12	1 20 1 20 1 20	35 35 35	15 15 15	5 5 5
GARLICS  Plant the bulbs on exceedingly rich soil, in rows or in ridges 14 inches apart, and six inches apart in the rows.		33	15	10	
They are cultivated for their flavor (which is similar to the onion, but more powerful), and are used in soups, etc.					
Plant the larger sorts in hills two by three feet apart, and thin to one plant to the hill. Select deep rich soil, and cultivate as cabbage. Some of the varieties are very ornamental, and scattered singly are attractive in the flower garden, being finely curled and variegated with green, yellowish white, bright red and purple leaves. The tender caves are used as cabbage. One ounce for about two thousand plants.  Large Leaved Jersey. Large curled, light-green leaves, with white ribs.  Carter's Thousand Head. Remarkable for the great amount of green feed per acre, hardy.  Siberian or German Greens. Sow in the fall for use in the spring.  GREEN CURLED TALL SCOTCH. One of the best varieties for the market.  DWARF GREEN CURLED. Very hardy; a standard market sort.	90 90 67 75	98 98 75 83 83	25 25 20 25 25 25	10 10 10 10 10	5 5 5 5 5
KOHL RABI or TURNIP CABBAGE. (German, Kohl Rabi; French, Chou Rave.)  Prepare ground as for cabbage, then plant about the first of June in rows two feet apart, thinning plants to twelve inches in the row. To preserve over winter treat as turnips. When young their flesh is tender and resembles a fine Rutabaga, with less of the turnip flavor. When fully matured, they are excellent for stock. One ounce for three thousand plants.  VEARLY White Vienna. A standard early kind.	1 60	1 68	5	20	5

New Goliath. The largest of all the varieties; deep purple.  Large Purple. Very large, hardy and productive	1 90	1 98	50 60	20 20	5
LEEK. (German, Borro; French, Poireau.)  Select good onion soil, manure liberally, and plant in April in drills made six to eight inches deep and eighteen inches apart, and thin to nine inches apart in the drill. Gradually draw the earth around the plants, until the drills are filled level with the surface. Draw for use in October. To be used in soups or boiled as asparagus. One ounce for a thousand plants.  Broad Scotch or Flag. A large and strong plant.  American Flag. A good variety.  LARGE MUSSELBURG. A standard English variety.	1 45 1 00 1 45	1 53 1 08 1 53	50 30 50	10	5 5 5
Extra Large Carentan. A very fine extra large winter variety	1 20	1 28	35	15	5
Lettuce covets a rich and rather moist soil. The rows should be about twelve inches apart, and the plants thinned from eight to ten inches apart for the heading varieties. When heads are not desired it may be grown in a mass. The more rapid the growth the better the quality. Some varieties are peculiarly adapted for early culture, others for summer growth. One ounce for three thousand plants.  NEW HOTHOUSE FORCING. See page 18. Especially adapted to hot-bed culture; large heading  White Tennis Ball or Boston Market. An early sort, small heads, very hardy; winter culture HITTINGER'S ARLINGTON FORCING. (New.) See page 18. One of the best for forcing Large Boston. For growing under glass; the largest of the White Tennis Ball strains	3 00 1 00 3 00	3 08 1 08 3 08 1 58	1 00 30 1 00 50	12 30	10 5 10 5
BLACK-SEEDED TENNIS BALL. Hardy, early large heads. Favorite in Boston Market Market Gardener's Private Stock. (New.) See page 23.  DENVER MARKET. (New.) See page 18.  Stone-Head Golden Yellow. Test this for forcing quality with the very best variety you know Grand Rapids. Beautiful in appearance, strong grower, tender and crisp. Fine for forcing Myer's All Right. Fine heading sort; light green, purple tinge; fine "crunchy" quality Early Curled Silesia. Early, sweet; a popular variety for hot-beds or early outdoor culture Maximum. Slow to run to seed; medium green with yellow heart; makes large solid heads The Morse. (New.) See page 23.  Early Curled Simpson. Resembles Silesia, but is more curled and not so early.  Black Seeded Simpson. An improvement on the Simpson, being finer in many respects.  Early Prize Head. An acquisition; runs to seed slowly; very tender and of fine flavor.  Satisfaction or Salamander. One of the best summer cabbage sorts; light green.  Drumhead. Very large; heads crisp and tender. A standard sort.  HANSON. See page 18. Extremely popular.  SUGAR LOAF. See engraving and description on Page 18.  Green Fringed. Extremely ornamental: the leaf edge being elegantly fringed; unique.  MARBLEHEAD MAMMOTH CABBAGE. See Page 18.  Deacon. Large, very solid lasting heads of an attractive green color; very crisp and tender. Defiance. Light-green color, makes large heads; does not seed quickly. Fine for summer. Buttercup. Bright chrome yellow, combining delicate flavor with beauty of foliage.  Blonde Block-Head. A fine heading summer variety, of a bright yellowish green color.  RED BESSON. Heads as well as Fottler's cabbage; of fine quality. Brown and green. True Boston Curled. The most elegant lettuce of all. Quality good; very popular.  All-the-Year-Round. Does not tend to seed; heads hard and crisp.  Oak Leaved. Leaves oak-shaped; very striking in appearance; tender and sweet.  Brown Genoa Cabbage. Head stained with red. One of the best for summer or winter use White Paris Cos. The standard Cos var	1 17 1 00 1 50 1 00 1 00 1 00 1 00 1 00 1 00	1 58 1 08 2 48 1 23 1 08 1 08 1 08 1 08 1 08 1 08 1 08 1 08	30 30 30 30 30 30 30 30 30	20 12 12 12 12 12 12 12 12 12 12 12 12 12	055555555555555555555555555555555555555
<i>y</i>	1 92	2 00	58	20	5
Plant two by two feet apart, leaving only one plant in a place. This produces an abundance of large, showy flowers. The young pods when sufficiently tender to be easily punctured by the nail, are used for pickles.					
MUSKMELON, (German, Canteloupe; French, Melon.) (Of the numbers printed against the items below, 1 indicates green-fleshed, 2 salmon-fleshed.)					
Select warm and light soil; a poor light soil is better than a cold and rich one. Thoroughly work the soil; manure with a rich fertilizer or a rich compost, having the hills six feet apart for the musk varieties, and eight or nine for watermelons. Do not excavate hills, but work the manure just under the surface, as the roots of all vines naturally seek warmth. Pinch the more vigorous vines from time to time, and work in a fertilizer between the rows. Plant a dozen or more seeds in each hill, but do not leave over two plants. Sprinkle young plants liberally with plaster or Persian Insect Powder to protect from depredation of insects.					
Extra Early Hackensack. Much earlier than Hackensack, well netted and of good quality Extra Early Cantaloupe. The earliest of the musks; large, showy, and of fair flavor Early Jenny Lind. An early sort; favorite with gardeners. Early Nutmeg or Green Citron. Boston variety; early, and of fine flavor ROCKY FORD. (New.) See page 19. Christiana or Boston Pet. (True.) - Remarkable for quality; early. Norfolk Button. (New.) MUSHROOM SPAWN. Full directions for cultivation on label.  New Virgin. (New.) See page 28.  English.  MUSTARD: (German, Seuf; French, Moutarde.) For Ground Mustard see page 37.	60	68 25	20 10		
Sow in drills one foot apart and cover seed lightly. Thrives readily in almost any soil. Water frequently in dry yeather, and for a succession sow every two weeks during the season. Used principally for salads.  Chinese Large Leaved. A fine sort for greens.  White or Yellow. For salad or medicinal purposes.  NASTURTIUM. (German, Nasturtium; French, Capucine.)	60 30	68 38	20 20	10 10	5 5
Plant in May in rows; the climbing varieties to cover some arbor or fence, or climb or twine around the house; the dwarf kind in hills or in rows two feet apart. The leaves are used for salad, and the seeds when soft enough to be easily penetrated by the nail, for pickles. If each plant of the dwarf variety is allowed room to perfect itself, the plants grow very symmetrical.  Tall. An ornamental climber. Several fine varieties mixed	1 00	1 08 1 08	30 30	10 10	5 5
OKRA or GUMBO. (German, Fafrau; French, Gumbo.)  Select warm and rich soil, and plant when the ground becomes warm, in rows two feet apart, thinning plants a foot apart in the row. The pods are used to thicken soups, being gathered when young. In the North they require the warmest locations and it is better to start them in a hot-bed. The seeds are a long time in germinating.					
Early Dwarf. White, small and round; pods smooth	40 40		15 15 15	10 10 10	5 5 5

Items in capitals are specially recommended.

Vegetable seeds enough for the family garden for \$1 00. See page 51.		EDS.			
ONION. (German, Zweibel; French, Oignon.) Full description of many varieties on pages 22-23.		1	1		
In some parts of the country the term "Silver-Skin" denotes a white variety, in other parts a yellow variety. Please indicate in your order which you want. The soil should be free from large stones. Apply from ten to twelve cords of rich, fine compost to the acre. Plough not over five inches deep, and work well with the cultivator. Plough again at right angles with first furrows, and cultivate again. Now rake level and fine, and plant seed in rows four teen inches apart at rate of four pounds to the acre. Keep very clean of weeds. When ripe, pull and dry very thoroughly before storing. For full particulars see our work on "Onion Raising." Plant onion sets two inches apart in rows a foot apart. To grow sets, plant the seed at the rate of thirty to sixty pounds to the acre.	exp.	lb. mail	1=4 lb.	oz.	pkg.
NEW HARDY WINTER. (New.) See page 2  EARLY FLAT RED. Like Cracker except color. Capital for short seasons.  Early Yellow Cracker. An improvement on Large Yellow, being earlier. (Our own growing.)  Early Round Yellow Danvers. Large, round profitable. A choice selection. (Our growing.)  YELLOW GLOBE DANVERS. See page 23 (Western grown.)  EARLY RED GLOBE DANVERS. Most productive of the reds. (Our growing.)  Southport Early Red Globe. Rounder than Early Red Globe; good for fail. (Our growing.)  Philadelphia White. The best variety to grow sets from.  White Portugal. Very early; mild flavored; not a good keeper.  Yellow Strasburg or Large Yellow. A late standard variety.  SOUTHPORT YELLOW GLOBE. See page 22. Eastern grown.  SOUTHPORT WHITE GLOBE. Eastern grown. Risky growing north of Mass.  SOUTHPORT LATE RED GLOBE. Eastern grown. Would not advise north of Conn.  LARGE RED WETHERSFIELD. Eastern grown. Very large, pleasant flavored; keeps well. PARSLEY. (German, Petersilie; French, Persil.)  Select rich soil and sow the seed in drills, one foot apart, covering one-eighth of an inch deep. The seed is usually from fifteen to twenty-five days vegetating. Thin plants to four inches apart when two inches high. The beauty of the plant may be increased by several successive transplantings. It is used principally for flavoring soups, etc., and garnishing in its natural state; also for edgings in flower-gardens and bouquets  ARLINGTON DOUBLE CURLED. (New.) See page 28.  Beauty of the Parterre. Most beautiful foliage of intricate quilled leaflets; fine.  Plain or Single. The old standard sort.  New Perpetual. This variety does not tend so much as the others to run to seed.  FERN LEAVED. A most beautiful, mossy sort; valuable for decoration.  Dwarf Curled. Finely curled; good for edging or table ornament.  Myatt's Garnishing. Double, curled; a standard English sort.  CARTER'S CHAMPION MOSS CURLED. Elegant for garnishing.  Carter's Covent Garden Garnishing. Probably the best of its type.	1 00	1 08 78 48 73 68 68 68 73 73	25 15 23 20 20 20 20 23	15 10 10 10 10 10 10 10	5555555
PARSNIP. (German, Pastinake; French, Panais.)  Give the richest and deepest soil to the long varieties of Parsnip; the Turnip sort will grow well on shallow soil Make the soil very fine, and plant the seed very early, in rows eighteen inches apart, thinning plants to three to five inches in the rows. The seeds should be planted shallow. To keep well in the ground over winter draw a little earth over the tops.  Large Dutch. Large and sweet. A standard kind	50	58		10	5
ABBOTT'S IMPROVED HOLLOW CROWNED. The best hollow crowned. See page 28 Maltese. A new long English variety  PEAS. (German, Erbsen; French, Pois.	50 50	58 58	20 20	10 10	5
Of the numbers printed against the Peas, I indicates first early class; 2, second early; and 3, late class. Those marked with (*) are wrinkled varieties, the sweetest of all, but, being liable to rot, need to be planted thicker and later than the round sorts. While the tall sort will run too much to vine if liberally manured, the dwarf varieties, on the contrary, need liberal manuring. Have the dwarfs that grow not over fifteen inches high in rows two and one-half feet apart; those varieties attaining the height of from two to three feet, in rows three feet apart; and the rows of the tallest sort four feet apart. One quart to 150 feet.	peck exp.	bush.	qt.	qt. mail

RADISH. (German, Rettig; French, Radis et Rare.)  For early use sow in spring as soon as the ground can be worked, in drills six to ten inches apart, covering seed half inch deep. Thin plants an inch apart in the row. As the roots are more succulent and tender when grown quickly, a rich, light soil should be preferred, and trequent watering in dry weather will be found beneficial. For a succession, sow every two weeks. Nearly all of the varieties named below are French grown. One ounce for one hundred feet of drill.	lb. exp.	lb. mail.	1=4 lb.	oz.	pkg.
CRIMSON GIANT FORCING. (New.) See page 29.  ICICLE. See page 29. Ine finest long white.  Triumph. See page 29.  Earliest White. A new forcing radish, also for open air; olive-shaped, white, quick growing Ne Plus Ultra. Deep Scarlet. See page 29. Headquarters stock.  EARLY SCARLET GLOBE. For forcing and open ground; not apt to grow spongy.  Early White Short Leaved. The best white*turnip, tops remarkably short; also for forcing Earliest Erfurt Scarlet Turnip. Shortleaved; extra early, medium scarlet; glass or openair Early Scarlet, Olive-Shaped. Very early and handsome; quick growth; tender, excellent.  FRENCH BREAKFAST. Fine variety of the Olive Radish, scarlet body and white root Red Turnip-Rooted. Early scarlet. Standard early, popular in markets of New York.  SCARLET TURNIP WHITE TIPPED. The name defines this elegant new turnip radish New Leafless. Leaves few and very small. Fine to grow amongst cucumbers in greenhouses Deep Blood Red. Early, deep blood red, oblong turnip-shaped, of fine quality.  Long Brightest Scarlet. Medium long, of a vivid scarlet color, tipped with snow white.  BECKERT'S CHARTIER. Long variety, rose color with white tip. Does not grow pithy BOSTON LONG SCARLET. The longest of the long scarlets; headquarter's stock.  Carter's Selected Long Scarlet. Carter & Co's. best Favorite with Boston market gardeners. Wood's Fine Frame. For cultivation under glass; very early. Shaped between olive and long Covent Garden or Long Scarlet Short Top. The standard long scarlet variety.  GOLDEN YELLOW SUMMER TURNIP. Spherical root. Color very rich; very early.  White Turnip-Rooted. For summer and winter use.  Strasburg. A white summer and autumn variety. It grows four inches long, two inches thick Giant White Stuttgart. Very large white summer sort; quicker growth; stands heat.  Black Spanish. The round variety; for winter use.  CHINESE ROSE WINTER. The best for winter use. Grows large and tender.  Large White Russian or California Winter. From the Chinese in California. An acquisition Mixed Varieties, r	1 50 80 70 65 50 55 52 55 52 60 140  50 60 65 55 52 70 60 65 70 67 70	1 58 88 	50 30 1 00 25 25 20 20 20 20 20 20 25 25 20 20 20 20 20 20 20 20 20 20 20 20 20	10 30 10 10 10 10 10 10 10 10 10 10 10 10 10	550555555555555555555555555555555555555
RHUBARB. (German Rhabarder; French, Rhubarb.) For prices of roots see page 51.  Sow the seed in drills eighteen inches apart, and cover half inch deep. Thin the plants to a foot apart. When the plants are one year old, prepare the ground for the final bed by trenching two feet deep, mixing a liberal quantity of manure with the soil. Set plants five feet apart each way. Do not cut until the second year, and give a dressing of manure every fall. If it is desired at any time to increase the bed, the roots may be taken up in the spring and divided. The seed will not usually give plants like the parent.  Mammoth. The largest of all.  Linnaeus. Large, tender, and of excellent flavor. A well-known market variety.  SALSIFY OR VEGETABLE OYSTER. (German, Saferwurzel; French, Salsafis.)	1 40 1 40	1 48 1 48	50 50		5 5
Sow early in spring, in light, rich soil, in drills fourteen inches apart, and thin the plants to three inches in the row. The roots will be ready for use in October, and will sustain no injury by being left in the ground during the winter. When cooked the flavor somewhat resembles the oyster.  WISCONSIN GOLDEN. (New.) See page 34.  Common.  MAMMOTH SANDWICH ISLAND. Grows much larger and smoother than the com-	2 00 90	2 08 98	65 25	30 10	5 5
mon; popular  SPINACH. (German, Spinat; French, Epinard.) Write for quotations for Spinach in quantities.  For summer use sow early in the spring, in drills eight inches to one foot apart, covering the seed one inch deep. Select rich soil and manure very liberally. A succession may be obtained by sowing at intervals of two weeks through the season. For very early spring use, sow in August. The plants are sometimes protected through the winter by a thick covering of straw. Spinach is used principally as greens for boiling, and is very highly esteemed for this purpose	1 17			12	5
ROUND LEAVED. A good summer variety.  GIANT THICK-LEAVED. A fine strain of the Round Leaved.  Victoria. (New.) Dark green, very thick leaf; long in running to seed.  Long Standing. As its name implies, latest in seeding, and one of the best for garden use BLOOMSDALE OR NORFOLK SAVOY. Springy leaved keeps longer after cutting.  Extra Large Round-Leaved, or Viroflay. Grows to a large size.  Prickly Seed. The hardiest variety; thick leaved. For fall sowing.  New Zealand. Makes large plant; endures drought; best quality. Fine as a foliage plant.  SQUASH. (German, Garten-Kurbiss; French, Courge.)	25 30 30 30 30 30 25 90	33 38 38 38 38 38 38 38	15 15 15 15 15		5 5 5 5 5 5 5 5 5 5
All vines delight in warm and rich soil. Prepare the ground by thoroughly pulverizing. Manure at the rate of eight or ten cords to the acre, working it just under the surface with the cultivator or gang plow. Plant in hills nine to ten feet apart for running varieties, and five or six feet apart for bush sorts; work some rich fine manure into each hill. Leave two plants to the hill. Keep well covered with plaster in early stages of growth. Cultivate equently. For full particulars in every department, see our work, "Squashes, and How to Grow Them."  MAMMOTH WHITE BUSH. See page 30.  White Early Bush. Earliest summer sort.  Summer Crookneck. Early.  Golden Bush. Differs from the White Bush only in color.  STRICKLER'S SUMMER. See page 31.  DUNLAP'S EARLY PROLIFIC MARROW. See page 30. Good for late planting.  Dunlap's Early Prolific Marrow. A fine strain; our own growing.  Boston Marrow. A standard fall squash, of a rich orange color, and very productive	80 75 75 75 1 00 1 00 2 00	88 + 83   83   83   1 08   1 08   2 08   1 0	25 25 25 25 25 30 30 65 30	10 10 10 10 10 10 30 10	5 5 5 5 5 5 5 5 5

When seeds are ordered to be sent by express or railroad the cost of transportation will be at expense of purchaser.						
American Turban. See page 30. Decidedly one of the best of fall squashes.  The Faxon. (New.) See page 31.  Essex Hybrid. Of the shape of the Turban and shell of the Hubbard. A standard for fall WARREN. (New.) See page 30.  GOLDEN BRONZE. (New.) See page 30.  DELICIOUS. (New.) See page 4.  Bay State. See page 30.  MARBLEHEAD. For full description, see page 32.  BUTMAN. Lemon colored flesh; fine grained; delicious flavor; fine early winter variety  Golden Hubbard. (New.) See page 30.  HUBBARD. Our intrduction; now the standard winter squash throughout the United States The Victor. (New.) See page 31.  WARTED HUBBARD. (New.) See page 31.  Mammoth Yellow Chili. Grows to weigh from 100 to 300 pounds. See page 30.  CANADA CROOCKNECK. The small, well-known, excellent kind.  Large Winter Crookneck. See p. 31. The old standard sort, the best keepers; coarse graine  SUNFLOWER. TONATO. (German, Liebes-Apfel; French, Tomato.)  If All of the list below, with but few executions, are cf our own growing, or grown for us by the originator. Sow the seed in March and April in the hotbed, or in pots in a sunny exposure in the house. If it is desired to make very healthy, stocky plants, they may be transplanted or reported when about two or three inches high. When five or six inches high, if the ground has become warm, transplant to the open ground, on a rainy or cloudy day it possible; if not the young plants should be liberally watered and shaded from the hot. If it is desirable to have the fruit ripen as early as possible, in preference to a heavy crop, select rather light, poor soil, and a sunny location Trimming off the laterals, training to a stake, and propagating by ships, are believed by many to promote carliness. Set the plants four feet apart each way, upon mounds of earth, to allow the foliage to open and let the sun in anough the fruit of the part of the plants and the plants and earline to each and the company of the fruit of the plants and earline to promote carliness. For early use sow the small sort as soon as the ground can be worked in the spring, in drills, fourteen inches apart; the Rutabagas thirty inches. As the seed is very fine, it should be covered but slightly. Select light, if possible, new soil, and manure with ashes or phosphates. Should the young plants be troubled with insects, a sprinkling of plaster will be found beneficial. Of the early varieties, thin the plants to six inches apart, and the Rutabagas to one foot. For fall and winter use the early kinds should be sown from the middle of July to the middle of August, and the Rutabagas from the middle of June to the first of July, using one and a half pounds of seed to the acre. "Swede" and "Rutabaga" being synonymous terms, the names below, given as they are generally used will be readily understood. The English varieties are almost exclusively used for early planting for market.					
EARLY VARIETIES. (white and yellow fleshed.)					
EXTRA EARLY WHITE TOP MILAN. (New.) See page 34	75	83	25	10	5
PURPLE TOP MILAN. See page 34	60	68	20		5
Early Purple Top Munich. A very early, deep Purple Top variety, earlier than Red Top.	50	58	20		5
Early White Dutch or Early Flat Dutch. Sharp leaves, small neck and top, clear white	40	48	20	1	5
<b>EARLY RED (OR PURPLE) FLAT TOP.</b> Fine, sweet, mild; rapid grower; very popular	40	48	20		5
EARLY WHITE TOP FLAT. Differs from Red Top only in color	40	48	20		5
Scarlet Kashmyr. See page 34	. 40	48	20		5
Purple Top Globe. Contesting the field with Red Top; a thick, round, quick growing variety	y 40	48	20		5
White Stone or Snowball. A thick, Early White Top. The favorite in the London market	40	48	20		5
Golden Stone. A fine, oblong, yellow-fleshed variety; very handsome; an acquisition	. 40	48	20 20		5 5
Orange Jelly. A round, yellow, English turnip, of finer quality than Golden Ball	40	48	20		5
Yellow Finland. Elegant; less eaten by worms than most sorts. Good for table or stock	40	48	20		5
Green Top Aberdeen. Round, yellow-fleshed, and firm; a good keeper	40	48		.10	5
WHITE EGG. See page 34. Headquarters stock. Large, handsome early; keeps first rate	50	58	20		
WHITE EGG. See page 34. Headquarters stock. Large, handsome, early; keeps first rate Pomeranian White Globe. A very fine White Globe variety; round and thick	. 40	48	20	10	5
LONG WHITE COWHORN. A fine strain, matures quickly, carrot shaped, fine and swee	t] 50	58	1	10	
White Tankard. In shape resembling a tankard; white-fleshed; a very heavy cropper	. 45	53	20	10	5

As we expect a supply of Paris Golden and Giant Pascal Celery Plants, will customers wanting kindly write us about July 10 and oblige.

E have aimed to include in our collection of Flower Seeds standard varieties, with the addition of such kinds as have proved a real acquisition in floriculture. Many varieties that are usually advertised separately we have included in a single package under the name of "mixed varieties." Our three warrants we also throw around our Flower Seed, for it is our design that they shall be equally reliable with our vegetable seed. Let us remind our friends that Flower Seed, being for the most part very small, require extra precaution in the preparation of the soil, depth of planting, and protection from extremes of cold and wet. Do not, as a rule, plant in the open ground before the weather has become settled; better wait until the middle of May. Before planting, the soil should be made very fine and be well enriched. For the smaller varieties, such as pansies, the rows may be from ten to twelve inches apart; the largest upright varieties, such as zinnias and marigolds, the rows should be fifteen to eighteen inches apart; while for running varieties, such as verbenas, the rows may be two feet apart. Seed the size of sweet peas may be planted one and a half to two inches deep; the very smallest seed should be planted barely under the surface, having fine earth sifted over them, and slightly packed with the hand, or a strip of board pressed upon it. It will keep the moisture in and facilitate vegetation if a newspaper is spread over the surface after planting, and kept down with stones for a few days. Thin out the plants when very small, with a bold hand, and after they have attained the height of two inches, thin again boldly. Give each plant plenty of room, according to its habit of growth. A common mistake is to crowd too much. Special rates when large amounts are ordered by clubs. Terms to dealers on application.

The letter "A." annexed to the name of varieties signifies Annual; "B." Biennia'; "P." Perennial.

ANNUALS grow, bloom, and die the first year from seed; BIENNIALS bloom the second ear from seed, and then die, though many, if sown early in the spring, will flower the first year. PERENNIALS usually bloom the second year from seed, and continue to grow and bloom for many years; some will also bloom the first year if sown early.

height. It lower large and showy, from 2 1-2 to 3 inches across. The ray florets are pure white on the upper surface, with a narrow yellow zone at their base; reverse of petals pale lilac. The plants produce their splendid flowers most abundantly from

Asters. (A.) Price per pkg. Sow the seed early in the spring, under glass, or in pots in the house, and transplant into rich soil one foot apart.

Aster, Phoenix "Little Maid." An entirely new class that resembles the Victoria in growth, height and shape, but the flowers, which are produced in great abundance, although quite equal in size to the Victoria; never show any inclination to be yellow in the center, are of perfect form with stiff stems. This new introduction deserves by right the name of "Little Maid," for a more charming and lovely coloring—white with a slight touch of pink—it would be difficult to the content of th for a more charming and lovely coloring—white with a slight touch of pink—it would be difficult to imagine.

Aster, Christmas Tree. On account of its branching habit, this Aster is the most striking among the many varieties now in existence. The branches stand horizontally, and the plants attain a height of 20 inches, and measure 24-28 inches in diameter at the base. It is early and very profuse flowering, many plants being covered with from 70 to 100 well-developed flowers. This effective aster is beautiful as a single plant in beds, or for pot culture.

Aster, Daybreak. A very compact, strong grower. Flower large; color delicate light pink, almost identical with Daybreak Carnation.

Aster, Semple's Giant. Flowers very large, from four to six inches across, with broad petals. Colors range from white to pink lavender. Much in demand for floral exhibitions.

Aster, Japanese Tassel. A new strain, quite distinct from any other variety. The flowers, of beautiful shades of rose and flesh, are of immense size, with long petals curiously curled and waved. Plant vigorous, producing quite a number of these enormous flowers.

Aster, Snowball or Princess. A beautiful Aster, with quite short and thickly set imbricated petals. A single plant develops as many as thirty pure white flowers, which remain longer in good condition than any other variety.

Aster, Ball or Jewel. Mixed. The petals of this handsome variety are so symmetrically incurved as to give them the exact shape of a ball. Flowers measure from two and one-half to three inches across, and, being borne on long stems, are very useful for cutting.

Aster, Washington Needle. Mixed. Flowers large and double, with curved petals as round as a knitting needle. Free bloomers.

Aster, Mignon. Mixed. Resembles the Victoria race, but blooms more profusely. Flowers globular and beautifully imbricated, in colors of blue, lilac, rose, carmine, crimson and white. COMET ASTER. No. Price per pkg. 47 Aster, Goliath. Of extremely vigorous growth, forming large bushes profusely covered with very double flowers, immense in size. The seed which we offer is a fine mixture of white, rose, dark blue, ash gray and Aster Ray. (See Cut.) Dark Blue. Flowers beautiful in color, 5 inches in diameter, with long needleshaped petals coming out like rays shaped petals coming out like rays from the centre of the flowers.

Aster, Betteridge's. Quilled Sulphur Yellow. Flowers globular, quilled, and very double.

Aster, Triumph. (See Cut.) Feautiful dwarf asters, with large incurved flowers. Especially recommended for pot culture or dwarf groups.

— Triumph White. Dark Scarlet and Dark Blue Mixed.

Aster, Midsummer Triumph. Dark Scarlet. This differs in one important respect from the well-known Triumph Aster, in that it commences to bloom the last of June, is in full bloom from the middle of July, and continues to flower for a long period. from three to four inches in diam-TRIUMPH ASTER. Aster Victoria, Finest Mixed.
An unrivalled and favorite class, of which we have a very fine strain; flowers large and perfectly double, of globular shape.

Aster, Pyramidal, Large and Double. Similar in style to the Pæony variety, but more branching, with splendid, extra double flowers Aster. Glant Emperor. Mixed. Arabis, Alpena Compacta. 56 Hardy, herbaceous plant, with pure white flowers; blooms very early in the spring, fine for borders and rock-work. Very desirable for cem-Aristolochia. Flowers few, very double, often four inches in diameter..... (Dutchman's Pipe.) (P.) 57 A beautiful hardy climber. Leaves large and luxuriant, flowers brownish yellow, in shape resembling a Aster, Perfection. Ster, Perfection. Light Yellow. Beautiful creamy yellow.....

The markable for their great beauty, diversity of shades, and striking appearance. The mixed borders. If sown early will bloom first year from seed.  Formosa. Our flowers were two inches in diameter by actual measurement, ure blue in color. Spikes eight to ten inches in length.  (Bee Larkspur). Blue. Two feet.  Im. Fine flixed, Splendid.  Semi-Dwart. A beautiful new variety, growing about 3 feet in height. Flowers in all shades of blue, from the lightest celestial to the deepest indigo. Remarkatin in full bloom and worthy a permanent place among our leading perennials  Eschscholtzia. (California Poppy.) (A.)
	SHASTA DAISY. A very sho duces a brillia	nowy plant, about one foot high, blooming from June until September. Proliant effect at a distance when grown in a mass. Hardy.
142	the orange blotch almost suffuses the whole flower, in others it r	liant effect at a distance when grown in a mass. Hardy, ery large with overlapping petals, often delicately waved at the edges. In some runs into the yellow in fine pencilled lines; others again have an orange centre
143	with a margin of clear yellow, while the Maltese cross in some of the Finest Mixed.	the flowers is very distinct.
145 146 147	Eternal Flower. (Helichrysum.) (A.)  Omamental in the garden, and desirable for winter bouquets, as they retain their form and color for years, if gathered and dried when first open.  Eternal Flower. "Fireball." Rich crimson-maroon.  — Yellow — Mixed.  Euphorbia. (P.)	We have selected for our mixed variety of gourds all the numerous kinds of the useful, fancy and ornamental sorts. These include the beautiful mock orange, a dish of which would pass anywhere for one of real oranges; the hen's egg, which would pass as readily for a dish of real eggs; the bottle, the double bottle, the dipper, the sugar trough, Hercules, club, etc. The last three named varieties require the full season to mature, and it would be better to start them by mid April under glass or in the house. In very rich ground the small ornamental sorts will be apt to overgrow.
	Euphorbia Heterophylla. "Mexican Fire Plant." Large, bushy plants growing about three feet high, with very ornamental, dark-green leaves, which, as the season advances, become blazed with scarlet. Sow early in pots or hot bed, and transplant to open ground in May.  —Variega a. "Snow on the Mountains." Leaves edged with pure white.	163 Hercules Club. Grows four to six feet in length  164 Sugar Trough. For holding liquids. They will last years  165 Double Bottle
	Eupatorium. (P.)	.05
150	Shrubby plants, with white flowers growing in graceful, feathery sprays.  Erigeron Auranticus. (P.)  One of the earliest flowering perennials, producing stout, many-branched flower stems of about one foot in height, with numerous	.10
	large flowers, 1 1-2 to 2 inches across, varying in all shades of col- orings from white to rose and from yellow to light and deep orange	.15
	Feverfew. (Matricaria.) (P.)  A beautiful half-hardy perennial, well adapted for beds.  Feverfew, Double Dwarf. Flowers large, creamy-colored and very double.  — Double White. DELPHINIUM ELATUM SEMI-DWARF

.05 10 .15

### Geranium. (A.)

172 California Giant Flowering Hybrids. A strain of seed saved from fine new Improved Hybrids. Flowers very large, of the most perfect forms with splendid trusses. The colors are all shades of scarlet, crimson, rose, pink, salmon, cream, veined pink, blush, pure snowy white and all the new aureole types with lovely rings and white eyes. If started early in the house will make flowering plants the first year.

### Globe Amaranth. (A.)

### Gloxinia. (P.)

A superb class of greenhouse and indoor plants, producing, in great profusion, elegant flowers of the richest and most beautiful colors. They are quite easily grown from seed. Sow in March on the surface, in a warm, moist atmosphere; transplant into shallow pots when the second leaf appears. Allow plants to rest through autumn and winter, giving little water, repot in the spring and water freely; will blossom second season.

Gloxinia. Grandiflora. Mixed

—Hybrid Grandiflora. "Coquette." A grand addition to all the well-known Gloxinias on account of its beautiful yellow throat. The flowers are mostly tinged in three lovely colors, which vary on the different plants from pale-blue, mauve to darkblue; from pink, mauve-pink to dark-red, thus producing a fine effect. Come perfectly true from seed.

It has of late become the fashion among ladies to raise their own herbs for seasoning, such as Sweet Marjoram, Summer Savory, and Thyme, each of which was a pet with our grandmothers in the days of our childhood, when they hardly felt ready for the services of the Sabbath without a sprig of these, with its sweet fragrance, as their companion. If you have a spare corner in the flower-garden what better use can be made of it than by planting it with these old friends? For prices see page 50.

NEW EMPEROR SALPIGLOSSIS.

No.

# Price per pkg. Large Flowering Sweet Peas.

We have discarded the small flowering sorts and selected the following varieties from a list of nearly two hundred as being among the finest for size, form and color.

These well-known universal favorites have been much improved, the last few years, in size and variety of colors, and for beauty and fragrance cannot be surpassed, embracing, as they do, every shade of color most delicately tinged and variegated. Sow in drills as early as possible in the spring in rich soil. Make a furrow six inches deep, sow the seed, and cover about two inches. As soon as the plants begin to show, fill in the furrow. This deep planting will enable the vines to stand the heat of summer. By cutting the flowers before they fade, thus preventing pods from forming, the blossoms may be continued the whole season.

369 Sweet Peas. Emily Henderson. Flowers extra large, very fragrant and absolutely pure white. Remarkable for earliness and long-continued bloom: 1-4 lb., 20c.; per oz., 8c.

We cannot possibly supply any item named from here to page 69, in the Fall, except Lilies.

# Summer Flowering Vines.

(See Clematis on Page 73.)

Prices, except where otherwise noted, are per mail, postpaid.

This is the quickest growing of the ornamental [ Wild Cucumber. vines, being specially desirable for trellis work.

It bears an abundance of fine white flowers, which are very handsome, hiding the leaves, making a mass of bloom. As this is an annual, we supply only the seeds. Price per ounce, 20 cents; per package, 5 cents.

Silver Sweet Vine. (New.) (Actinidia Polygama.)

A new, hardy climber of remarkable beauty, from Japan. The foliage on the ends of the flowering shoots in its third season changes to a silvery white color, giving the whole vine from a little distance the appearance of being covered with large white flowers blooming amongst its bright green leaves. The flowers, small, creamy white in color, having the shape of apple blossoms, with numerous stamens with bright yellow antlers, resemble the lily of the valley in fragrance. The foliage, which in lusty health suggests that of the lilac, is almost absolutely free from insect pests. These, without any protection, withstood the exceedingly trying winter of 1808-1809 uninjured. This new climber is especially suited for planting about buildings, to run over piazzas and arbors, or in clumps on lawns or parks. While the vines are small they should be protected, as cats will eat the leaves and tender shoots as they do catnip. do calnip.
Price for two years old vines, 3 feet high, 60 cents each.

Hardy English Ivy.

This is a hardy evergreen climbing vine, with dark glossy green leaves much used for covering walls or churches, etc.; is a true evergreen; retains its bright green leaves all winter and always looks alive. Each, 15 cents; 3 for 30 cents.

Passion Flower. (Passiflora Incarnata.) A strong-growing, vigorous climber, making a fine covering for porches and verandas. The roots will usually survive the winter as far north as Philadelphia, but in higher latitudes they should be dug up and placed in the cellar until spring. 15 cents each; three for 30 cents.

Moonflower or Evening Glory. A very rapid summer climber. The flowers are immense, five inches in diameter, pure white and sweet scented, and as they open at night, very striking. The effect on a moonlight night is charming. 15 cents each.

Cinnamon Vine.

A beautiful rapid-growing, summer climber, with glossy foliage and spikes of delicious, cinnamon-scented flowers. Good sized roots, each 12 cents; 3 for 20 cents.

Wistaria. Chinese Purple. A hardy, strong-growing twining vine with handsome, luxuriant foliage, producing in midsummer long, drooping clusters of beautiful lilac, fragrant flowers. Price, one year old, 12 cents each; three for 30 cents.

Having a little space we offer Woodbine - a fine-appearing Woodbine. Having a little space we offer Woodbine—a fine-appearing quick-growing vine, which, while of a beautiful deep green foliage in the summer, turns in the fall to a dark red, thus dotting the land-scape. Price, postpaid, 25 cents each.

Ampelopsis Veitchii. This is the famous creeper that clings to any building by means of its tendrils. It is sometimes known as Boston Ivy. It is of an exceeding rapid growth, and perfectly hardy. Foliage pretty, dense and attractive; in the fall it gradually changes to nearly all the colors of the rainbow. Strong, two years old plants, eighteen inches high, each, 20 cents; per dozen, \$1.75. One year old plants, one for 12 cents; three for 30 cents; six for 50 cents; 12 for 90 cents.

Madeira or Mignonette Vine.

A beautiful climber, of rapid growth, adapted to outdoor growth in the summer. It completely covers itself with deliciously fragrant white flowers. Tubers should be kept in cellar over winter. Each, 10 cents; per dozen, 75 cents.

Honeysuckles.

These are climbing shrubs much cultivated for ornament and the fragrance of their flowers. We have one year old plants of Hall's Japan, flowers white and yellow, and Scarlet Trumpet, scarlet flowers. Price, one for 12 cents; three for 30 cents; six for 50 cents; twelve for 90 cents.

SINGLE TULIP.

# Summer Flowering Bulbs and Roots.

Prices, except where otherwise noted, are per mail, postpaid. No discount.

## SNOW-WHITE GLADIOLUS.

### Gladioli.

These showy flowers are very easily raised, and with their tall spikes and brilliant colors of almost every variety, simple and blended, make one of the most magnificent displays of the flower-garden. By planting from May till July, a continuous succession of flowers will be secured. Plant in rows a foot apart, six inches apart in the row, and two inches deep. These need to be housed in the autumn.

Beautiful French Hybrid Varieties, Splendid Mixture. Price, per 100, express, \$2.00; per 100,

postpaid, \$2.40; per dozen, postpaid, 40 cents.

Leomine's Hybrid. (New.) For rich and vivid coloring these have no equal. Emblazoned with the most intense burning and rich shades, they are wonderful. Price, per 100, per express, \$3.00; per 100, postpaid, \$3.40; per dozen, postpaid, 50 cents.

### New Collections of Gladioli at Special Low Prices.

No. 1 (Fine), 50 cts.; single bulbs, 6 cts. Napoleon III. Scarlet, white line in centre of

Napoleon III. Scarlet, white line in centre of petals.

Mad Monneret. Soft, rosy pink, late variety. Vachtii. Creamy white, blotched with carmine. Isgae Buchgnan. Best yellow. Ceres. Pure White, spotted with purple rose. Mr. Bains. Wonderful clear light-red color. Emma Thursby. White ground; carmine blotch through petals.

Mgy. Pure white, flaked with crimson.
Octoroon. A beautiful salmon-pink; very distinct.

De Lamarck. Cherry tinted with or. and red. No. 2 (Extra Fine), 75 cts.; single bulbs, 8 cts.

Gen. Phil Sheridan. Fiery red with white line through petal with white blotch.

Mrs. Krelage. Fiery red; white blotch with carmine; has white veins.

Countess of Craven. Rose flaked with car-

mine.

Chameleon. Slaty-lilac with creamy white

blotch.

Digmant. Extra large, fleshy white, blotched and streaked carmine.

Pepita. Bright golden yellow striped with car-

mine.
Romulus, Intense dark red, blotched with pure

Le Poussin. Bright red, with white blotch. Reine Victoria. White, carmine-violet blotch,

very fine.

Coine. Dark amaranth, almost black, with Africaine. Dark white stripes.

New Gladiolus. "Snow-White." (See Cut.) The best white Gladiolus. The flowers are elegantly formed, and of great substance, lasting a remarkable length of time when cut. The spikes are of good size, set solidly and perfectly, with the flowers from bottom to top. The petals are gracefully recurved, and in many cases beautifully crimped. Price, 20 ccnts.

Plant either in spring or fall, except Candidum and Harrissii, which are for fall planting only.

Plant deep where they are to remain; in winter cover four inches deep with leaves or straw; feed them well.

Scarlet Mexican Lily. (New.) To get the proper idea of the beauty of this lovely flower it must be seen. The flowers are simply gorgeous. The color is a magnificent, velvety deep, dark scarlet, rich beyond description. While it grows readily in soil, the most interesting and quickest method to secure flowers is to plant the bulbs in sand, pebbles, gravel and water like Hyacinths or Chnese Sacred Lilies. Grown by this method it will bloom in two or three weeks, producing immense numbers of the large, brilliant flowers. Large blooming bulbs, 12 cts. each; or Chinese Sacred Lines. Grown by this house ing immense numbers of the large, brilliant flowers. Large blooming bulbs, 12 cts. each; 3 for 30 cts.

Melpomene. Beautiful, almost beyond description. Frosted, white, spotted, cloudy and bearded with pinkish crimson. Price, each, 20 cts.; per dozen, \$2.00.

Auratum, Golden-rayed Japan. Blooming in great profusion, and deliciously fragrant. Price, each, 15 cts.; per dozen, \$1.25.

Candidum. Very hardy, snow-white and fragrant. Fine for forcing. Each, 15 cts.; per dozen, \$1.25.

Harrissii. (Bermuda Easter Lily.) (See Cut.) Flowers large, trumpet-shaped, of a pure waxy white; an incredibly free bloomer. Price, each, 20 cts; per dozen, \$2.00.

Rubrum. Rose, spotted with crimson. Price, each, 15 cts.; per dozen, \$2.00.

Wallacei. (New.) A magnificent Japanese variety with beautiful clear buff flowers, spotted with black. Price, each 15 cts.; per dozen, \$1.25.

Umbellatum. Twenty-five varieties, mixed; robust growers and great bloomers. Colors range from buff, rose, crimson, yellow, to almost black. Price, each, 12 cts.; per dozen, \$1.00.

Lily of the Valley. A great favorite because of its delicate fragrance, bearing graceful bows of fairy-like lily-bells. Per dozen, 35 cts.; per half dozen, 20 cts.

Tennifolium. The Coral Lily of Siberia. Brilliant coral red. In color the brightest of all. Price, each, 15 cts; per dozen, \$1.25.

Longifiorum. Trumpet shaped; white; very fragrant. Price, each, 15 cents; per dozen, \$1.25.

## New Dwarf Ever-Blooming Calla Lily.

It is our good fortune to have come into possession of this most valuable of all Callas. The following facts will convince any one of its great superiority over the old sort. It is of a dwarf habit and does not grow tall and scraggly like the old variety, but is strong and compact, with a great abundance of lustrous dark green foliage. It is a true ever-bloomer, its flowers appearing in great abundance both summer and winter when grown in pots, or it will bloom profusely all summer long in open ground, and being potted in September, after being dug up and rested for two months, will continue grow and bloom for years without once ceasing, and the quantity of bloom which a good plant will produce is astonishing. A large plant is hardly ever without one or more flowers, and its dwarf, compact habit make it much mose desirable than the tall varieties. Price, 25 cts. each.

### Double Tuberoses.

The Pearl. Beautiful white, wax-like, very sweet-scented double flowers, growoffshoots from the sides of the bulbs, start in the house in April, and transplant to open ground for summer blooming. Planted in pots in April, and taken into the house when frost comes, they will freely bloom in December. First quality bulbs, per dozen, 50 cts.; per dozen, express, 35 cts.; each, 7 cts. New Variegated. The leaves of this variety are bordered with creamy white; flowers single but very large and of exquisite fragrance. Bulbs continue to grow and bloom year after year. It makes a most magnificent plant. It blooms several weeks earlier than the other sorts, which greatly adds to its value. First quality bulbs, per dozen, 50 cts.; per dozen, per express, 35 cts.; each, 7 cts.

# Summer Flowering Bulbs, Continued.

Prices, except where otherwise noted, are per mail, postpaid.

### Saint Brigid or Poppy Anemones.

What could be more glorious than a bed of these new Irish Anemones. Compare it to some bright oriental carpet, whereon the artist has exercised his ingenuity to blend pleasing and effective tints! Indeed, the flowers of this new strain show all the colors of the rainbow and many more; for even black and white are found, as well as shades of pink, rose, crimson, hery scarlet, carmine, maroon, lilac, lavender, blue, purple, even green. Some are curiously mottled, striped, edged, ringed and shaded with the various tints described, the effect produced being bewildering. They bloom frequently until well after frost. Being perfectly hardy, will bloom again the next season in greater profusion than ever. The flowers and the beautiful fern-like foliage remain fresh in water for a week or more. For spring or fall planting. Fine bulbous roots, r for 8 cents; 6 for 30 cents; 12 for 50 cents.

cents; 12 for 50 cents.

### Begonias.

(Ready March 15.)

Tuberous Rooted. It is quite impossible to overestimate the

grow them. Planted where they can have plenty of moisture and a little shade from the noonday sun, they make a glorious display, excelling the most vivid geraniums. Give them one trial in your garden and you will never be without them. We offer tubers from the finest strain of erect, large flowered varieties, of dwarf habit, comprising all colors,—scarlet, white, yellow, pink, etc. Not hardy; house these and Gloxinias in the autumn.

Price, Single,—scarlet, white, yellow, pink

Frice, Single,—scarlet, white, yellow, pink,—each 10 cents. Four, one of each, 30 cents; twelve, three of each, 80 cents. Price, Double,—scarlet, white, yellow, pink,—each 15 cents. Four, one of each, 55 cents; twelve, three of each, \$1.00.

### Gloxinias. (Ready March 15.)

These are most charming tuberous rooted pot plants. Their fine trumpet shaped flowers are exquisitely tinted and blotched with dots of violet, pink or crimson. Price (bulbs), 15 cents each; three for 35 cents; twelve for \$1.00.

### Dahlias. (See page 5) (Ready in May.)

Ethel Vick, or A. D. Livoni. This variety bears in great profusion most perfectly formed flowers of a rich pink color. All in all we think that this is the best of the Dahlia family. These need to be housed in the autumn. Price, 20 cents each; three for 50 cents.

### 12 Show Dahlias.

Prof. Fawcett. Lilac, striped chocolate.

Duke of Edinburgh. (New.) Yellow; an excellent variety.

Prince Henry. Lilac, striped purple.

Dr. J. P. Kirtland. Dark velvety crimson; very

Grand Duke Alexis. A pure glistening white,

tinted soft lilac.

George Smith. Crimson; an elegant free blooming variety.

Madam Zules. Yellow, tipped crimson.

Golden Age. Sulphur yellow.

Mary D. Halleck. Canary yellow; same form as A. D. Livoni.

Fascination. White, suffused lavender.

Lottic Eckford. White, striped purple.

White Swan. Pearly-white.

### 12 Pompon Dahlias.

Maud. (New.) Pure white, long stem; fine for cutting.

Alewine. A delicate shade of pink, tinted lilac. Little Jennie. Primrose yellow; very fine. Lillian. Primrose, tipped peach.

Henrietta. Yellow, tipped crimson.

Aillets Imperial. Delicate white, tipped purple.

Brunette. Crimson, sporting white. Little Bessie. Creamy white; finely quilled.

Minnie. Buff yellow, tipped and shaded pink. Sunbeam. A new crimson; fine.

Golden Gem. Pure yellow; small and fine. Rosalie. Yellow, edged crimson.

### 12 Cactus Dahlias.

Perie de la Tete D'Or. (New.) One of the most remarkable and most beautiful of all the decorative class. The flowers are 2 pure white with frequently a slight tint of purple; very large and of exquisite form with petals very prettily notched. The stems are erect and long.

Price, 20 cents each; 3 for 50 cents; 12 for \$1.75.

Himmlische. Light purple-lavender; decidedly distinct in shape and shading.

Earl of Pembroke. (New.) A deep velvety plum color, brightening at tips.

Ernest Glasse. Purple-magenta, perfect cactus

Prince of Orange. Bright orange-salmon, shaded apricot.

Island Queen. Light mauve; very distinct and

Sir Roger. Terra-cotta red; splendid shape.

John Roach. Soft yellow; long petals well

Mrs. Bennett. Soft crimson.

Mrs. Barnes. Pale primrose, shading to rose pink,

Bennett Goldney. Terra-cotta; large and elegant

Miss A. Nightingale. Deep yellow, tipped bright

# Cannas, Large Flowering French. (Ready in May.)

All of the list below are green leaved, except the J. D. Cabos bronze.

These new improved Cannas are among the finest novelties that have been offered for years. Dwarf in habit, with very large, gorgeous flowers; they make fine bedding plants. If removed to the house before frost, they will continue flowering all winter. A row of J. D. Cabos, the best bronze variety, planted against a fence, with a similar row of the shorter green-foliaged planted in front of them, produce a fine effect, also as a centre plant of bronze in a circle of the green varieties. These need to be housed over winter. Prices, 12 cents each; 3 for 35 cents; 12 for \$1.00.

Scarlet, overlaid with salmon, 5 ft. Admiral Avellan. Allemania. Salmon and golden yellow; very large flowers, 6 to 7 ft. Pure canary yellow; very large open flowers, 6 to 7 ft. Beaute Poitevine. A fine, free-flowering crimson, 3 ft. Burbank. Canary yellow with lower petals spotted crimson, 6 to 7 ft.

Captain Drujon. Fine deep red, dotted with golden yellow; a strong

Chas. Henderson. Deep rich crimson, yellow at throat, 3 ft.

Duke of Marlborough. Velvety maroon, very dark, 31/2 ft. Florence Vaughan. Very large, bright yellow dotted with scarlet, 4 it. Madame Crozy. Crimson scarlet, bordered with golden yellow, 31/4 it. Philadelphia. Large crimson scarlet flowers; one of the best, 3 ft. Queen Charlotte. Orange scarlet, edged with canary yellow, 31/2 ft. Rose Unique. Beautiful rosy pink; a vigorous grower, 5 ft. J. D. Cabos. A very fine bronze,  $4\frac{1}{2}$  ft.

# SUMMER FLOWERING PLANTS.

### Prices, except where otherwise noted, are per mail, postpaid.

Rose Peony.

Deep Rose color. Most fragrant of all the peonies, having a stronger and richer 10se fragrance than any rose. Perfectly hardy. Each, 25 cents.

# Old=Fashioned Garden Pink Roots.

The delicious sweet-smelling pinks of our grandmothers. Very hardy and easily grown. Per dozen, 65 cents; each, 8 cents.

## Rudbeckia Laciniata, "Golden Glow."

(New.)

A hardy perennial plant growing eight feet high, branching freely, and bearing by the hundreds on long, graceful stems, exquisite double blossoms of bright golden color, and as large as Cactus Dahlias. Price, per single root, 20 cents; per dozen, \$1.50.

## Hibiscus, "Crimson Eye."

For description see page 57. Strong, two-year plants, \$1.50 per dozen; 15 cents each; one-year plants, \$1.00 per dozen; 10 cents each.

### Carnations.

We consider the following varieties of carnations as among the best of recent introductions, combining good form and beautiful colors with vigorous growth and free-blooming qualities.

Bon Ton. (New.) Bright warm scarlet, large, deep fringed, a fragrant flower on a stiff stem.

Evelina. (New.) A very fine white. Its strong points are its earliness, continuity of bloom and its stiff stems.

Eldorado. Light, clear yellow petals edged with light pink. A strong, vig-

orous grower.

Flora Hill. The largest white, very free bloomer, clean and healthy.

Firefly. Deep scarlet, early continuous bloomer; very large flower and strong vigorous foliage.

William Scott. (New.) Strong plant, early bloomer, fragrant; color,

(New.) Strong plant, early bloomer, fragrant; color,

bright, rosy pink.

Daybreak. Color exquisite. A charming shade of pink; healthy, vigorous plants. Price, for the collection of seven, 75 cents; 15 cents each.

# Helianthus, Multiflora Plenus.

A perfect gem that should be in every garden. The plants attain a height of about four feet, and in their blooming season, in August and September, they are nearly covered with bright, golden-yellow double flowers, about the size of a dahlia. Desirable for cutting, flowers remaining bright and fresh for days. House in winter. Roots, per dozen, \$1.25; each, 15 cents.

## Hardy Perennial Phlox.

Coccinea, glowing scarlet.
Cross of Honor, white with band of rosy lilac in center.
Isabey, orange salmon; center purplish crimson.
Madame Bezanson, a splendid deep crimson.
Pantheon, fine deep salmon rose; yery free flowering.
The Queen, pure white. Price, dormant roots, by mail, postpaid, each 15 cents; three for 40 cents; six for 65 cents.

CHRYSANTHEMUMS. The Leading Autumn Flower. (Ready in May.)

There are no flowers that make such a magnificent display in the autumn as these, with their almost endless variety of fanciful shapes, and colors ranging from the purest snowy white, delicate pink and rose, through all the shades of brilliant yellows and deep reds. Set out the plants in a sunny, sheltered location, in good rich soil, with plenty of well-rotted cow manure. Water freely and keep them well cut back until the first of August. If wanted for indoor blooming, they should be litted about the middle of September, potted, watered thoroughly, and set in a shady place for a few days; afterwards expose them to the full light, with temperature not higher than fifty degrees. In cold climates winter in cellar.

Price, postpaid, each.

Per doz.

Fisher's Torch. Bright, fiery red, the richest shade in chrysanthemums; large, fine flower.

15 1.50

Maude Dean. An immense pink variety; finely incurved; petals broad, shell shaped. One of the largest flowers exhibited in the fall shows. .15 1,50 Major Bonnaffon. Soft, clear yellow; full in the center, eight inches in diameter and nearly as deep. In perfect form and finish; 1.50 habit dark

Mme. F. Bergmann. The finest of all the early whites; very large and full, and of the purest white, with creamy center; a strong, sturdy habit; fine foliage. The most popular white variety with florists for early forcing.

Mrs. E. G. Hill. One of the earliest of all large flowering sorts. Flowers very large; color delicate pearl pink.

Mrs. Henry Robinson. In the entire Chrysanthemum family there is no grander white variety.

Nivous. A grand, snow white variety, center irregularly incurving with outer petals reflexing nearly to the stem. Constitution robust; foliage large and abundant, while the keeping qualities of the flowers are unsurpassed.

The Queen. One of the grandest of all whites, especially for exhibition. 1.50 1.50 .15

FOUR COLLECTION OF CHRYSANTHEMUMS FOR 40 CTS. POSTPAID.

One plant each of Pink, Red, White and Yellow. (Our selection of varieties.)

We also offer the small Pompon Chrysanthemums in three colors, white, yellow and red. These small flowering varieties are unique in appearance, and are much liked in contrast to the larger flowering sorts. Price, 15 cents each, or four for 50 cents.

# Chrysanthemum Seeds. Deleaux—New Early Flowering.

A remarkable new class of perennial Chrysanthemums, selected from the celebrated Deleaux strain, blooming early in September from seed sown in March. Very dwarf, branching in habit, and profuse bloomers. The flowers are entirely unlike all the early blooming varieties hitherto known, vieing with the later sorts in form, size, and in richness and variety of colors. Price, per package, 25 cents.

# SUMMER FLOWERING SHRUBS. (These are all hardy.)

Prices, except where otherwise noted, are per mail, postpaid.

# Hydrangeas (for growing in pots). (These need to be taken into the cellar in winter.)

Otaska. Red Branched. Thomas Hogg. One year old plants. One for 20 cents; three for 45 cents.

Syringas.

Hardy shrubs with green foliage, and blooming in June. One year old plants of the Double White and Golden; also the Garland. Price, one for 12 cents; three for 30 cents; six for 50 cents; twelve for 90 cents.

## Hydrangea Paniculata Grandiflora.

One of the most valuable hardy shrubs in cultivation. The flowers are formed in large white trusses, which change to a deep pink. The branches, drooping with the weight of the flowers, give it an extremely graceful appearance. Large plants two years old, per express, 25 cents; postpaid, 35 cents.

year old plants, one for 12 cents, three for 30 cents; six for 50 cents; twelve for 90 cents.

### Snowball.

Japanese. The bush of this is of more compact habit than the common variety and its white globular flowers remain longer in bloom. We also have the common variety. Price for one year old plants, one for 12 cents; three for 30 cents; six for 50 cents; twelve for 90 cents.

## Deutzia.

A slender branched graceful shrub producing spikes of beautiful white flowers. We have one year old plants of D. Crenata Flore Plene, also Gracilis. Price, one for 12 cents; three for 30 cents; six for 50 cents; twelve for 90

## Spireas.

These are in the front rank of the flowering shrubs of the garden. They bloom from May through the summer. We have S. Billardi, rose colored flowers; S. Bumalda, soft deep rose colored, blooming in July; S. Prunifolia, the well-known "Bridal Wreath;" S. Anthony Waterer (New). This is fine for a pot plant, also for edging. Also S. Callosa, S. Alva, S. Reesevii, S. Blue. Price, one for 12 cents; three for 30 cents; six for 50, cents; twelve for 90 cents.

# Weigelias.

These are ornamental, and should be found in every collection of choice shrubs.

We can supply W. Rosea with rose colored flowers, very free bloomer, and W. Variegata, foliage green mottled with yellow, pink flowers. Also W. Candida and W. Floribunda. Price, one for 12 cents; three for 30 cents; six for 50 cents; twelve for 90 cents.

E. Proctor Bailey, Iowa, writes: "For forty-one years, two years excepted, I have always had a good garden — the pride of the neighborhood."

Mrs. Minnle Spencer, So. Lincoln, Me., writes: "I have bought seeds of your house for the last eight years and they have always given satisfaction."

Jacob R. Hisey, Corwin, Ohio, writes: "I have used your seeds for over thirty years and have never yet found a failure, always finding them true to

name."

T. A. Thompson, Berad Brook, Conn., writes: "I am not in the habit of writing testimonials but I feel it my duty to state that for the last twenty or more years we have traded with you and have yet to find a single instance where they have not proved as represented."

Prices, except where otherwise noted,

# ROSES.

are per mail, postpaid.

### HARDY PERPETUAL VARIETIES. (Two years old.)

Price, per express, at purchaser's expense, 35 cents each, or \$3.50 per dozen; per mail, postpaid, 45 cents each, or \$4.50 per dozen. We have one year old bushes of this list at 12 cents for one; 3 for 30 cents; 6 for 50 cents; 12 for 90 cents.

Our customers will find these varieties to be not only choice, but hardy, bearing large and fragrant flowers the same season they are planted. The plants are two years old, and extra large and strong, not the puny, weak affairs too often sent out. We are growing most of these varieties in our own garden. We have picked good buds from them well into November, and several of the bushes the second season have grown from five to nine feet. As far as possible we supply roses on their own roots, but as many varieties will not do well on their own roots, we offer in such cases the best low budded or grafted stock obtainable. All budded or grafted bushes should be planted so that the point at which they are grafted will be at least two inches below the surface.

### NEW HARDY YELLOW ROSE. SOLIEL D'OR. (New.) One year field grown.

The Soliel d'Or is a cross between Persian Yellow and Antoine Ducher. It retains a good deal of the character of Persian Yellow, the bark and wood being reddish, the thorns very fine, the foliage more ample, and the leaves, of a beautiful clear green, are closer together. This magnificent variety, like the Persian Yellow, is perfectly hardy, robust, and vigorous. Superb in color, varying from gold and orange-yellow to reddish gold, shaded with nasturtium-red. The blooms are three and a half inches in diameter. Price, express, 45 cents; per mail, 55 cents.

Dorothy Perkins. The flowers are usually 1 and 1-2 inches in diameter.

Color a most beautiful clear pink. So vigorous that it often makes shoots of over 10 feet in a single season. Flowers fragrant. Foliage is a rich

deep green, remaining till well into the winter.

Caroline Marniesse. Flowers pure (or slightly creamy) white, medium size, very double, very sweetly tea scented, and produced in profuse masses, blooming without cessation from June till October. Perfectly

Prince Camille de Rohan. (New.) A magnificent rose. Color rich velvety-crimson passing to maroon shaded black. At a short distance they appear really black.

Tom Wood. (New.) Color a bright cherry-red; plant gives abundance of bloom early and late. It has a thick heavy foliage and is compact in charge.

Mrs. R. G. Sherman Crawford. (New.) Color deep rosy pink, the outer petals tinted with pale flesh color, flowers large and full and very fragrant. The plant blooms from summer to late autumn.

Clothilde Soupert. (New.) Color French white deepening to rosy blush in centre; compact habit; wonderful profusion of bloom. Valuable for hand or house culture. This needs protection in the winter.

In centre; compact naoit; wonderful profusion of bloom. Valuable for both garden or house culture. This needs protection in the winter.

American Beauty. Rich rosy crimson; of exquisite form and delicious fragrance; almost continuously in flower.

Marchioness of Londonderry. Flowers of great size, color very white; flowers very freely; highly perfumed; an acquisition.

Mad. Georges Bruant. This has the hardiness of the Rugosa class with the free-blooming qualities of the Teas. Flowers of large size, color pure glistening white.

Mad. Gabriel Luizet. Extra large, very double and full, very fragrant.

pure glistening white.

Mad. Gabriel Luizet. Extra large, very double and full, very fragrant.

Color an exquisite rose suffused with lavender and pearl.

Persian Yellow. The finest hardy yellow rose grown; deep golden yellow.

Blooms freely in June. Very hardy. Cannot supply one year old.

Clio. Flesh-color. It has the most delicate texture and coloring imaginable, a beautiful globular form, and in size it is something truly striking.

The plant is a very vigorous grower, perfectly hardy, and the flowers are very freely produced throughout the season.

Yellow Rambler. (Climbing.) Now we have the Yellow Rambler, for which is claimed hardiness, needing protection only in the extreme north; vigorous growth, making shoots of from 8 to 10 feet in a single season. In color, a creamy yellow tinge, with a delicious fragrance. A large, bush in full bloom is one of the most beautiful sights imaginable. Every one should grow this.

Margaret Dickson. This valuable new rose is entirely hardy, and a very vigorous grower. The flowers are of magnificent form, and very large; in color a beautiful shining white with almost the lustre of a pearl.

Crimson Rambler. (New.) Of vigorous growth and exceedingly hardy.

The flowers, of a rich brilliant crimson, and produced in large trusses of pyramidal form.

Marshall P. Wilder. Cherry rose mingled with carmine.

Baron Bonstetten. Color dark red, almost black, flowers double, fragrant, and fine.

Alfred Colomb. Cherry red, shaded with crimson; large, full, and sweet.

Mrs. John Laing. Flowers large, semi-globular in shape, of an exquisite shade of soft pink, and deliciously fragrant. A grand novelty; considered the finest hardy rose of its color ever offered.

Magna Charta. Bright pink suffused with carmine.

Gen. Jacqueminot. Color, rich crimson; of fine shape and exquisite fragrants.

grance.
Paul Neyron. Bright, shining pink; flowers very double; probably the

largest rose grown.

Coquette des Blanch. Pure snowy white, sometimes faintly tinted with pale rose; blooms in large clusters; flowers medium size.

La France. Flowers large and beautiful, satiny shade of pink changing to blush, and of delicious fragrance.

Baltimore Belle. (Climbing.) Pale blush, very double, borne in clusters, the whole plant appearing a perfect mass of bloom.

### HARDY PERPETUAL AND OTHER VARIETIES. (One year old.)

(One year old.) We offer the above list, also the following hardy perpetual varieties, one year old,—Anna de Diesbach, Caroline de Sansel, Vick's Caprice, Coquette des Alps, Fisher Holmes, Gen. Washington, Jules Margottin, La Reine, Mad. Charles Wood, Mad. Plantier, Maurice Bernardin, Ulrich Brunner, and Victor Verdier. Price for one, 12 cents; three for 30 cents; six for 50 cents; twelve for 90 cents.

The Ramblers. (One year old.) Pink, white, yellow and crimson. Price, one for 12 cents; three for 30 cents; six for 50 cents; twelve for 90 cents.

Trailing Roses. (One year old.) Wichuriana Memorial, Mandas Triumph, Pink Roamer, So. Orange Perfection, Universal Favorite. Price, one, 12 cents; the five, 50 cents.

The La France Set. White, red, pink and striped one year old. Price, one, 10 cents; four for 30 cents.

Hardy Climbing Roses. (One year old.)

Hardy Climbing Roses. (One year old.) Baltimore Belle, Greville, Mary Washington, Queen of the Prairie, Russell's Cottage, Tennessee Belle. Price, one, 12 cents; three for 30 cents; six for 50 cents; twelve for 90 cts.

Tea and Hybrid Tea Roses. (One year old.) Varieties marked with a \* are hardy, or nearly so, but for these we would advise protection. \*White La France, \*Aggrippina, \*Bon Silene, Bride, Catherine Mermet, Champion of the World, \*Clothilde Soupert, \*Red La France, \*Etoile De Lyon, \*Hermosa, Kaiserin Augusta Victoria, \*Pink La France, \*Mad. Hoste, Mad. Caroline Testout, Marion Dingee, Marie Guillot, \*Mrs. Degraw, Meteor, \*Mosella, Yellow Soupert, Niphetos, Papa Goutier, Perle de Jardin, \*Pink Soupert, \*Princess Bonnie, \*Safrano, Souv. de la Malmaison, Souv. de Pres. Carnot. Price, one, 10 cents; three, 25 cents; six, 45 cents; twelve, 85 cents.

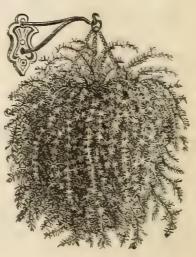

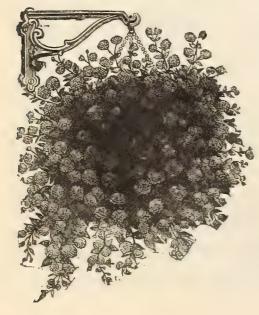

One of the few plants that cannot be too highly recommended. It is of very rapid growth and graceful drooping habit with lovely dark-green foliage, producing a cluster of flowers at each leaf. The flowers are most delicate, clear, brilliant rosy-lilac color. To procure quick results, a half-dozen or more plants should be planted in a hanging basket, although a very pretty basket can be grown from a single plant. It is also a very valuable plant for mixing with other plants in vases. Price, postpaid, 15 cents; three for 35 cents.

### Asparagus Sprengerii.

### Emerald Feather Asparagus.

This is undoubtedly one of the handsomest and most valuable evergreen trailing plants for the house and conservatory ever introduced. It is especially valuable for pots, vases, baskets, etc., covering all with its beautiful sprays of lovely green feathery foliage, which can be cut freely and are very useful for bouquets, wreaths, and all kinds of floral decoration. It makes a charming ornamental plant for the window or conservatory in winter, and is equally valuable for vases, baskets, porchboxes in summer. It is a strong, vigorous plant, very easily grown, requires but little care and keeps on growing, fresh and green, year after year. Price, postpaid, 15 cents; three for 35 cents, postpaid.

Prices or stpaid by us, or express at puril aser's expense, as noted under each item.

# SMALL FRUITS.

Will in them is, if possible, kin ily send in their orders for these, extent strow-terms (which please set by April 10.

We cannot possibly fill orders for Small Fruit (Strawberries excepted) in the Fall.

IF Small fruits should be planted out immediately on arrival #1

### STRAWBERRIES. (See also page 5.)

For hill culture plant fifteen by fifteen inches: for matted growth, make rows those feet apart and plant one feet apart in the row. Those marked with P are postulate varieties, needing staminate S sorts near them. Support season for layer plants will be the month of April and to May 15. We can support from August till Out her ported plants of those varieties marked with \* at 50 cents per ovices, \$2.50 per 100, per express or freight, at purchaser's expense. We cannot possibly supply layer plants in the fall.

Few varieties do equally well in all localities or on all soil. These we have selected are not only in the first class because of their general excellence, but they some nearest to doing well in all localities and on all soils, according to the testimony of every Agricultural Experimental Station, and of the largest strawberry growers, which we can endorse in part from our own observation and experience.

SENATOR DUNLAP (New.) This new Strawberry is exteedingly vigorous, with clean, healthy foliage, which has no tendency to rust, and swell-righ irought-proof. The fruit is of large size, regular and attractive in them, deep and in it, without and within firm in substance and excellent in quantity. Season is among the earliest and it continues productive nearly a month. Price, per duzen, postpard, 40 cents, per 100, \$1.00.

MILLER (S. (New) Plants extra large on I healthy. Very productive. Fruit very large, will protected by the immense foliage. The beauty of form, high point, and excellent quality make it a first-class berry for the tamily. Price, per dozen, postpaid, 30 cents: per 100, \$1.00. 100, per express, so cents; per 1000, \$5.00.

ROUGH RIDER (S). (New.) A seedling of Eurekt fertilized by Gandy. The originator claims that it is both the latest and the firm at bern in existence. (Good pickings have been had from it as late as Aurust 1. Derries very late, marked, or all other and where them disease 1. It has been supported without it 1. y 12.35 miles it excress cars and sold for 12 cents per quart. Perfect biossom. Price, per dozen, postpaid, 30 cents; per 100, postpaid, \$1.00 100, per express, 30 cents; per 1000, \$5.00.

SALEA (S). (New.) The new berry of Mr. Smith, the originatic of the Beverly. Plants vigorous health, with a perfect blasser. Fruit large, roundish, regular, dark glossy red, and quite nam, as we saw them on the grands of the originator last seas it, when the trop was with letture per dozen, postpaid, 30 cents; per 100, postpaid, \$1.00; 100 per express, 80 cents.

NEW YORK (S). (New.) Very large in both plant and finet. Plant very leadily, fruit regular in form tomal of good on and flavor it ripens all over at the same time, with no green tios. I show town to the name of Bog Berry. Vineso wightness that it can easily be distinguished among others. Perfect clossom. Price per opening output, 30 tents per 100. postpaid, \$1.00; 100, per express, 80 cents: per 100, \$5.00.

HAVERLAND An old stand-by among these we mise strawberries by the acre. Berry, regular, obling only, bright red; remarkably productive; quality good, moderately firm. Price, per dozen, 30 cents; per 100, \$1.00; per 100, per express, 80 cents; per 1000, \$5.00.

\* THE SAMPLE P. Last season, which was a very unlavorable one, the Sample gave satisfact on, when aim so every other variety failed. Professor Maymard, of the Massachusetts Agricultural College. In it that to bere the largest is rever and yielded the greatest are given berry, but regular in form and if the that if the largest is reversed in the table there are as many for berries a the militarity realists. The estimate and the professor is unit, bear just about as many the second season as the first. The Sample is a not scarled berry sufficiently hard in a hear market. It will need as many series as the Clyne or fisher that they will avera, as large as the Marsoall. The estimate if the old Strawberry growers who saw Mr. Gowing's bed was that the crub was at the rate of job Cosh-is to the are. The Sample, being a late variety, turnes after the glut is over. Price, per dozen, postpaid, 30 cents; per 100, \$1.00; per 100, per express, 80 cents; per 1000, \$5.00.

MAXITUS (S. A new berry introduced by J. H. Hale, the famous strawberry and peach grower. "Perfect bloomer plant strong and robust, heavier and usuader-leaved to an William Belt. Products two and for first stands to a post to an well of the well of a strong of any large berries formul, keep, glissy starlet, never missiaten. Best pirk, sometimes white at the centre, were briden formulation to give and training and that it has no markets, in account of its size and beauty. June 20, 1901, a week after the beingt bit the season. H. L. Jeffery prized from my ded ten berries that filled a quart basket. Price, per dozen, postpaid, 35 cents; per 100, postpaid, \$1.00; per express, 80 cents.

\* CLYDE (S. Fruit very large, light sed conical firm and fest quality. Season early and long Plant very vig rous, plenty of runners, hardy, free from rust, and very productive. Price per dozen, postpalling sends, per 100, per 100, express, to links, per 1000, 85,00

\* NICK OHMER (5). (New.) A great surprise is in store for all who fruit this strawberry for the nest time lits mammenth size, beautiful color, and great productiveness being really astorishing. The plant is exceedingly violations, with clear, teather to come without the sugmest tendency to rust. The permission of the largest size—a perfect point among strawhermes—rundish-contrain of the number and regular rich, glossy common, form and solid. Price, per dozen, postpaid, 30 tents : per 100, pustpaid, \$1.00: per 100, express, 50 tents : per 1000 \$3.00.

WORLD CHAMPION (S. Fruit stem very struct, berries very large, and yield so heavy that some of the pickers gathered over 100 quarts in four hours. () not torm, fine color, so the field as a blood grange, very lite; and will keep properties by well after booking. It runners about antly bloom perfect, hence needs no other variety to fertilize it. Proc., per dozen, postpaid, so cents, per 100, postpaid, so cents, per 100, express, no cents.

BISTARCK S. A new and vigorous seedling of Bubach. The fruit is larger, and the general tone of the plant far more healthly and vigorous, in every way an improvement over its parent. It has perfect a seemed high production of the plant of second between the second of excellent quality. Proceed per duzer, postpaid 30 cents; per 100, to traits, per 100, express, on cents; per 100. \$5,00.

\* W.T. BELT S. The plant is vigorous and thrifty, a giant in size, and remarkably productive. The fruit is except, nally large, irregular, round in size, builtant red in color, and of extra fine quanty. It is a good shipper. Price, per dozen, postparil, 30 tents, per 100, so tents, per 100, per express, 60 cents; per 100, \$5.00.

\* GLEN MARY S). Plant a good grower, runners abundant. Fruit very large, form irregular-control, dark crimson color, good quality. Very productive, and one of the most promising of the newer varieties. Price, per dozen, postpaid, 30 cents, per 100, 50 tents, per 100, express, no tents, per 1000, \$5,00.

\* BRANDY WINE (S. M. Hum red. floor red. form, and sold for an large a berry, none more so. Quality not the best, but fully as good as Sharpless and better than Bubain. Vines exceedingly provide. Brandywher instructs all nuttime in fruit, and is of superior shape, pullity and size for so large a berry. Foliage perfect. Everybody likes this berry. Per dozen, postpaid 30 tents, per 100, in cents; per 100, express, in cents, per 1000, \$5 co.

\* THE MARSHALL (S). A distinct variety, having the wild strawberry flavor. It needs extra treatment. Three thousand quarts were picked from ne-third flan agree in 1922. Berrys energies to size for those a wasset. It is not a reliable extra treatment. Three thousand quarts were picked from ne-third flan agree in 1922. Berrys energies to size for home garden or for fancy marketing. Per dozen, postpaid, 30 tents, per 100, 50 tents; per 100, per express to tents, per 100. \$5.00.

ALPINE MONTHLY (S). The great merit of this variety is that it continues to bear until frost comes. The fruit, though very rich in flavor is of small size; and it is not a neavy cropper, but a variety that, instead of having a seas of out from two to have weeks as is to clear with most other straw services, will enable you to make a present to the suck, as acceptable as it is surprising, through a period of five number; is deserving of a small plot or every protein. If the first crop is renewed as soon as set, the later crop will be more abundant. Price, per dozen, postpart, go cents, per 100, to cents; per 100, to renew said of cents.

In case a dozen of each of four or more varieties of strawberries are taken, the party ordering shall be at liberty to deduct five cents from each dozen price where said price is fifty cents or under, and ten cents where price is over fifty cents.

Please send in your orders for small fruits early, for by so doing you will be the better satisfied.

We cannot fill orders for

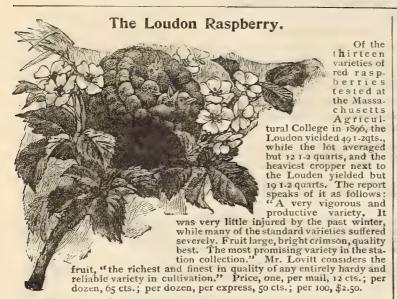

SMALL FRUITS .- Continued.

Small Fruits in the fall. To

Plant Black Cap variety five feet apart each way; the other kinds, four feet

### RASPBERRIES.

Plant shallow, and cut back the canes. Leave but three or four suckers to grow.

Marlboro'. Red; strong grower, hardy, and productive; early, and continues long in bearing. Price, postpaid, one, 12 cents; per dozen, 65 cents; per dozen, per express, 50 cents; per 100, \$2.50.

Gregg. (Black Cap.) The leading late Black Cap. Very popular market sort. Price, postpaid, one, 12 cents; per dozen, 65 cents; per dozen, per express, 50 cents; per 100, \$2.50.

Cuthbert. Red; remarkably productive. Price, postpaid, one, 12 cents; per dozen, 65 cents; per dozen, per express, 50 cents; per 100, \$2.50.

Columbian. This new raspberry appears to be a cross between the red and black varieties. Color, a dark red. It took two prizes at the New York State Fair in 1895: one as the best canning berry, and the other as the best evaporated berry. The introducer states that 3,500 bushels yielded on an average five quarts each. Valuable for market where a dark berry will sell. Price, postpaid, 12 cents each; 65 cents per dozen; per dozen, per express, 50 cents.

## The Cumberland Raspberry.

This new Black Cap Raspberry is endorsed by that veteran fruit grower, George S. Josselyn, who writes, "They were delicious and were larger than the Gregg, with not nearly as many seeds;" and by Prof. Bailey, of Ithaca, the well-known horticultural authority, who writes, "They were the wonder of every one who saw them." We add the facts that it is among the hardiest of the raspberries, is wonderfully productive, the fruit possessing unusual firmness, making it a good shipper, while the vine itself is an unusually strong and vigorous grower. Price, one, postpaid, 12 cents; dozen, 75 cents; dozen, express, 60 cents; 100, express, \$5.00.

Strawberry-Raspberry. A unique freit from Japan, said to be a cross between the strawberry and raspberry. The plant is low growing and is perennial, dying down and springing up each season; color of the fruit a brilliant red; it ripens early. It is a most abundant bearer. Price, per one, postpaid, 15 cents; per dozen, \$1.00; per dozen, per express, \$5 cents.

### CURRANTS.

Plant on deep, strong, rich soil, four by five feet apart. Cut back young shoots one-third every year. To protect from currant worms, dust with hellebore at time of blossoming, when dew is on, and repeat when fruit is full-grown.

1 Star Currant. (New.) We endorse the following description of this new variety; "The bushes of this variety are very strong growers; give them plenty of room and keep ground well manured; bunches over three inches long and are freely produced. This combines extreme hardiness, vigorous growth, with good quality and great productiveness." Price, per mail, postpaid, 15 cents; per dozen, \$1.25; per dozen, per express, \$1.05. North Star Current.

it hereafter in preference to any other. It is as large as Fay's and as early, but it makes a longer and better filled bunch, and is more productive. It will remain in good shipping order over a fortnight longer. As a table fruit it retains its bright red color, not turning dark like Fay's and Cherry's; is not so acid as Fay's, and has a rich flavor which is very agreeable. One, postpaid, 15 cents; per dozen, 75 cents; per dozen, per express, 55 cents. President Wilder Currant.

Fay's Prolific. As large as Cherry, and with larger bunches; rapidly superseding it. Price, postpaid, one, 15 cents; per dozen, 75 cents; per dozen, per ex-

press, 55 cents; per 100, \$5.00.

The old standard large red. White Grape. The best white. Price, postpaid, one, 15 cents; per dozen, 75 cents; per dozen, per express, 55 Cherry. The old same cents; per 100, \$4.00.

A splendid variety, great bearer, bunches extremely long. Price, postpaid, one, 15 cents; per dozen, 75 cents; per dozen, per express, 55 cents; per 100, \$4.00.

ous grower. 2. A perfectly healthy, hardy plant. 3. The most productive. 4. The sweetest and best in quality, not having the unpleasantly strong currant flavor, and making it a very choice dessert fruit to eat, as strawberries, with sugar and cream, and second only to strawberries. 5. Continues in profitable bearing a greater number of years than any other sort. 6. Is of good size, larger than Red Dutch or Victoria. 7. Retains its foliage until after fruit is all gathered, thus preventing sun-scalding. 8. Will hang on bush in good condition longer than any other sort. 9. Has fewer and smaller seeds than any other. 10. Comes into profitable bearing earlier than any other sort. Price, one, postpaid, 15 cents; dozen, 75 cents; dozen, express, 55 Pomona Currant. cents; per 100, \$5.00.

### JOHNSON'S MAMMOTH CRANBERRY PLANTS.

When Cooked Far Superior to the Common Variety.

There are a great many varieties of the cranberry; they differ not only in size and vigor of vines, and cropping qualities, but in the form and size of the berries. Old cranberry growers are aware of this fact, and are ever on the lookout for extra large varieties. These cannot always be procured, because those who are fortunate enough to have them monopolize them. We are pleased, therefore, to be able to offer to our customers one of these giant varieties, Johnson's Mammoth, the berries of which are sometimes an inch in diameter. It is not only a mammoth berry, but also an enormous cropper, people coming from all the country around to see the crop, which completely covered the ground, and was the cranberry show of the region. The engraving illustrates the comparative size of Johnson's Mammoth and the common variety. Price, per 1000, postpaid, \$5.50; per express, \$5.00; moth and the common variety. Price, per 1000, postpaid, \$5.50; per express, \$5.00; per 100, postpaid, 70 cents.

Cape Cod or Bell. The common sort. Price, per 1000, postpaid, \$3.50; per express, \$3.00; per 100, postpaid, 50 cents.

Directions for cultivation sent with each lot. No plants sent C.O.D. Prices in quantity given on application. Plants will be sent in May.

SMALL FRUITS-Continued.

Small Fruits in the fall. To

Plant vines four by seven and treat as with raspberries,

### BLACKBERRIES.

with the exception that they should be cut back to four feet.

Eldorado. Very hardy, remarkably productive, and superb in quality. Mr. H. E. Van Deman, National Pomologist, says: "Never have I tasted any blackberry equal to the Eldorado." Several of the experimental stations speak emphatically of its hardiness, quality and productiveness. The Ohio experimental station ranks it as hardy as the Snyder, but with a larger berry, and of better quality. It is not only extra sweet, but is entirely free from the hard core common to most varieties. The berries, when picked, keep exceptionally well. The berries, when picked, keep exceptionally well. Certainly a blackberry of great promise. Price, postpaid, one, 15 cents; per dozen, 65 cents; dozen, per express, 50 cents; per 100, \$3.50.

Erie. (New.) Says Lovett: "There is no berry that rivals it in the four properties of hardiness, size, earliness and productiveness. None will compare with it for market or the home garden." Price, postpaid, one, 15 cents; per dozen, 65 cents; per dozen, per express, 50 cents; per 100 \$3.50. \$3.50.

ELDORADO BLACKBERRY.

Kittatinny. Very large, exceedingly productive, tender at the North. Price, postpaid, one, 15 cents; per dozen, 65 cents; per dozen, per express, 50 cents; per 100, \$3.50.

Snyder. The hardiest, enormously productive. One of the best for market. Price, postpaid, one, 15 cents; per dozen, 65 cents; per dozen, per express, 50 cents; per express, per 100, \$3.50.

Agawam Very early. Fruit of fair size; jet black, sweet and melting to the core. It is extremely hardy and healthy, and very productive. Price, postpaid, one, 15 cents; per dozen, 65 cents; per dozen, per express, 50 cents; per 100, \$3.50.

Taylor. Berries of fine flavor, larger than Snyder. Canes of vigorous growth, iron clad hardiness and wonderfully prolific. Ripens late. A fine companion for Snyder in cold sections. Price, postpaid, one, 15 cents; per dozen, 65 cents; per dozen, per express, 50 cents; per 100, \$3.50.

### RATHBUN BLACKBERRY.

Our Massachusetts Experimental Station, for whose carefully formed opinions we always had great respect, says of the Rathbun, which was fruited there last season, that it shows decided merits, but it desires to make further tests. Prof. Bailey, of Cornell Agricultural College: "It is midway between a blackberry and dewberry (low-vine blackberry) in both habit and earliness. The berries are exceedingly large, glossy, jet black, and of good quality." Price, one, postpaid, 15 cents; per dozen, 75 cents; per dozen, per express, 60 cents; per 100, \$4.00.

Lucretia Dewberry. This is decidedly the best of all the dewberries, or low-running blackberries. It is a superb fruit, melting, and of a delicious quality.

The plant is entirely hardy everywhere, a healthy, strong grower, and exceedingly productive. Plant 3 feet by 3 feet. Price, per mail, one, 12 cents; per mail, per dozen, 75 cents; per dozen, per express, 60 cents; per express, per 100, \$3.00.

# CAMPBELL'S EARLY GRAPE.

The King of American Grapes.

This is confidently believed to be a grape in all respects better adapted to general use in all sections suited to our native varieties, than any other which has yet been grown and tested. Vine very strong, vigorous, hardy, with thick, healthy, mildew-resisting toliage, always setting its fruit well, and bearing abundantly. Berries often an inch or more in diameter; black; skin thin, but very tenacious, bearing handling and shipping admirably. Flavor, rich, sweet, slightly vinous; with no foxiness, coarseness, or unpleasant acidity from the skin to the centre. Ripens earlier than the Concord. Has hung upon the vines, in the fall of 1898, sound and perfect for ten weeks or more after ripening. As a keeper and shipper, it is believed to be unequalled by any other American grape.

We give a few testimonials from among over 600 received by its propagators from persons residing in TURKY, NINE STATES AND THE CANADAS. many of them very prominent horticulturists.

ing in THIRTY-NINE STATES AND THE CANADAS, many of them very prominent horticulturists.

Room 27, Capitol, Albany, N.Y., Sept. 28, 1897.

The clusters are very beautiful to look at from the size and compactness of the fruit. The pulp is delicious, and the ease with which the seed can be removed (no grape seeds may be safely swallowed), is greatly in their favor.

J. A. Lintner, State Entomologist.

CAMBRIDGE, MASS., Sept. 25, 1897.

I believe it the greatest success thus far achieved in hardy grapes, and I feel it will be appreciated by the "Great American People," and on account of its keeping qualities find a market for exportation.

BENJ. G. SMITH, Pres. Mass. Agricultural Club.

Mass. Agricultural College, Amherst, Mass., Oct. 14, 1897.

Judging from this sample of fruit, and the growth of the young vines we bought of you last spring, I am led to think that the Campbell's Early is the most promising variety of recent introduction.

S. T. Maynard, Professor of Horticulture.

PARKSVILLE, VA., Nov. 2, 1807 The vine of Campbell's Early Grape which you sent me last spring has grown vigorously. I'b lieve this grape is destined to be the leading early black variety, both for home and market use.

H. E. Van Deman, Formerly Pomologist U. S. Dept. of Agriculture.

Campbell's Early is certainly a surprise party. It is a superb shipper, and so much better than any of the early grapes, it ought to prove very valuable for the family vinevard and for market. The vine I planted last spring, with thirty other varieties, made the finest growth of any in the plot, more vigorous than Moore's Early, Concord, Worden, or Niagara.

J. H. HALE.

AWARDS. - Wilder Medal, American Pomological Society, 1897. Medal of excellence, American Institute, 1897. And First Premiums from many Agricultural and Horticultural Societies.

The vines we advertise are not weak, hothouse plants, but strong, outdoor growers. We have raised this grand grape on our own grounds, and can heartily endorse all that has been said about its earliness, hardiness, vigor, productiveness, the size and rich quality of the fruit. Prices, one, one year, postpaid, 35 cents; ten for \$3.00; ten, per express, for \$2.75. Two years, one, p ostpaid, 50 cents; ten for \$4.50; ten, per express, for \$4.00.

We cannot fill orders for these in the fall.

### Apple Scions for Grafting.

We offer Apple Scions for grafting, as follows: Summer varieties—Red Astrachan, Golden Sweet, Sweet Bough, Yellow Transparent. Fall varieties—Fameuse or Snow, Gravenstein, Maiden's Blush. Winter varieties—Baldwin, Hubbardston Nonesuch, Northern Spv, King of Tompkins Co., Rhode Island Greening. See description above. Price, per mail, postpaid, per dozen of one variety, 45 cents; per dozen of two varieties, 50 cents. No orders filled after April 2. filled after April 15.

### GRAPES. (See Campbell's Early, page 71.)

MOORE'S DIAMOND. (New.) In vigor of growth, texture, foliage, and hardness of vine, it partakes of the nature of its parent, Concord. The fruit, sweet and delicious, is equal to many of the best sorts, and ripens two or three weeks earlier than Concord. The color is a delicate greenish white, with a rich yellow tinge when fully ripe; very few seeds, juicy and almost entirely free from pulp. Berry about the size of the Concord, and adheres firmly to the stem. One of the best of recent introductions; is doing well in all sections, and proving a profitable market variety. Price, postpaid, one, 15 cents; per dozen, \$1.00;

EMPIRE STATE. Very hardy, white, tender, juicy, sweet and rich. Price, postpaid, one, 15 cents; per dozen, \$1.00; per dozen, per express, 75

NIAGARA. White, ripens with Concord, good bearer. Price, postpaid, one, 15 cents; per dozen, 85 cents; per dozen, per express, 60 cents.

THE SALEM. The No. 53 of Mr. Rogers' famous seedlings. This, by many, is ranked as the best of Mr. Rogers' grapes. The vine is a strong grower; very productive, producing large bunches of red grapes of large size; very sweet, amd with the rich flavor of its foreign parent. Price, postpaid, one, 15 cents; per dozen, 85 cents; per dozen, per express, 60 cents.

GREEN MOUNTAIN (OR WINCHELL). An early white grape, ripening with Moore's Early, Clusters of medium size, often shouldered; berries a little larger than those of the Delaware; greenish-white when fully ripe; skin thin, and quality fine, pulp being tender and sweet, quite free from foxiness. It is specially well adapted to northern localities. Price, postpaid, one, 25 cents; per dozen, \$2.50; per dozen, per express, \$2.25.

MOORE'S EARLY, CONCORD, DELAWARE, BRIGHTON. Standard sorts. Price, postpaid, one, 15 cents; per dozen, 85 cents; per dozen, per express, 60 cents.

### THE McPIKE GRAPE. (New.)

Another new grape which has caused quite a stir in the horticultural world in its strong combination of that trio of requisites which all experts are eagerly seeking in their model grape, viz.: quality, hardiness and earliness. It is earlier than the old stand-by, the Concord, fully as hardy and vigorous, while it far surpasses it in quality, both in sweetness, tenderness of pulp, and richness of flavor. The berries are three inches in circumference. Excellent either for the table or the market. Price, postpaid, one, 40 cents; per dozen, \$4.25; per dozen, per express, \$4.00.

### GOOSEBERRIES.

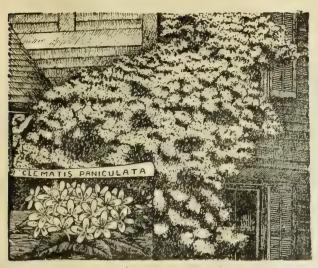

Plant three by four feet, in deep, rich soil, in as cool a location as possible. Protect from currant worms by the use of hellebore, as directed for currants.

The Josselyn or Red Jacket Gooseberry. (New.) Says Josselyn: "This berry is as large as the largest; very prolific and hardy; quality and foliage the best. For seven years no mildew has ever appeared on the Red Jacket." On our grounds it is but little larger than the Downing. Color red. Price, postpaid, one, 15 cents; per dozen, 1.50; per dozen, per express, \$1.30.

Smith's Improved. A large pale-yellow variety, of excellent quality; exceedingly prolific, and of vigorous growth. Price, postpaid, one, 12 cents; per dozen, \$1.00; per dozen, per express, 80 cents.

Downing's Seedling. Best of the hardy, pale green varieties; not subject to mildew. Price, postpaid, one, 12 cents; per dozen, 75 cents; per dozen, per express, 55 cents; per express, per 100, \$4.00

Houghton's Seedling. Red in color; very productive. Not subject to mildew. Price, postpaid, one, 12 cents; per dozen, 75 cents; per dozen, per express, 55 cents; per 100, \$4.00.

CLEMATIS PANICULATA

## CLEMATIS PANICULATA.

Two years old.

We think that this fine vine is worthy of a more extended notice and so have brought it to the front again, nicely illustrated. It is of a very rapid growth with bright green foliage bearing in September multitudes of very handsome white, star-shaped flowers which hide the leaves, making an intensely white spot on the landscape. We have had one for several years in our garden, trained up on a single post with laths nailed across it, and every year it grows to resemble a mammoth bee-hive. When it attains full bloom it is a beautiful sight and it has arrived to the dignity of having its picture taken for publication in two of the largest papers in the country. As Young America now says, "It's a corker!" Price, postpaid, 25 cents each; five for \$1.00.

Clematis Jackmanii. Two years old. Flowers large, intense velvety purple, four to six inches in diameter. The dazzling effect of this elegant vine when in blossom cannot be described. Price, 60 cents each.

Clematis Henryii. Two years old. Strong, vigorous grower, with large, creamy-white flowers. Each, 60 cents.

Also one year old roots of Duchess of Edinburgh, Mme Baron Veillard, Ramona, Jackmanii and Paniculata, all fine varieties. Your selection of one, 15 cents; three, 35

# Implements.

## Michigan Seed Drills.

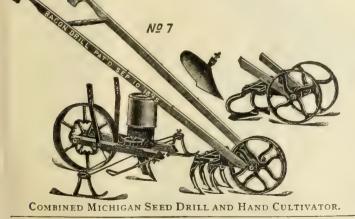

Also known in the West as the Bacon Seed Drill.)

Will our customers please note that in case a drill only is wanted, they should order the Michigan Seed Drill (Improved.) But if they want both drill and cultivator combined they should order the combined Michigan Seed Drill and Hand cultivator. (See engraving.) In the course of a long farming experience, we have used on our farm about every seed drill made in the United States. All had their good qualities, and all had their defects. The great defect of the one we have used longest has been that it tended to bunch the seed, that is, leave blanks here and there. Having tried several other patents without getting what we wanted, four years ago we found a new one on the market, which originated in the West, named the "Michigan." Having adopted it on our own farm as markedly superior to all others, we heartily recommend it to our customers. Some of its excellent characteristics: I. The feed is not a modification of any of those already in use, but is an entirely new device, and while sowing onion, cabbage, turnip, and that class of seeds equal to the best drills on the market, it will also sow parsnip, carrot, salsify, heet, mangel wurtzel, prickly spinach, and other seeds of that class equally well, getting an even row with light seeding, thus making a saving of seed, and labor in thinning. 2. It is simple in construction and operation, with no complicated adjustments to get out of order. 3. All the adjustments are made by thumb-screws, thus obviating the necessity of carrying wrenches or tools. 4. It has two wheels, the second one for use when it is desired by obtaining extras (see below) to have a machine like No. 7. 5. Without stooping, one movement of the hand will raise or lower both markers, lower one marker and raise the other, or reverse them as desired. 6. The seeds in sowing are in full view, and if there is any failure to drop, from the clogging of the opening or any other reason, it will instantly be detected. 7. It is easily thrown out of gear for moving from one place to another. 8. That the "Michig

MICHIGAN SEED DRILL, IMPROVED.

We also offer the Combined Michigan Seed Drill and Hand Cultivator, having in addition to the Drill, five teeth, two hoes and two plows, for use in cultivating. This has been improved since last season in having two front wheels instead of one. These 

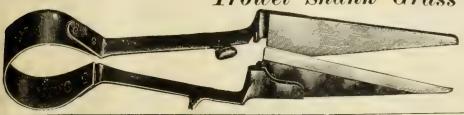

Trowel Shank Grass Shears.

The Trowel Shank Grass Shears are of American make. Both blade and bow are of tempered steel. It has stood the test of years, and is highly recommended as the easiest cutting grass shears made.

These shears are made of tempered steel. The blades are 5 1-2 inches long, and the handle parts are made to fit the hand so that it is one of the easiest to use.

Price, per mail, postpaid, 60 cents; per express, 45 cents.

### IMPLEMENTS.—Continued

NONE SUCH SIFTER A EVERIT

### Nonesuch Sifter. (New.) For Applying Powdered Insecticide, Lime, Plaster, etc.

The best sifter made. Made on the only correct principle that insures a uniform distribution of any dry fine powder, with very little work and will not clog. The perforations in each of the two bottoms of this sifter are so evenly balanced that the upper one never allows so much material to go on the bottom as to clog it, making the work easy and reliable. By its use one-third of the usual quantity of powder will be saved. Most people prefer to use dry material against insects, and on every farm are some crops that must be treated dry, like cabbage for cabbage worms, vine crops for the striped bugs which cannot be poisoned with Paris Green, and this little sifter will do the work to perfection. Price, per express, 40 cents each.

### Daisy Scuffle Hoe.

This scuffle hoe is made of the best quality of very light, narrow steel, neeing and thinning celery, lettuce, and all similar crops. The handle is This scuffle hoe is made of the best quality of very light, narrow steel, for hoeing and thinning celery, lettuce, and all similar crops. The handle is about four feet and a half long and the blade, being sharp on both edges can be used to good advantage among all running vines and also in the cabbage field without injuring the stocks or breaking the leaves, while the soil is left smooth instead of in ridges, as by ordinary methods. For ladies' use in the flower garden and in all places where a light, useful tool is wanted, this is far ahead of any yet placed on the market. Price, per express, at purchaser's expense, 6 inch blade, 40 cents; 8 inch blade, 50 cents.

### Red Star Weeder. (New.)

### Stahl's Brass Excelsion Sprayer, No. 19.

### New Era Sprayer.

Thousands of these machines are now used all over the United States, and are giving great sat-isfaction. High-ly recommended as an insect ed as an insect exterm in a tor for killing plant lice, flea beetles, aphids, green fly, mealy bugs, etc., such as attack cabbage, squashes, melons, cucumbers, and small fruits of all kinds, Capital, also, for keeping flies from cattle and or beast, but very or beast, but very

horses. The following formula is perfectly harmless to man or beast, but very obnoxious to insects: "Fish oil, 2 quarts; crude carbolic acid, 1 pint; oil pennyroyal, 1 ounce; oil of tar, 8 ounces. Always see that the leather plunger is well oiled; occasionally take out and clean. Always clean and dry the reservoir before putting away. We can supply these in treble tube brass, \$1.00. tin, 75 cents; per express, at purchaser's expense

### New National Broadcast Seed Sower.

### (For Grasses and Grains.)

Says the Introducer: "This Says the Introducer: "This combines the good features of every other broadcast Sower. It is cheap, strong, durable and accurate. No farmer can afford to sow his seeds by hand (the old way) when he can get one of the New National at our price. By the superior construction of the hopper and attachment of the sack it sows out clean." Price, per express, at purchaser's expense, \$1.50.

Full directions sent with each sower.

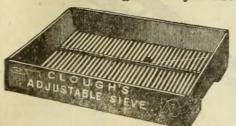

each sower.

## IMPLEMENTS, - Continued.

Third Cover Page.

### Clough's Adjustable Sieve.

"Universal" sieve would have been a better name, for we find that it will do the work for which we before rework for which we before required twenty or more different sieves. Capital for cleaning all sorts of seed, beans, peas, grain, etc. The black spot near the middle represents a screw, by the turning of which the crossbars can be brought nearer together, thus altering the distance between sieve with every alteration.

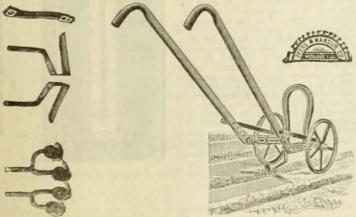

these bars, and practically making it a different sieve wi Price, per express or freight at purchaser's expense, \$2.00.

## Lightning Bag and Sack Holder.

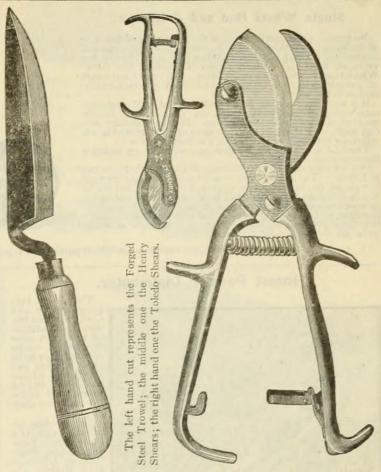

This is not only a bag holder, but a sack holder as well. It is self-adjusting. (See dotted lines for size extended.) The upper part is well adapted to hold in one hand while bran or grain is scooped in with the other hand. In this way it is very convenient for millers and others. Also is perfection for holding the mouth of bag open if you want to fill in the bin by drawing the grain in with your hands. The bag is attached and detached as quick as lightning. Hence the name. Don't think, because it's cheap, it is not good. If you don't consider it as good as any bag holder you ever saw, and far more convenient, send it right back and get your money. After you get one you will want another or several. You will find several around the farm as convenient and desirable as several pockets in your everyday suit of clothes. Price, postpaid, 40 cents; per express, at purchaser's avveners. postpaid, 40 cents; per express, at pur-chaser's expense, 25 cents.

### McGee Garden Hoe Cultivator.

With but one other exception, this is the only hand cultivator out of the score before the public in which the two hoes are always under the control of the operator. It is of the straddler class; that is, the hoes go each side of the row. Other straddlers are adjustable by screws, and when once set are immovable, to be made to go farther from or nearer the plants only by resetting. In the "McGee" there is no cross-bar connecting the handles, and the result is that the hoes, which are attached to them, are every moment completely under the control of the operator, to knock away a stone, remove a weed, or even to thin the growing crop. With the capacity to run close to the growing crop, a large proportion of hand-weeding is saved, that most costly item in the raising of onions, beets, carrots, and all bed crops. The "McGee" is considered invaluable by some of the largest market gardeners in the vicinity of Boston and we have several of them in use on our own farm with great satisfaction, where the land is about level and fairly free from surface stones. The engraving shows its appliances for cultivator use. Price, per express or freight, at purchaser's expense, \$5.25.

## Toledo Pruning Shears.

These shears are A1 in quality, over 500 pairs of them having been used in the vineyards of Toledo, Ohio, last spring. But they are looked down upon by many because they are low-priced. When they were \$2.00 per pair they were excellent, but when they are 75 cents they are a "poor thing." The fact is that no mechanic could improve their quality if he were paid \$10.00 per pair for them. Price, per express, 75 cents; per mail, postpaid, 90 cents. Extra blades, 25 cents; extra springs, 10 cents. For higher-cost shears we would recommend the Henry. (See Cut.) Price, per express, at purchaser's expense, \$1.25; per mail, \$1.40.

### Forged Steel Garden Trowel.

The blade and shank of these are made from one piece of steel, and are exceptionally strong and stout. Price, per express, at purchaser's expense, 40 cents; per mail, 50 cents.

### Steel Garden Trowel.

These are made of fine cold-rolled steel, with malleable iron shank, firmly riveted. An excellent article of their kind. Price, per express, at purchaser's expense, 15 cents; per mail, 25 cents.

### Tyrian Plant Sprinkler. (New.)

These are very handy for house-plants, as you can water them very quickly without injuring them, and cleanse their leaves without soiling anything near by. It is a close imitation of nature's own way of

watering—just like rain. The neck, as will be seen by the illustration, is bent, so as to enable one to cleanse the under side of the leaves. Price, per mail, postpaid, 70 cents; per express, 60 cents.

### RECOMMENDATIONS.

Lorenzo G. Custin, Akron, Ohio, writes: "From 800 plants of Earliana from your seeds, I sold 120 half-bushel baskets for \$150."
H. H. Smith, Chester, Mass., writes: "Your Carter's Elephant Swedes are

A. A. Rice, Sierra Nevada, Cal., writes: "I desire to say that your Delaware Potatoes are wonders. Here in California it crops very heavily, and we grow two full crops of them every year."

Lucy E. Baldwin, Pawling, N.Y., writes: "You do not praise the Giant Perpetual Swiss Chard half enough. From a package of seeds we grew enough to satisfy a family of six, who were fond of the variety, all the season." Fred F. Rockwell, So. Woodstock, Conn., writes: "A customer of yours from whom I got your address for catalogue, incidentally said of you, 'They have always treated me white.'"

# The "Gem of the Garden."

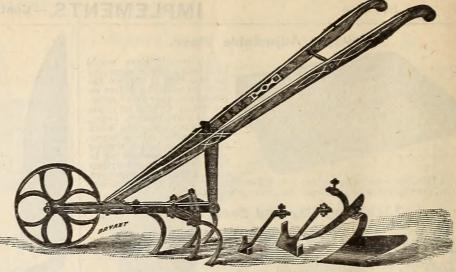

### Single Wheel Hoe and Cultivator.

No greater proof can be given of the popularity of a tool, or of its intrinsic worth, than the one simple fact of a continued demand for it. Say the manufacturers: "During the past few years, we have placed about fifteen thousand of the GEM' Wheel Hoes in the hands of gardeners, and we are not aware of a single instance in which it has failed to give entire satisfaction to the user" faction to the user."

It is not a toy; neither is it a tool made of light gray castings, calling for constant repair, the "GEM" being largely made up of steel and malleable iron. The set of slender stirring teeth, each stamped from one piece of steel, cannot be excelled for thorough work, especially in hard soil.

The "GEM" is nicely finished, and when set up makes a handsome implement.

Our old customer, Mr. W. Holmes, of Davenport, Ia., writes as follows: "For about twenty years I have used, as they were introduced, five or more of the improved cultivators, not one of which failed to pay well; but I have found none which, for thoroughness of work, adaptation to many crops, and ease of handling, and shifting to any desired width or depth, equals the Gem' you sold me the past spring. For onion or strawberry culture it leaves but little to be desired."

Price, per express or freight at purchaser's expense.....

### Insect Powder Distributer.

This is an improvement on the Cyclone, in that two rows can be attended to at the same time, and it can be elevated so as to be used on vines and shrubbery, while the feed, being through off-sets, prevents its clog-

This machine effectually applies
Paris Green, London Purple, Hellebore, or Bordeaux
Dry Mixture directly to the vines.
It does entirely away with the necessity of using water, plaster, or any other bulky adulterant; simply from one to one and This machine effrom one to one and a half pounds of Paris Green to the acre blown on the vines by this fine distributer com-pletes the whole

business. In an hour an acre can be readily gone over, and the vines are never injured in the least; whereas when water is used, some of the arsenic is dissolved and burns the vines. No more backbreaking lugging of water:

W. F. ANDROS, East Hartford, Conn., writes: "Your Distributer simply reduces the cost of exterminating potato bugs to the minimum. It is simple in construction, and not likely to get out of repair.

Price, per express or freight, at purchaser's expense, \$4.00.

## The Rochester Self Operating Sprayer.

This is an improvement over most portable sprayers in that it works au-tomatically by compressed air, and as it can be carried along by the operator it reduces the operation of spraying to

a pastime.

Directions. The sprayer is filled not more than two-thirds full by un-

not more than two-thirds full by unscrewing and removing the Brass Air Pump (C) at point marked "S." The pump is then put back into position and the machine charged with compressed air by working the air pump. The air enters the Sprayer through the valve (V) at bottom of pump, thoroughly agitating and mixing contents of Sprayer.

The machine is now ready for use; all the operator need do is open the stop cock (Y) and hold the nozzle to direct the spray. The compressed air, being powerful and elastic, forces the liquid out through the outlet pipe (D), making either a fine spray or a solid, continuous stream as desired. By slipping the steel ring over handle of air pump, operator can carry the machine from place to place. This size machine holds from 3 to 4 gallons, weighs 8 pounds. The body is made of Galvanized Iron or Copper as desired. Air pump is made of brass, the valve (V) preventing liquid from entering pump or coming in contact with the plunger.

Price, per express, at purchaser's expense: Made of copper. Stop

Price, per express, at purchaser's expense: Made of copper, \$5.50

These as well as all sprayers need to be thoroughly cleaned immediately

### INDEX TO DEPARTMENTS.

Books, second page of cover.
To Our Patrons, Page 1.
Novelties, Vegetable, Fruit and Flower, pages 2 to 8.
Vegetable Novelties of Previous Years, pages 9 to 37.
General Vegetable Full Price List, pages 38 to 51.

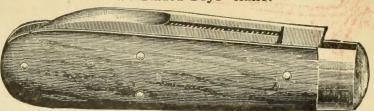

General List of Flowers, pages 52 to 63. Bulbs, Shrubs and Roses, pages 64 to 68.

Small Fruits, pages 69 to 72.

Implements and Requisites, pages 73, 74, 75, 76 and third page of Superior Knives.

Two-Bladed Boys' Knife.

This makes a nice present for our boys, This is of razor-steel and therefore much superior to the common 25-cent knives in the market. Postpaid to any address on receipt of 35 cents.

### Two=Bladed Ladies' Knives.

This is one of the prettiest and most popular of knives. It has an elegant pearl handle, and the blades are of the best quality of By mail, postpaid, 35 cents.

As the above engraving shows, this is one of the handiest knives for the vest pocket. Being small in size, and with rounded ends, it can be both taken from and slipped back into the pocket very quickly. It has a blade on each side of the handle, which makes it always available. Like all our other knives, it comes ground, all ready for use. Price, per mail, postpaid, 45 cents

### CORN KNIFE.

### Lang's Hand Weeder.

This we find to be by actual trial a first-class labor-saver; it will save its cost in a day. The special advantage of this over all other weeders of this class is that it has a band which weeders. of this class is that it has a band which passes over the fingers, which, when the tool is not in use, gives full use to the hand for pulling weeds and thinning out plants with-out laying down the tool. It is neatly and strongly made. Price, per express, 25 cents; by mail, postpaid, 30 cents.

Budding Knife. Cocoa handle, razor-steel sents exact size. By mail, post paid, 35 cents.

# Fuller's Danvers Weeder.

This is a very strongly built tool; and has the advantage over other hand weeders, which are excellent in their several spheres, that, having a stouter handle, it can be more strongly grasped; and the cutting edge being broader, and the implement in every way stouter made, it can do better work in the thinning and weeding of many crops, sepecially in hard ground. Used edgeways, it will fairly cultivate the land between closely set crops in hotbeds or otherwise. Writes Mr. H. H. Jacobs: "For thinning cabbage, it beats everything." Says Mr. F. L. Newhall: "It gives me greater satisfaction than any other tool of the kind I have ever tried." Says Mr. C. F. Shillaber: "First-rate for onions and carrots; would not part with mine for five dollars." Price, postpaid, 40 cents; per express,

### Combination Tool.

This tool, in addition to the appliances for cutting and setting glass, has also attached to it a steel for sharpening knives and scissors, also a cork-screw; will be mailed postpaid for 15 cents.

Grafting or Paring Knife.
Say the manufacturers: "This kntfe was made from a pattern given us by an old nurseryman, and we have never yet met a man who did not commend them after trying them. This is also in very general use as a paring knife and in steady demand for all round use in the kitchen." We regret that want of space prevents showing our customers a picture of this useful knife. Price, per mail, postpaid, 25 cents.

### Hazeltine's Hand Weeder. (One sixth full size.)

This is not only a good weeder

## Excelsior Weeder.

A handy and efficient tool in the flower and vegetable garden, To be used when weeds are small. By express, 25 cents; mail, 30 cents.

### Glass Cutting and Glazing Tool.

Some of our workmen who use this implement find it cuts

glass as readily and setting glass as readily and setting glass as just about equally as valuable, though it costs not one twentieth as much. One we have had in use for several years is now as good as ever. Sent postpaid for 12 cents.
